American Cars, 1946-1959 J. "Kelly" Flory, Jr.,2008-11-24 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the Forward Look Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

American 'Independent' Automakers Norm Mort,2010-09-15 The independent automakers who had survived the depression of the 1930s had flexibility and enough capital from the war to be the first to launch all-new models for a car starved nation. So lucrative was the American post-war car market that new automobile companies were also formed to cash in on the pent-up demand for new cars. This is their story told through text and the use of contemporary brochures, period literature, factory photos, road test info and over 90 new, unpublished color photos of restored examples to relate the importance of these historic vehicles.

Lost Car Companies of Detroit Alan Naldrett, 2016 Among more than two hundred auto companies that tried their luck in the Motor City, just three remain: Ford, General Motors and Chrysler. But many of those lost to history have colorful stories worth telling. For instance, J.J. Cole forgot to put brakes in his new auto, so on the first test run, he had to drive it in circles until it ran out of gas. Brothers John and Horace Dodge often trashed saloons during wild evenings but used their great personal wealth to pay for the damage the next day (if they could remember where they had been). David D. Buick went from being the founder of his own leading auto company to working the information desk at the Detroit Board of Trade. Author Alan Naldrett explores these and more tales of automakers who ultimately failed but shaped the industry and designs putting wheels on the road today--Publisher website.

Scenes from an Automotive Wonderland Gregory A. Cagle, 2018-01-23 Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle's Iloca Rapid-B 35mm camera--not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle's personal anecdotes.

Jeep Patrick R. Foster, 2020-01-14 The definitive, fully illustrated celebration of an auto manufacturer that paved its own way by going off-road is now updated to celebrate Jeep's 80th anniversary. Few American vehicles, or vehicles made anywhere else in the world for that matter, are as universally iconic as the Jeep. From olive drab WWII military relics to the beloved Wrangler with its rear-mounted spare tire, open-air design, and telltale roll cage, the Jeep is a true classic. In *Jeep: Eight Decades from Willys to Wrangler*, automotive writer Patrick R. Foster chronicles Jeep vehicle design and production from the beginning of World War II to present. Beginning with the Jeep as a crucial component of the American war fleet, Foster expertly recounts the corporate shifts, financial struggles and successes, close calls, and, above all, the enduring machines that have carried Jeep from the early 1940s to its triumphant role as a modern-day embodiment of American perseverance. More than 200 color and black-and-white historical photos and period advertisements complement his expertly written narrative of Jeep's entire history, now updated to include five years of new model editions and prototypes, its return to the pickup market, and recent stunning marketplace successes. The resulting book reminds us that sometimes the road less traveled was just waiting for the right truck.
