European Margin Sediment Dynamics Jürgen Mienert,Phillip Weaver,2012-12-06 This book provides acoustic images about sedimentary systems of the shelf edge, slope and deep-sea-floor. Data obtained by the European North Atlantic Margin and the STEAM Project shows areas of potential instability and deepwater sediment transport systems on the continental slope. The knowledge gained can be used by both academia and hydrocarbon industry so as to arrive at a better understanding of continental margins and the processes shaping them. It will also interest colleagues in earth sciences involved in margin surveys for environmental studies. The current global trend in marine resource development is to move into deeper water, and this book can provide examples relevant to other passive margins around the world. There is a growing need for reliable measurements in deep water and knowledge related to stabilisation. Slope stability problems will be identified with greater reliability, thus improving safety standards for coastal and offshore environmental policies.

Nursing Therapeutics. The Impact of Diversity Between Nurse and Patient Within the Confines of the Therapeutic Relationship Timothy John Whittard, 2019-05-06 Essay from the year 2007 in the subject Psychology - Consulting, Therapy, grade: Pass, University of the West of England, Bristol, course: Mental Health Nursing, language: English, abstract: This essay aims to discuss and explore the impact of diversity between nurse and patient within the confines of the therapeutic relationship; this is achieved through reflecting upon an interaction which occurred between a patient and myself during clinical practice. Peplau (1952) considers the therapeutic relationship to be the central focus of all nursing practice. Furthermore, Graham (2001), Lauder et al (2002) and Hewitt and Coffey (2005) all describe the therapeutic relationship as forming the cornerstone of modern nursing practice. Egan (1994) illustrates the 'skilled helper model' of counseling, which is reported by Sloan (1999) to promote warmth and genuineness during interactions with patients; this model focuses on the patient (Egan, 1994), and can be described as a humanistic approach to helping (Jones, 1998). It is for these reasons that I have elected to apply the use of this model to the interactions, which occurred between the patient and myself. Explicit consent was obtained from the patient in question for the material which was obtained during these interactions to be used within this assignment; and in order to conform to the code of conduct detailed by the Nursing and Midwifery Council, and to maintain the confidentiality of the patient, throughout this essay they will be referred to as Howard. Howard is a 38-year-old man, who had been unemployed and living in 'bed and breakfast' accommodation for the six months preceding his admission to hospital, following the breakdown of his marriage. It appeared that the stress, which culminated with the separation from his wife and their pending divorce, had led to a progressive deterioration in his mental state and mood, which had made it difficult for him to work.

Ceramics and Globalization Neil Ewins, 2017-05-04 Neil Ewins' study of the Staffordshire potteries in a period of great global change traces how ceramics production has been affected by globalisation in both familiar and unexpected ways. Although many manufacturers such as Wedgwood initially moved production to cheaper labour markets in East Asia, others remained in or returned to England once it became clear that outsourcing manufacturing was affecting the brand value and customer perception of their products. Neil Ewins explores the complex behaviour of the UK ceramics industry, using a combination of evidence from the press, trade journals, ceramic objects, and primary interview evidence of manufacturers, retailers and a ceramic designer. Ewins suggests that, although the surface designs of UK ceramics invariably reflect diverse cultural and stylistic influences, a notion of authenticity often still resides in the place and context in which the ceramic product was originally made. Overall, the book argues that UK ceramics remain culturally complex because of issues of supply and demand, and ties to heritage, imagined or otherwise. Within a context of globalization, the book highlights compelling issues which have huge ramifications on UK manufacturing futures.

Cambridge Theology in the Nineteenth Century David M. Thompson, 2017-03-02 Many books have been written about nineteenth-century Oxford theology, but what was happening in Cambridge? This book provides the first continuous account of what might be called 'the Cambridge theological tradition', by discussing its leading figures from Richard Watson and William Paley, through Herbert Marsh and Julius Hare, to the trio of Lightfoot, Westcott and Hort. It also includes a chapter on nonconformists such as Robertson Smith, P.T. Forsyth and T.R. Glover. The analysis is organised around the defences that were offered for the credibility of Christianity in response to hostile and friendly critics. In this period the study of theology was not yet divided into its modern self-contained areas. A critical approach to scripture was taken for granted, and its implications for ecclesiology, the understanding of salvation and the social implications of the Gospel were teased out (in Hort's phrase) through enquiry and controversy as a way to discover truth. Cambridge both engaged with German theology and responded positively to the nineteenth-century 'crisis of faith'.

Ophelia and the Marvelous Boy Karen Foxlee, 2015-02-10 "Magic is "messy and dangerous and filled with longing," we learn in this brave tale of grief, villainy and redemption that borrows from the story of the Snow Queen. Set in a vast, chilly museum, the tale brings together a valiant girl, a charmed boy, a magical sword and a clock ticking down to the end of the world."—The Wall Street Journal This is the story of unlikely heroine Ophelia Jane Worthington-Whittard who doesn't believe in anything that can't be proven by science. She and her sister Alice are still grieving for their dead mother when their father takes a job in a strange museum in a city where it always snows. On her very first day in the museum Ophelia discovers a boy locked away in a long forgotten room. He is a prisoner of Her Majesty, the Snow Queen. And he has been waiting for Ophelia's help. As Ophelia embarks on an incredible journey to rescue the boy everything that she believes will be tested. Along the way she learns more and more about the boy's own remarkable journey to reach her and save the world. A story within a story, this a modern day fairytale about the power of friendship, courage and love, and never ever giving up.
