

Westland Wyvern

Sean Kelly

Wyvern Michael J. Doust, 2006-01-01 Om Westland Wyvern jagerbombeflyet, som kun var i operativ tjeneste i kort tid fra maj 1953 til marts 1958 i Royal Navy. Indeholder en beskrivelse af flyet samt om piloter, teknikere og andres oplevelser med flyet under den korte tid flyet var operativt.

Cult of the Wyvern Sean Kelly, 2023-10-31 The Westland Wyvern was a troubled British strike fighter aircraft that led a brief service career, and has been largely forgotten...in our world, anyway. At the far corner of the universe, in a magical realm hitherto unknown, it is a legend! After a harrowing encounter with the enemy over the Mediterranean Sea in 1956, a flight of Royal Navy pilots, including Canadian exchange officer Sidney Daventry, quickly find themselves in even greater peril: a swirling vortex, a wormhole, a portal to an alien world awash in light and beauty. But they're not the only humans stranded in this strange new world. Lucretia Tang was once a respected biochemist, but a slanderous hit piece has ruined her career and her marriage. Together with her marine biologist brother, Jeremiah, she has taken to doing freelance research, which leads to her and her brother getting trapped in the same kind of wormhole, transported to the same corner of the universe, where they cross paths with the troupe of hapless aviators. While plotting their escape back to the world they know, Lucretia and Sid learn of a grave threat to the Racosku, the brilliant and friendly native species. Desperate to help the creatures, they devise a plan to use the Tangs' scientific knowledge and Sid's flying skills to eliminate the danger. But they must convince the others, especially by-the-book commanding officer Gene Faintary, to risk the very machines they need to get back home. In doing so, Sid must choose between following the orders of his commander and those of his heart. In this whimsical yet emotional adventure, generations collide, personalities clash, and the Westland Wyvern may just become a mount for heroes.

Kites, Birds & Stuff - Westland Aircraft P. D. Stemp,2011-07 One of the early pioneering aviation companies of Great Britain, during the early part of the 20th. century. A comprehensive study of this British aircraft manufacturer

Torpedo Bombers, 1900-1950 Jean-Denis Lepage,2020-01-27 The torpedo-bomber was a very short-lived weapon system, operational for scarcely half a century from just prior WWI to the 1960s. Yet during its brief existence it transformed naval warfare, extending the ship-killing range of ships and coastal defences to hundreds of miles. The Royal Navy and Fleet Air Arm led the way, recording the first sinking of a ship by aerial torpedo in August 1915 but all major navies eagerly developed their own torpedo bomber forces. The torpedo-bomber reached its zenith in WWII, particularly from 1940-42, with notable successes at the Battle of Taranto, the sinking of the Bismarck and Pearl Harbor. It was the weapon of choice for both the US and Japanese in the big Pacific battles such as Midway. In the latter stages of the war, increasingly effective anti-aircraft fire and interceptor aircraft started to render it obsolete, a process completed post-war by long-range anti-ship missiles. Jean-Denis Lepage traces the development of torpedo bombers worldwide, describing their tactics, operational history and the aircraft themselves, including such well-loved types as the Swordfish, Beaufighter and Avenger. Over 300 aircraft are beautifully illustrated.

Wings Over Somerset Peter Forrester,2012-02-01 One evening as he made his way to a local church social in the village hall during the 1950s, a loud crack shook the ground and the night sky turned to an orange glow, lighting the way for him. Shrugging his shoulders, the author made his way through the village, and in the distance he heard an explosion as a jet aircraft hit the ground. It was a common enough occurrence in the village of Ilton; RAF Merryfield was always losing aircraft and on a regular basis. Fifty years later, and in an effort to put his indifference right, the author began to investigate air crashes in and around Somerset. What he discovered appalled him at the sheer scale of it all. He now shares his findings of Somerset air crashes since 1945 with you.

Empire of the Clouds James Hamilton-Paterson,2010-10-07 In 1945 Britain was the world's leading designer and builder of aircraft - a world-class achievement that was not mere rhetoric. And what aircraft they were. The sleek Comet, the first jet airliner. The awesome delta-winged Vulcan, an intercontinental bomber that could be thrown about the sky like a fighter. The Hawker Hunter, the most beautiful fighter-jet ever built and the Lightning, which could zoom ten miles above the clouds in a couple of minutes and whose pilots rated flying it as better than sex. How did Britain so lose the plot that today there is not a single aircraft manufacturer of any significance in the country? What became of the great industry of de Havilland or Handley Page? And what was it like to be alive in that marvellous post-war moment when innovative new British aircraft made their debut, and pilots were the rock stars of the age? James Hamilton-Paterson captures that season of glory in a compelling book that fuses his own memories of being a schoolboy plane spotter with a ruefully realistic history of British decline - its loss of self confidence and power. It is the story of great and charismatic machines

and the men who flew them: heroes such as Bill Waterton, Neville Duke, John Derry and Bill Beaumont who took inconceivable risks, so that we could fly without a second thought.

Men of Power Robert Jackson, 2007-03-28 The story begins in 1940 when Harvey Heyworth was leading No. 79 Squadron RAF defending north-eastern England from Luftwaffe raids made by bombers based in Norway and Denmark and then later in the Battle of Britain when the unit moved south. During late 1940 and up to June 1941 Heyworth led his squadron in defense of Bristol and Swansea operating by night and day. By 1942 he had amassed 4,000 flying hours. Harvey then joined Rolls-Royce test flying early British jet aircraft including the famous Gloster-Whittle and test-bed Wellington bombers powered by the new jet engines. In 1944 Harvey's brother Jim also joined Rolls, having flown with No. 12 Squadron in Bomber Command. The story then unfolds into the development of the Trent turboprop and the Avon jet engines. Development work on a variety of test-bed aircraft was ongoing and included some weird combinations of airframe and engine. Jim succeeded his brother as chief test pilot in 1958 and flew 82 different aircraft types. He recounts his experiences of piloting the Vulcan bomber, Lightning and the 'Flying Bedstead' VTOL test rig.

Aircraft Carriers Norman Polmar, 2008-01-01 In the post-1945 era, the aircraft carrier has remained a valued weapon despite the development of nuclear weapons, cruise and ballistic missiles, and highly capable submarines. At times, as in the early days of the Korean and Vietnam Wars and in the Falklands conflict, carriers alone could deploy high-performance aircraft to the battlefield. In other operations, such as enforcing the no-fly zones and the U.S. invasions of Afghanistan and Iraq, only carriers could provide the bases needed for sustained combat and support operations. This second

volume of Norman Polmar's landmark study details the role of carriers in the unification of the U.S. armed forces and strategic deterrence, fiscally constrained Great Britain, the development of British Commonwealth and ex-colonial navies, and the efforts of France and the Netherlands to rebuild their fleets. The role of the modern carrier-nine nations currently possess them-is discussed, as are the issues confronting nations that might acquire them. Chapters on the Soviet Union's effort to produce carriers are included for the first time. The development of both carrier planes and the many oddball aircraft that have flown from carriers-such as the U-2 spy plane-are also examined. Appendixes include comprehensive data on all carriers built and converted through 2006. This volume is a valuable companion to the critically acclaimed Volume I, which covers aircraft carrier development and operations from 1909 to 1945.

Warbirds of the Sea Walter A. Musciano,1994 Covers the history and combat career of aircraft carriers and shipboard aircraft from their conception into the future.

Allied Aircraft Piston Engines of World War II Graham White,1995-09-01 While it took the demands of two World Wars to bring aviation into acceptance by the general public, it was a relative handful of engineers, entrepreneurs, and pilots who positioned the technology and resources necessary to make aviation one of the deciding factors in ending World War II. This book attempts to illuminate some of the historically significant technical developments that were incorporated into World War II aircraft engines that directly contributed to the execution and tactics of the war. Engines detailed in the book include those from these manufacturers: Rolls-Royce Bristol, Napier General Electric Pratt and Whitney Allison Wright Aeronautical Corporation

and Gas Turbine Engines, Second Edition builds upon the success of the book's first edition, with the addition of three major topic areas: Piston Engines with integrated propeller coverage; Pump Technologies; and Rocket Propulsion. The rocket propulsion section extends the text's coverage so that both Aerospace and Aeronautical topics can be studied and compared. Numerous updates have been made to reflect the latest advances in turbine engines, fuels, and combustion. The text is now divided into three parts, the first two devoted to air breathing engines, and the third covering non-air breathing or rocket engines.
