The History of Wisconsin, Volume IV John D. Buenker, 2013-03-05 Published in Wisconsin's Sesquicentennial year, this fourth volume in The History of Wisconsin series covers the twenty tumultuous years between the World's Columbian Exposition and the First World War when Wisconsin essentially reinvented itself, becoming the nation's laboratory of democracy. The period known as the Progressive Era began to emerge in the mid-1890s. A sense of crisis and a widespread clamor for reform arose in reaction to rapid changes in population, technology, work, and society. Wisconsinites responded with action: their advocacy of women's suffrage, labor rights and protections, educational reform, increased social services, and more responsive government led to a veritable flood of reform legislation that established Wisconsin as the most progressive state in the union. As governor and U.S. Senator from Wisconsin, Robert M. La Follette, Sr., was the most celebrated of the Progressives, but he was surrounded by a host of pragmatic idealists from politics, government, and the state university. Although the Progressives frequently disagreed over priorities and tactics, their values and core beliefs coalesced around broad-based participatory democracy, the application of scientific expertise to governance, and an active concern for the welfare of all members of society—what came to be known as the Wisconsin Idea.

Laser Beam Propagation in Nonlinear Optical Media Shekhar Guha, 2017-12-19 This is very unique and promises to be an extremely useful guide to a host of workers in the field. They have given a generalized presentation likely to cover most if not all situations to be encountered in the laboratory, yet also highlight several specific examples that clearly illustrate the methods. They have provided an admirable contribution to the community. If someone makes their living by designing lasers, optical parametric oscillators or other devices employing nonlinear crystals, or designing experiments incorporating laser beam propagation through linear or nonlinear media, then this book will be a welcome addition to their bookshelf. —Richard Sutherland, Mount Vernon Nazarene University, Ohio, USA *Laser Beam Propagation in Nonlinear Optical Media* provides a collection of expressions, equations, formulas, and derivations used in calculating laser beam propagation through linear and nonlinear media which are useful for predicting experimental results. The authors address light propagation in anisotropic media, oscillation directions of the electric field and displacement vectors, the walk-off angles between the Poynting and propagation vectors, and effective values of the d coefficient for biaxial, uniaxial, and isotropic crystals. They delve into solutions of the coupled three wave mixing equations for various nonlinear optical processes, including quasi-phase matching and optical parametric oscillation, and discuss focusing effects and numerical techniques used for beam propagation analysis in nonlinear media, and phase retrieval technique. The book also includes examples of MATLAB and FORTRAN computer programs for numerical evaluations. An ideal resource for students taking graduate level courses in nonlinear optics, *Laser Beam Propagation in Nonlinear Optical Media* can also be used as a reference for practicing professionals.

The History of Wisconsin, Volume II Richard N. Current, 2013-03-28 This second volume in the History of Wisconsin series introduces us to the first generation of statehood, from the conversion of prairie and forests into farmland to the development of cities and industry. In addition, this volume presents a synthesis of the Civil War and Reconstruction era in Wisconsin. Scarcely a decade after entering the Union, the state was plunged into the nationwide debate over slavery, the secession crisis, and a war in which 11,000 Badger Boys in Blue gave their lives. Wisconsin's role in the Civil War is chronicled, along with the post-war years. Complete with photographs from the Historical Society's collections, as well as many pertinent maps, this book is a must-have for anyone interested in this era of Wisconsin's history.

Joseph Johannes Wierz, 2014-11-29 Was haben Rosemarie Nitribitt und Allende mit der RAF zu tun? Was haben indische SS-Männer nach dem zweiten Weltkrieg mit ominösen Stille-Hilfe-Organisationen und Schönheitschirurgie zu schaffen? Ja, und wie, um Himmels willen, kommt ein unbekannter Streuner an Bilder, Tonbandaufnahmen und Akten hochrangiger und niemals gefasster Kriegsverbrecher? Die Antwort führt in ein

kleines Bergdorf in den Alpen unweit Münchens und direkt zu den Ereignissen um die Geburt Joseph Huftreters auf dem Einsiedlerhof der Schwestern Maria und Elisabeth. Der Vater des körperbehinderten Jungen ist niemand anders als der einflussreichste Fotograf seiner Zeit, der mit seiner Kamera an allen Orten der Welt auftaucht, wo Regime gestürzt oder Menschenrechte verletzt werden. Am Archiv des Fotografen sind naturgemäß mehr als nur eine Person und eine Behörde interessiert. Und während die halbe Welt hinter dem Fotografen her ist, macht Joseph Huftreter in seinem Dorf eine erstaunliche Wandlung durch.

Wisconsin Sentencing in the Tough-on-Crime Era Michael O'Hear,2017-01-17 The dramatic increase in U.S. prison populations since the 1970s is often blamed on mandatory sentencing laws, but this case study of a state with judicial discretion in sentencing reveals that other significant factors influence high incarceration rates.

Financial Cryptography and Data Security Matthew Bernhard,Andrea Bracciali,L. Jean Camp,Shin'ichiro Matsuo,Alana Maurushat,Peter B. Rønne,Massimiliano Sala,2020-08-06 This book constitutes the refereed proceedings of two workshops held at the 24th International Conference on Financial Cryptography and Data Security, FC 2020, in Kota Kinabalu, Malaysia, in February 2020. The 39 full papers and 3 short papers presented in this book were carefully reviewed and selected from 73 submissions. The papers feature four Workshops: The 1st Asian Workshop on Usable Security, AsiaUSEC 2020, the 1st Workshop on Coordination of Decentralized Finance, CoDeFi 2020, the 5th Workshop on Advances in Secure Electronic Voting, VOTING 2020, and the 4th Workshop on Trusted Smart Contracts, WTSC 2020. The AsiaUSEC Workshop contributes an increase of the scientific quality of research in human factors in security and privacy. In terms of improving efficacy of secure systems, the research included an extension of graphical password authentication. Further a comparative study of SpotBugs, SonarQube, Cryptoguard and CogniCrypt identified strengths in each and refined the need for improvements in security testing tools. The CoDeFi Workshop discuss multi-disciplinary issues regarding technologies and operations of decentralized finance based on permissionless blockchain. The workshop consists of two parts; presentations by all stakeholders, and unconference style discussions. The VOTING Workshop cover topics like new methods for risk-limited audits, new methods to increase the efficiency of mixnets, verification of security of voting schemes election auditing, voting system efficiency, voting system usability, and new technical designs for cryptographic protocols for voting systems, and new way of preventing voteselling by de-incentivising this via smart contracts. The WTSC Workshop focuses on smart contracts, i.e., self-enforcing agreements in the form of executable programs, and other decentralized applications that are deployed to and run on top of specialized blockchains.

Wisconsin Indians Nancy Oestreich Lurie,2013-08-26 This best-selling short history of Wisconsin's native peoples is now updated and expanded to include events through the end of the twentieth century. The Indians in Wisconsin's History John M. Douglass,2022-06-03 This book depicts the life of the Native Americans who reside in the state of Wisconsin from before to after the arrival of the Europeans. The way of life of numerous tribes was related by the author, such as Menomini, Potawatomi, Chippewa, Mascouten, Sauk, Fox, Ottawa, and Kickapoo tribes. Paintings and photographs featured on nearly every page gave life to the vivid description of what life was like in that era for the Native Americans.

Control and Dynamic Systems V13 C.T. Leonides,2012-12-02 Control and Dynamic Systems: Advances in Theory and Applications, Volume 13

discusses the techniques of control and dynamic systems and their applications to modern complex systems. This book begins by discussing the application of modern optimal theory in the operation of large scale power systems. It then describes how to synthesize suspension forces for high-speed tracked vehicles. The succeeding chapters present examples of economizing problems; application of optimization techniques to aerospace vehicle problems; distributed parameter optimal design problem under dynamic loads; optimization of spacecraft; and stability problems in interconnected systems. Engineering students studying the application of control and dynamics to modern complex systems will find this book very useful.

Wisconsin in the Civil War Frank Klement, 2013-03-05 The final book by Marquette University historian Frank L. Klement (1905-1994), this is a vivid chronological narrative of Wisconsin's role in the pivotal event in American history. In this volume, Klement greatly expanded his 1962 booklet on this topic, adding new material on each of Wisconsin's fifty-three infantry regiments, political and constitutional issues, soldiers voting, women and the war, and Wisconsin's black soldiers.

The Sower and the Seer Joseph Hogan, Jon Lauck, Paul Murphy, Andrew Seal, Gleaves Whitney, 2021-02-17 This collection of twenty-two essays, a product of recent revivals of interest in both Midwestern history and intellectual history, argues for the contributions of interior thinkers and ideas in forming an American identity. The Midwest has been characterized as a fertile seedbed for the germination of great thinkers, but a wasteland for their further growth. *The Sower and the Seer* reveals that representation to be false. In fact, the region has sustained many innovative minds and been the locus of extraordinary intellectualism. It has also been the site of shifting interpretations—to some a frontier, to others a colonized space, a breadbasket, a crossroads, a heartland. As agrarian reformer (and Michigander) Liberty Hyde Bailey expressed in his 1916 poem “Sower and Seer,” the Midwestern landscape has given rise to significant visionaries, just as their knowledge has nourished and shaped the region. The essays gathered for this collection examine individual thinkers, writers, and leaders, as well as movements and ideas that shaped the Midwest, including rural school consolidation, women’s literary societies, Progressive-era urban planning, and Midwestern radical liberalism. While disparate in subject and style, these essays taken together establish the irrefutable significance of the intellectual history of the American Midwest.
