Turbine Racing in Seattle David D. Williams,2007-07-18 Hydroplane racing captured the heart and soul of Seattle in the early 1950s and never let go. No Seahawks, Sonics, or Mariners game has come close to drawing one-quarter of the audience that watches the hydroplanes race. The unmistakable sound of the boats' huge motors was as big an attraction as the racing itself. In the mid-1980s, something began to change. The distinctive roar of the old Thunderboats gave way to the whoosh of the turbine. The old names like Muncey and Chenoweth were replaced by new names like Hanauer and Villwock.

A Race to Freedom David Williams,2018-04-28 Mira Slovak was born in Czechoslovakia and endured both the Nazi occupation and the brutal Russian liberation. He joined the Czech Air force, rising to Captain by the age of 21. When he could no longer tolerate life under the Communists, he hijacked an airliner and flew across the Iron Curtain to freedom. He went to work for the CIA and was eventually sent to the US and given a job as Bill Boeing, Jr's personal pilot. When Boeing began racing Hydroplanes in the late 1950s, Mira was his driver. During his ten year career as a hydroplane driver, he won many races and two national championships. He met Presidents and dated movie starlets. After a serious hydroplane accident, Slovak switched to airplanes where he won another national championship. When he retired from racing he became a stunt pilot and public speaker and talked about the value of freedom and how we should value it above everything else. He outlasted Communism and when it collapsed in 1990 he returned to his home, only to realize that his true home was, and always would, be the United States.

Airborne Neil Williams,2022-01-04 Due to his reputation for being able to handle the rarest, oldest and most difficult airplanes, Neil Williams was called on to fly some of the most famous and demanding aircraft ever built; from Spitfire, Mosquito, Lancaster, Sea Fury, Yak, Harvard and Heinkel. Neil Williams' experience in these aircraft varied from the exhilaration of a Spitfire first solo; the loneliness of being lost at night over the Indian Ocean; the catastrophic experience of crashing an aircraft in front of 80,000 air show spectators and, most remarkably of all, his amazing crash landing following an in-flight structural failure - a feat which has entered aviation legend and for which he was awarded the Queen's Commendation for Valuable Service in the Air. This is a book to inspire, a book that captures the true essence, adventure and romance of flight.

Some Recent Research on the Handling Qualities of Airplanes Walter C. Williams,1956 Results of recent research on the handling qualities of

airplanes are reviewed. Among the subjects considered are dynamic longitudinal stability, transonic trim changes, pitch-up due to decreasing airspeed, dynamic lateral stability, aileron control, rudder control, and mechanical characteristics of power control systems.

Hydroplane Racing in the Tri-Cities David D. Williams, 2008-06-30 Pasco, Kennewick, and Richland sit along the banks of the Columbia River and form a large, vibrant community in Washington known as “the Tri-Cities.” For over 40 years, tens of thousands of fans have come to the Columbia River to enjoy a day in the sun and watch the Columbia Cup Unlimited Hydroplane Race. Famous drivers like Bill Muncney, Dean Chenoweth, Chip Hanauer, and Dave Villwock have all come to Tri-Cities and battled deck-to-deck to win the Columbia Cup.

Hydroplane Racing in Seattle David D. Williams, 2006-06-07 Hydroplane racing burst onto the Seattle scene in 1950, and local sports fans embraced it with a passion that is hard to imagine. Throughout the early 1950s, thousands of fans flocked to Lake Washington to watch classic races between Seattle's Slo-mo-shun boats and a fleet of East Coast challengers. For over 40 years, hydroplane racing was synonymous with summertime in Seattle. During its golden age, when hydro fever was at its height, drivers like Bill Muncney, Ron Musson, and Mira Slovak were sports heroes on par with today's Ken Griffey Jr. or Ichiro. Seattle became the hydro capital of the nation.

The William E. Boeing Story David Williams, 2022-12-23 The William E. Boeing Story - A Gift of Flight is the first-ever full-length biography of William E. Boeing; the father of commercial aviation. Boeing's story is an exciting one complete with bootleggers, kidnappers and a disastrous run-in with President Franklin Roosevelt and future Supreme Court Justice Hugo Black. Boeing's story covers every aspect of early aviation starting with his first ride in a balloon in 1896 to the christening of the revolutionary jet-powered Dash-80 / 707 in 1955. Along the way, Boeing developed some of the world's most iconic airplanes including the P-26 Peashooter, the Boeing 247, the B-17 Flying Fortress and the mighty B-29 Superfortress. The Boeing Family gave author David D. Williams unprecedented access to the Boeing Family Archives which contained thousands of never before seen photos, diaries, and personal letters. This treasure trove of primary sources allowed Williams to create an extraordinarily vivid and accurate portrait of this influential yet private man.

Flying High Oscar Williams, 2003-02-18 *Flying High* is a chronicle of flying experiences and observations which will stimulate forgotten memories of old pilots, peak the curiosity of new or to be new pilots and give the general public a glance into the world of a private pilot. The book will amuse some and cause many to shake their heads in disbelief.

Flight Tests of the Lateral Control Characteristics of an F6F-3 Airplane Equipped with Spring-tab Ailerons Walter C. Williams, 1945 Flight tests were made to determine whether spring-tab ailerons tended to oscillate or flutter in speed ranges up to 400 mph. Flight tests showed spring-tab ailerons had desirable light stick forces and no tendency to overbalance. No flutter tendencies were indicated up to 400 mph, and any oscillations following abrupt control deflections were heavily damped. Recommendations were made for modifications to increase aileron effectiveness at low speeds without affecting lateral control at high speeds by increasing available deflection and modifying spring-tab arrangement.

Golden Arms, aka Test Pilots Michael Williams, Lance Grace, 2017-05-01 From 1989 to 1995, a small group of individuals with unique skill sets came together to support air-to-air/air-to-ground weapons testing over the White Sands Missile Range (WSMR) in New Mexico. Unwilling to maintain the status quo, they came up with innovative solutions to support test missions and became the best at what they did. One of the squadron's pilots used to say, "We do it, because we can, and we did, because it was fun." What an adventure to fly and do what others could only speculate about. With little notoriety, we helped advance stealth, global positioning systems (GPS), and missile technologies, while developing our own capabilities that no one thought possible. Instead of saying "why," we said "why not," and never settled for ordinary, but extraordinary. In time, our reputation grew as an organization that could always deliver. It was not rare for a project to come in and say, "Your reputation has preceded you, so don't screw up." They only wanted the same support they heard other groups had received before. This book is a pictorial history of that journey, by the actual people who participated, and preserved for you to appreciate and enjoy.

Ted Williams at War Bill Nowlin, 2007 The first book to explore the distinguished military legacy of Hall of Fame ballplayer Ted Williams, who flew

combat missions with the Marine Corps in both World War II and Korea. Featuring a wealth of unseen photos.

Chuck Yeager Colleen Madonna Flood Williams, 2003 Profiles General Chuck Yeager, the first man to fly faster than the speed of sound; a World War II flying ace in the US Air Force who later became a test pilot.

The Joy of Flying Archie F. Williams, 1993 Autobiography of Archie Williams, from his childhood in Oakland, Calif., college at UC Berkeley, through his achievements as gold-medal Olympic athlete (1936), Air Force officer, and teacher/coach in Marin County, Calif.

Go, Get 'em! William A. Wellman, 1918

The Wedell-Williams Air Service Robert S. Hirsch, Barbara Hunter Schultz, 2001 Harry P. Williams and James R. Wedell formed one of the most productive alliances in aviation in the 1930s. Their corporation left a remarkable legacy to the world of air racing and Louisiana. Jimmie Wedell possessed a keen sense of aerodynamics. His aircraft designs set a precedent by demonstrating that bigger engines, with more power, were not always the right combination to place first. The Wedell-Williams story is about individual genius, business savvy, and dedicated teamwork. It is a history of air racing at its best.

Don't Let Them Bag the Nines F. Williams, 2019-09-02 The extraordinary First World War account of pilot Captain Eric Williams' bombing and reconnaissance raids over Germany
