Entwicklung einer Roadmap für den globalen SAP System-Rollout in der Wirtgen Group Johannes Voigt, 2008-11 Diplomarbeit aus dem Jahr 2007 im Fachbereich BWL - Unternehmensführung, Management, Organisation, Note: 1,3, Hochschule Koblenz, Veranstaltung: Organisation/Wirtschaftsinformatik, 36 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Die Herausforderungen eines zunehmend vernetzten Weltmarktes verlangen von weltweit agierenden Konzernen und Unternehmen flexible IT Strukturen, um Menschen, Informationen und Geschäftsprozesse über technische und organisatorische Grenzen hinweg zu verbinden. Nur so ist es möglich, ein effizientes Agieren, eine hohe Produktivität und globale Wettbewerbsfähigkeit zu gewährleisten. SAP bietet als weltweit führender Hersteller betriebswirtschaftlicher Standardsoftware eine Möglichkeit zur Realisierung der übergeordneten Ziele. Daher verwundert es nicht, dass in der jüngeren Vergangenheit die Anzahl internationaler SAP-Projekte rasant zugenommen hat. Die Komplexität solcher Projekte mit globalem, multinationalem Charakter ist allerdings weitaus höher, als die eines nationalen SAP-Einführungsprojekts. Die Vorgehensweise eines globalen SAP System-Rollout erfordert die Auseinandersetzung mit sehr spezielle technisch-organisatorische Herausforderungen in der Projektarbeit, sowie sozio-emotionale Problemstellungen, die sich durch einen Wandel der Strukturen und Arbeitsweisen für die betroffenen Mitarbeiter ergeben. In der vorliegenden Diplomarbeit soll durch die Entwicklung einer spezifischen Roadmap ein konkreter Vorschlag zur effizienten Bewältigung und Umsetzung eines globalen SAP System-Rollout in einer weltweit operierenden Unternehmensgruppe (Wirtgen Group) unterbreitet werden.

How International Law Works in Times of Crisis George Ulrich, Ineta Ziemele, 2019-09-19 For some time, the word 'crisis' has been dominating international political discourse. But this is nothing new. Crisis has always been part of the discipline of international law. History indeed shows that international law has developed through reacting to previous experiences of crisis, reflecting an agreement on what it takes to avoid their repetition. However, human society evolves and challenges existing rules, structures, and agreements. International law is confronted with questions as to the suitability of the existing legal framework for new stages of development. Ulrich and Ziemele here bring together an expert group of scholars to address the question of how international law confronts crises today in terms of legal thought, rule-making, and rule-application. The editors have characterized international law and crisis discourse as one of a dialectical nature, and have grouped the articles contained in the volume under four main themes: security, immunities, sustainable development, and philosophical perspectives. Each theme pertains to an area of international law which at the present moment in time is subject to notable challenges and confrontations from developments in human society. The surprising general conclusion which emerges is that, by and large, the international legal system contains concepts, principles, rules, mechanisms and formats for addressing the various developments that may prima facie seem to challenge these very same elements of the system. Their use, however, requires informed policy decisions.
