Thunder God Paul Watkins,2014-08-07 A gripping, acclaimed action-packed Viking epic.Set in the 10th century, when Viking raids were at their peak, Paul Watkins spins a tale that covers three continents. After centuries of ranging unchecked across the northern world, the fortunes of the Vikings have begun to turn. In this time of violent change, a young man, struck by lightning, is believed to be marked by the gods as a keeper of the Norse religion's greatest secret. To save the Norse faith and himself, he embarks upon a journey that takes him far beyond the boundaries of the known world, where he must confront not only his own gods but the gods of a people yet more savage.'Few contemporary novelists have the ability to grab readers by the throat with such intense story-telling power and not release them until the final page has been turned.' Sunday Times

Thunder Gods Hatsuho Naitō,1989 Thunder Gods is the compelling first-hand account of the pilots who pledged themselves to die for their emperor in the closing days of the Pacific War. Known to the world as kamikaze-divine wind-their suicide attacks on American naval forces caused panic and disruption, but they were bourn out of the desperation of the Imperial Command, determined to avoid the shame of surrender at any cost. Using as a rationale the loudly proclaimed belief that suicide attacks by Japanese pilots attested to the spiritual righteousness of Japan's struggle, the Command's exhortations convinced legions of young men of the virtue of bombs were constructed whose only guiding mechanism was their human cargo. The pilots are the thunder gods of the title, and this is the first time they have told their own story.

Grammaticalization Paths of English and High German Existential Constructions Simone E. Pfenninger,2009 Existential constructions are a fundamental feature of many Indo-European languages, and constructions with non-referential subjects have developed in all of the latter, albeit at different stages in their histories. High German does not feature a prototypical existential construction that is equivalent in syntactic and pragmatic function and semantic meaning to the English existential there-construction. How did a prototypical existential structure originate in English? Why is it that High German has never developed such a construction? Has it ever shown a tendency towards developing one? How did two closely related languages such as English and High German come to differ so much with respect to these constructions? By means of investigating a variety of historical and contemporary data this study shows that not only semantic, pragmatic and syntactic factors are involved, which decide the choice of a certain construction, but also very much the more general different linguistic development that the two languages underwent in the course of time.
