Humanizing Artificial Intelligence Luca M. Possati, 2023-10-04 What does humankind expect from AI? What kind of relationship between man and intelligent machine are we aiming for? Does an AI need to be able to recognize human unconscious dynamics to act for the best of humans—that best that not even humans can clearly define? Humanizing AI analyses AI and its numerous applications from a psychoanalytical point of view to answer these questions. This important, interdisciplinary contribution to the social sciences, as applied to AI, shows that reflecting on AI means reflecting on the human psyche and personality; therefore conceiving AI as a process of deconstruction and reconstruction of human identity. AI gives rise to processes of identification and de-identification that are not simply extensions of human identities—as post-humanist or trans-humanist approaches believe—but completely new forms of identification. Humanizing AI will benefit a broad audience: undergraduates, postgraduates and teachers in sociology, social theory, science and technology studies, cultural studies, philosophy, social psychology, and international relations. It will also appeal to programmers, software designers, students, and professionals in the sciences.

Toasting Tina Evan Marshall, 2004-10-01 When a romance authors' convention turns deadly, literary agent Jane Stuart finds herself cast as suspect and sleuth. . . Tina Vale, the new vice president and publisher of Corsair Books, made more than a few enemies as she slept and schemed her way to the top. Now Tina has a score to settle with Jane Stuart. Nearly twenty years ago, Jane married Tina's former lover. Now that Tina's in charge, she aims to make Jane pay by canceling her client's million-dollar contract. As the local hotel struggles to accommodate the annual RAT (Romance Authors Together) convention and a cat show, Jane tries to conduct business, win Winky a ribbon, and come to terms with Tina's bombshell. But soon she has even more on her plate. When Tina fails to show up for her own awards ceremony, she is found dead in her bath, electrocuted with one of her prized antique toasters. There are nearly too many suspects to count, but chief among them is Jane herself. And so, with the reluctant blessing of her boyfriend, police detective Stanley Greenberg, she begins to unravel the mysteries behind Tina's many enemies. . . and find out which one hated her enough to kill. . . Toasting Tina is a cozy in every sense of the word and it is the perfect book to curl up with. —I Love a Mystery Sparkling.—Publishers Weekly

The Toy Collector James Gunn, 2010-07-06 A tragicomic novel about nostalgia, addiction, and 1970s action figures. The Toy Collector is a wickedly funny portrait of a young man who sells stolen pharmaceuticals to finance his growing addiction to memorabilia. An orderly at a Times Square hospital, he buys his toys at exorbitant prices, searching the familiar tacky plastic in a perverse effort to avoid adulthood. As the story switches from the make-believe world he creates with his childhood friends—populated by Scrunch-Em, Grow-Em Dinosaurs and toy robots—to the grown-up pleasures of sex, drugs and alcohol, James falls in and out of love, and stumbles through New York City in search of dubious redemption.

From Animals to Robots and Back: Reflections on Hard Problems in the Study of Cognition Jeremy L. Wyatt, Dean D. Petters, David C. Hogg, 2014-07-10 Cognitive Science is a discipline that brings together research in natural and artificial systems and this is clearly reflected in the diverse contributions to *From Animals to Robots and Back*. In tribute to Aaron Sloman and his pioneering work in Cognitive Science and Artificial Intelligence, the editors have collected a unique collection of cross-disciplinary papers that include work on: • intelligent robotics; • philosophy of cognitive science; • emotional research • computational vision; • comparative psychology; and • human-computer interaction. Key themes such as the importance of taking an architectural view in approaching cognition, run through the text. Drawing on the expertise of leading international researchers, contemporary debates in the study of natural and artificial cognition are addressed from complementary and contrasting perspectives with key issues being outlined at various levels of abstraction. *From Animals to Robots and Back*, will give readers with backgrounds in the study of both natural and artificial cognition an important window on the state of the art in cognitive systems research.

Techno Fantasies Alan Bunkum, 2005 Charts toy robot design of the last half of the 20th century and explores Japanese aesthetics in tinplate toys, especially robots. Over 200 photographs and original conceptual drawings illustrate this fascinating history. Robotic manufacturers such as Tomy, Horikawa, Waco, and Sony are just a few of the Japanese manufacturers whose robotic designs are featured here. Captions provide much relevant information, including date, size, manufacturer, and current values. An important book for historians, collectors, designers, and students of Japanese studies and popular culture in the golden age of toy production.

Television Introductions Vincent Terrace, 2013-11-07 Since the beginning of network television, many shows have been preceded by an opening announcement or a theme song that served various purposes. In *Television Introductions: Narrated TV Program Openings*, Vincent Terrace has assembled openings for more than 900 television shows of the past seven decades. The only documented history of narrated television program introductions, this volume is arranged by various types of programming, such as comedies, dramas, westerns, game shows, soap operas, and children's shows. In addition to quoting the opening material, entries include information about each show's network history, years of broadcast, and show type. Many entries also include descriptions of the show, the names of announcers, and a list of main cast members. A comprehensive resource for researchers and pop culture aficionados alike, *Television Introductions* provides a fascinating look at this neglected part of TV history.

Thinking Outside the Box Gary R. Edgerton, Brian Geoffrey Rose, 2005-01-01 *Thinking Outside the Box* brings together some of the best and most challenging scholarship about TV genres, exploring their genesis, their functions and development, and the interaction of disparate genres. The authors argue that genre is a process rather than a static category and that it signifies much about the people who produce and watch the shows. In addition to considering traditional genres such as sitcoms, soap operas, and talk shows, the contributors explore new hybrids, including reality programs, teen-oriented science fiction, and quality dramas, and examine how many of these shows have taken on a global reach. Identifying historical continuities and envisioning possible trends,

this is the richest and most current study of how television genres form, operate, and change.

Wonky, 6 8 robotics, school friendship Darcy Pattison, 2018-09-08 Kirkus Review: . . . offbeat and clever. . . . With pages filled with animals and robots, this tale will certainly appeal to kids; the story of friendship conquering first-day-of-school jitters remains a bonus. Howie ambles into robot club hoping to find a friend. But when Lincoln bounds into the room, Howie hides. The strange new bird is too big and fluffy. The teacher, however, puts the unlikely pair together. Will they be able to accept each other's wonky ideas and become friends? For STEM classes, this story emphasizes the discussion of form v. function. The story encourages divergent thinking as Lincoln and Howie design a robot. For kids who are rigid and inflexible, they'll see the value of considering different options, and accepting those who are different. For kids who love robots that transform, cyber robots, and deceptive robots.

Robotic Vision: Technologies for Machine Learning and Vision Applications Garcia-Rodriguez, Jose, 2012-12-31 Robotic systems consist of object or scene recognition, vision-based motion control, vision-based mapping, and dense range sensing, and are used for identification and navigation. As these computer vision and robotic connections continue to develop, the benefits of vision technology including savings, improved quality, reliability, safety, and productivity are revealed. Robotic Vision: Technologies for Machine Learning and Vision Applications is a comprehensive collection which highlights a solid framework for understanding existing work and planning future research. This book includes current research on the fields of robotics, machine vision, image processing and pattern recognition that is important to applying machine vision methods in the real world.

Future Toys Antoni Emchowicz, Paul Nunneley, 1999 A guide to collecting space toys featuring descriptions of over 400 toys manufactured from the nineteen-fifties to the present.

Robot on the Loose #11 Henry Winkler, Lin Oliver, 2018-02-06 Hank, the star of the bestselling easy-to-read series, is back! This time, he has to learn the nuts and bolts of making a robot--and making a friend! Hank's school is hosting its first-ever Build-a-Robot competition and Hank is ready to win. There's just one problem: he completely forgot about the contest! While other kids have been working on their robots for a month, Hank has just two days to create an amazing robot that will wow the judges and win him the trophy. To make matters worse, there might be another problem, too. Hank has no idea how to build a robot! With help from Jaden, a robot expert at his school, Hank and his friends construct their robot, Stanley, just in time. But on the day of the competition, Stanley malfunctions! It will take Hank, Frankie, Ashley, and their new friend Jaden to get it back on track. Forget winning the trophy--Hank has to stop a robot on the loose!

Robot Overlords Mark Stay, 2015-02-12 Three years ago, Earth was conquered by a force of robots from a distant world. They have one rule: STAY IN YOUR HOMES Step outside and you get one warning before you're vaporised by a massive robot Sentry, or a crawling Sniper, or a flying Drone. That's if the vast Cube doesn't incinerate you first. But Sean Flynn is convinced that his father - an RAF pilot who fought in the war - is still alive. And when he and his gang figure out a way to break the robots' curfew, they begin an adventure that will pit them against the might of the ROBOT OVERLORDS. This fast-paced, thrilling novelisation is based on the hit British film starring Sir Ben Kingsley (IRON MAN THREE), Gillian Anderson (THE X-FILES) and Callan McAuliffe (THE GREAT GATSBY). A perfect companion to the movie, it expands on the story with additional action, characters, and a special peek behind the scenes.

Pratiquer les cyberpsychothérapies Serge Tisseron, Frédéric Tordo, 2022-03-16 Cet ouvrage présente de manière concrète la pratique de l'utilisation des jeux vidéo, de la réalité virtuelle et des robots en psychothérapies. Chacune des trois parties aborde la question : du cadre (ex. quel cadre mettre en place quand on utilise la Réalité Virtuelle en clinique ?), de la technique (ex. quelle technique avec le jeu vidéo ?), de la dynamique de la relation avec le thérapeute et du transfert (ex. quels types de transfert en Robothérapie ?). Les principaux courants de pratiques sont représentés (psychodynamique, cognitivo-comportemental, hypnothérapeutique, etc.). L'ensemble des 25 chapitres comprend une section "résumé" pour que le praticien et l'étudiant trouvent rapidement l'essentiel de ce qu'ils doivent retenir. Par ailleurs, de nombreuses vignettes cliniques viennent illustrer la pratique thérapeutique avec ces technologies, dans un contexte institutionnel ou libéral.

The Boxing Scene Thomas Hauser, 2009 Thomas Hauser has been called "one of boxing's greatest writers. The Boxing Scene, Hauser's provocative new anthology, contains all of his trademark insights and candor as he peels away layers of hypocrisy to reveal the men who make up the contemporary boxing landscape. Hauser exposes the inner workings of HBO Sports; examines the phenomenon of mixed martial arts as it relates to boxing; and records the amusing encounter between his 81-year-old mother and larger-than-life boxing impresario Don King. The Boxing Scene also updates Hauser's personal and professional thoughts on superstars like Oscar De La Hoya, Floyd Mayweather Jr., Ricky Hatton, Miguel Cotto, and Bernard Hopkins as well as fight promoter Bob Arum, announcer Bob Sheridan and a host of others. The Boxing Scene recreates another year in professional boxing and adds to Hauser's definitive record of the sport.
