Ultraviolet Light in Water and Wastewater Sanitation (2002) Willy J. Masschelein,Rip G. Rice,2017-11-22 Several general books are available on ultraviolet light and its applications. However, this is the first comprehensive monograph that deals with its application to water and wastewater treatment. There is a rapidly growing interest in using UV light in water sanitation due to the increased knowledge of the potential health and environmental impacts of disinfection byproducts. Ultraviolet Light in Water and Wastewater Sanitation integrates the fundamental physics applicable to water and wastewater sanitation, the engineering aspects, and the practical experience in the field. The text analyzes the concerns associated with this application of UV light and brings together comprehensive information on the presently available UV technologies applicable to water and wastewater treatment including: lamp technologies, criteria of evaluation and choice of technology; fundamental principles; performance criteria for disinfection; design criteria and methods; synergistic use of UV and oxidants (advanced oxidation); and functional requirements and potential advantages and drawbacks of the technique. Ultraviolet Light in Water and Wastewater Sanitation is the only treatise currently available combining fundamental knowledge, recommendations for design, evaluations of performance, and future prospects for this application. Water and wastewater treatment professionals, water utility employees, governmental regulators, and chemists will find this book an essential and unique reference for a technology which has received growing regulatory acceptance.

The World of White Water Willy Conley,2021-10-02 In The World of White Water, Willy Conley is a capable, energetic, and sometimes humorous guide, inviting us to share in his experience of the Deaf and hearing worlds, showing us how these worlds co-exist and collide. Combining the powers of ASL and English, Conley navigates the swirling 'white water' of these poems using precise and striking images to share his thoughtful observations. You'll want to read this book from cover to cover, and return often to savor your favorite discoveries. Helen Frost, author of All He Knew The deaf eye, to paraphrase the deaf poet David Wright describing his own work, typically makes eye music of language. In Conley's hands, however, the deaf eye captures nearly photographic imagery. The depiction of a deaf child riding his pedal car through a puzzling world of suburban household objects stops cold on an image of sidewalk snow melted by rock salt. Raucous boys filling a skateboard park with leaping / testosterone are caught as though in mid-leap by Conley's camera at the moment a little girl rolls in nonchalantly / on a pink Razor scooter. Some of the verse collected here is rendered in American Sign Language mentalese that may surprise some readers, but much of it focuses, instead, on using the English language to take achingly beautiful stills. Edna Sayers, editor of Outcasts and Angels: The New Anthology of Deaf Characters in Literature This delightful collection of poems by Willy Conley-a deaf man who is also a poet, an actor, a teacher, and a father-offers up poignant insights with clarity and humor. The poems are a pleasure to read for their own sake, but for hearing people like myself, they also provide a window into the lived experience of a person with hearing loss, with all its frustrations and its compensations.
