Ancient Wine Patrick E. McGovern,2019-10-01 A richly illustrated account of the story of ancient viniculture The history of civilization is, in many ways, the history of wine. This book is the first comprehensive account of the earliest stages of the history and prehistory of viniculture, which extends back into the Neolithic period and beyond. Elegantly written and richly illustrated, Ancient Wine opens up whole new chapters in the fascinating story of wine by drawing on recent archaeological discoveries, molecular and DNA sleuthing, and the writings and art of ancient peoples. In a new afterword, the author discusses exciting recent developments in the understanding of ancient wine, including a new theory of how viniculture came to central and northern Europe.

Uncorking the Past Patrick E. McGovern,2009-10-30 In a lively gastronomical tour around the world and through the millennia, Uncorking the Past tells the compelling story of humanity's ingenious, intoxicating search for booze. Following a tantalizing trail of archaeological, chemical, artistic, and textual clues, Patrick E. McGovern, the leading authority on ancient alcoholic beverages, brings us up to date on what we now know about the creation and history of alcohol, and the role of alcohol in society across cultures. Along the way, he integrates studies in food and sociology to explore a provocative hypothesis about the integral role that spirits have played in human evolution. We discover, for example, that the cereal staples of the modern world were probably domesticated in agrarian societies for their potential in fermenting large quantities of alcoholic beverages. These include the delectable rice wines of China and Japan, the corn beers of the Americas, and the millet and sorghum drinks of Africa. Humans also learned how to make mead from honey and wine from exotic fruits of all kinds: even from the sweet pulp of the cacao (chocolate) fruit in the New World. The perfect drink, it turns out-whether it be mind-altering, medicinal, a religious symbol, liquid courage, or artistic inspiration-has not only been a profound force in history, but may be fundamental to the human condition itself. This coffee table book will sate the curiosity of any armchair historian interested in the long history of food and wine.

The Origins and Ancient History of Wine Patrick E. McGovern,Stuart J. Fleming,Solomon H. Katz,2003-09-02 This volume presents contemporary evidence scientific, archaeological, botanical, textual, and historical for major revisions in our understanding of winemaking in antiquity. Among the subjects covered are the domestication of the Vinifera grape, the wine trade, the iconography of ancient wine, and the analytical and archaeological challenges posed by ancient wines. The essayists argue that wine existed as long ago as 3500 BC, almost half a millennium earlier than experts believed. Discover named these findings among the most important in 1991. Featuring the work of 23 internationally known scholars and writers, the book offers the first wide ranging treatment of wine in the early history of western Asia and the Mediterranean. Comprehensive and accessible while providing full documentation, it is sure to serve as a catalyst for future research.

Tasting the Past Kevin Begos,2019-06-04 A vintner’s blend of science, history, travel, and tantalizing drink recommendations. --Amy Stewart, author of The Drunken Botanist In search of a mysterious wine he once tasted in a hotel room minibar, journalist Kevin Begos travels along the original wine routes—from the Caucasus Mountains, where wine grapes were first domesticated eight thousand years ago, crossing the Mediterranean to Europe, and then America—and unearths a whole world of forgotten grapes, each with distinctive tastes and aromas. We meet the scientists who are decoding the DNA of wine grapes, and the historians who are searching for ancient vineyards and the flavors cultivated there. Begos discovers wines that go far beyond the bottles of Chardonnay and Merlot found in most stores and restaurants, and he offers suggestions for wines that are at once ancient and new.

Fear and Loathing on the Campaign Trail '72 Hunter S. Thompson,2012-06-26 A political journalist presents his frankly subjective observations on the personalities and political machinations of the 1972 presidential campaign.

Tasting the Past Kevin Begos,2018-06-12 “A myth-busting, history-reclaiming, science-centric, skeptical—and yet loving and respectful—tour of the history, the present, and even the future of wine production.” —Cat Warren, author of What the Dog Knows “This is quite a book and I hope it is read widely throughout the wine world and that it has a huge impact. The fact that current practices have put a halt to evolution for wine grapes, that was news to me. Tasting the Past shocked the hell out of me.” —Kermit Lynch, wine merchant and author of Adventures on the Wine Route Discover the hidden life of wine. After a chance encounter with an obscure Middle Eastern red, journalist Kevin Begos embarks on a ten-year journey to seek the origins of wine. What he unearths is a whole world of forgotten grapes, each with distinctive tastes and aromas, as well as the archaeologists, geneticists, chemists—even a paleobotanist—who are deciphering wine down to molecules of flavor. We meet a young scientist who sets out to decode the DNA of every single wine grape in the world; a researcher who seeks to discover the wines that Caesar and Cleopatra drank; and an academic who has spent decades analyzing wine remains to pinpoint ancient vineyards. Science illuminates wine in ways no critic can, and it has demolished some of the most sacred

dogmas of the industry: for example, well-known French grapes aren't especially noble. We travel with Begos along the original wine routes—starting in the Caucasus Mountains, where wine grapes were first domesticated eight thousand years ago; then down to Israel and across the Mediterranean to Greece, Italy, and France; and finally to America where vintners are just now beginning to make distinctive wines from a new generation of local grapes. Imagine the wine grape version of heirloom vegetables or craft beer, or better yet, taste it: Begos offers readers drinking suggestions that go far beyond the endless bottles of Chardonnay and Merlot found in most stores and restaurants. In this viticultural detective story wine geeks and history lovers alike will discover new tastes and flavors to savor.

The Glass of Wine James F. Shackelford, Penelope L. Shackelford, 2017-12-08 The first book to focus on the role of glass as a material of critical importance to the wine industry For centuries glass has been the material of choice for storing, shipping, and sipping wine. How did that come to pass, and why? To what extent have glassmaking and wine making co-evolved over the centuries? The first book to focus on the role of glass as a material of critical importance to the wine industry, *The Glass of Wine* answers these and other fascinating questions. The authors deftly interweave compelling historical, technical, and esthetic narratives in their exploration of glass as the vessel of choice for holding, storing, and consuming wine. They discuss the traditions informing the shapes and sizes of wine bottles and wine glasses, and they demystify the selection of the right glass for red versus white varietals, as well as sparkling and dessert wines. In addition, they review the technology of modern glassmaking and consider the various roles glass plays in wineries—especially in the enologist's laboratory. And they consider the increasing use of aluminum and polymer containers and its potential impact on the central role of glass as the essential material for wine appreciation. The first book focusing on the role of glass and its central importance to the wine industry Written by a glass scientist at UC Davis, home of the premier viticulture and enology program in North America Interlards discussions of the multi-billion-dollar glass and wine industries with valuable technical insights for scientists, engineers, and wine enthusiasts alike Illustrates the wide spectrum of bottles, carafes, decanters, and drinking glasses with an abundance of exquisite full-color photos Both an authoritative guide and a compelling read, *The Glass of Wine* tells the story of the centuries-old marriage between an endlessly fascinating material and a celebrated beverage. It is sure to have enormous appeal among ceramic and glass professionals, wine makers, and oenophiles of all backgrounds.

Divine Vintage Randall Heskett, Joel Butler, 2012-11-13 An exploration of wine culture from biblical periods illuminates such topics as the use of wine in religious rites, wine's birthplace at the Fertile Crescent, and the significance of Jesus' water-to-wine miracle.

The Shape of Wine Henry H. Work, 2018-07-18 Grape wine has been produced for at least 4,000 years, having been aged, stored and transported in every conceivable type of vessel. Its seductiveness has been enhanced by this packaging: primarily three strikingly different containers – amphorae, wooden barrels and glass bottles. Henry H. Work brings extensive wine experience as a cooper, working with wine barrels and living in California's Napa Valley to provide a richly detailed and vivid account of wine containers through the ages. This book delves into the history, evolution, and present use of containers, vessels, and stoppers; from animal skin sacks to barrels, from glass bottles to upstart packaging such as wine casks, and even aluminium cans. It considers the advantages and weaknesses of their construction, designs and labels, methods of shipment and storage, as well as their impact on marketing wine to customers. This is an enlightening and innovative read which draws on the most current archaeological research, scientific data and wine business trends. It is richly peppered throughout with the author's own visits to many of the locations explored in the book, bringing history to life. This book will appeal to individuals within the wine industry, undergraduates in the fields of history, archaeology, food and hospitality, as well as all people interested in wine.

Nezami Ganjavi and Classical Persian Literature Kamran Talattof, 2022-09-28 This book offers new insights into the twelfth-century Persian poet Nezami Ganjavi. Challenging the dominant interpretation of Nezami's poetry as the product of mysticism or Islam, this book explores Nezami's literary techniques such as his pictorial allegory and his profound conceptualization of poetry, rhetoric, and eloquence. It employs several theoretical and methodological approaches to clarify the nature of his artistic approach to poetry. Chapters explore Nezami's understanding of rhetoric and literature as Sakhon, his interest in literary genres, the diversity of themes explored in his Five Treasures, the sources of Nezami's creativity, and his literary devices. Exploring themes such as love, religion, science, wine, gender, and philosophy, this study compares Nezami's works to other giants of Persian poetry such as Ferdowsi, Jami, Rudaki, and others. The book argues that Nezami's main concern was to weave poetry rather than to promote any specific ideology.

Methods in Ancient Wine Archaeology Emlyn Dodd, Dimitri Van Limbergen, 2024-02-08 Bringing together a wide array of modern scientific techniques and interdisciplinary approaches, this book provides an accessible guide to the methods that form the current bedrock of research into Roman, and more broadly ancient, wine. Chapters are arranged into thematic sections, covering biomolecular archaeology and chemical analysis, archaeobotany and palynology, vineyard and landscape archaeology and computational and experimental archaeology. These include discussions of some of the most recent techniques, such as ancient DNA and organic residue analyses, geophysical prospection, multispectral imaging and spatial and climatic modelling. While most of the content is of direct relevance to the Roman Mediterranean, the assortment of detailed case studies, methodological outlines and broader 'state of the field' reflections is of equal use to researchers working across disparate disciplines, geographies, and chronologies. The study of ancient Roman wine has been dominated until recently by traditional archaeological analyses focused upon production facilities and ceramic evidence related to transport. While such architecture and artefact-focussed approaches provide a fundamental foundation for our understanding of this topic, they fail to provide the requisite nuance to answer other questions regarding grape cultivation and wine production, consumption, use and trade. As the first compendium of its kind, this book supports the embedding of modern scientific and experimental techniques into archaeological fieldwork, research and laboratory analysis, pushing the boundaries of what questions can be explored, and serving as a launching point for future avenues of interdisciplinary research.

Proportional Representation in Presidential Nominating Politics Paul Theodore David, James W. Ceaser, 1980 This work examines the proportional representation in presidential nominating politics.
