Theory of Light Scattering in Condensed Matter Bernard Bendow,2012-12-06 The First Binational USA-USSR Seminar-Symposium on the Theory of Light Scattering in Condensed Matter was held in Moscow 26-30 May 1975. The initial conception for a light scattering seminar of about fifty scientists - half from each side, including theorists and experimenters well versed in theory - arose from discussions between Professor J. L. Birman and Professor K. K. Rebane at the 1971 Paris International Conference on Light Scattering in Solids. This conception won approval among the active scientists on both sides. After considerable planning and some delays, it received both material support and encouragement from the appropriate organizations on each side: in the USA: The National Science Foundation (Division of International Programs), and the National Academy of Sciences; in the USSR: the Academy of Sciences USSR. A variety of reasons contributed to the positive response on both sides: for example, the considerable and high level of theoretical and experimental scientific activity on both sides in laser-related light scattering, optics, and generally - electro dynamics of condensed media - some along rather similar lines; the impediments to free and easy communication and travel between USA and USSR scientists working on related problems; plus the desire to improve both contacts, and the free flow of information and individuals, to the mutual advantage of both sides.

A Meeting of Minds Judith Skelton Grant,2015-10-06 Opened in 1963, Massey College is a residential college for graduate students at the University of Toronto. The college was the brainchild of Vincent Massey, Canada's first native-born Governor General, who wanted to create an intellectually stimulating milieu like the one he associated with the long-established colleges of Oxford and Cambridge. Massey College's first master was the legendary Canadian novelist, playwright, and editor, Robertson Davies. Davies and his successors - Patterson Hume, Ann Saddlemeyer, and John Fraser - fostered a dynamic community of students, scholars, and public intellectuals that thrives today under the mastership of Hugh Segal. Written by Judith Skelton Grant, *A Meeting of Minds* is the definitive account of the college's first fifty years, its many traditions, and the hundreds of fellows who have passed through its halls. Full of wonderful anecdotes about the college's notable fellows and alumni, this history of Massey College takes the reader into the heart of one of Canada's most important intellectual institutions.

Essential Rainwater Harvesting Rob Avis,Michelle Avis,2018-12-11 Design a rainwater harvesting system for any home in any climate. Water is a crucial resource increasingly under stress. Yet rainfall, even in arid climates, can make up a sizable portion of any home, acreage, or farm's water requirements if harvested and utilized with care. The key is appropriate planning and high-quality site- and climate-specific design. *Essential Rainwater Harvesting* is a comprehensive manual for designing, building, and maintaining water harvesting systems for the warm and cold climates of the world. Presenting design considerations and approaches for the most common household rainwater supply scenarios - primary, supplemental, and off-grid supply - this step-by-step approach covers: Considerations for full-property water security Demand planning and conservation strategies Supply calculations and design implications for extreme rainfall and drought Materials selection and water quality System and site assessment Sizing and design of gutters, conveyance, tanks, and pumps Pre-filtration, filtration, and disinfection options System maintenance and upkeep This practical resource provides DIYers, trades, and rainwater practitioners with the essential tools, methods, and technical know-how to design, build, and maintain rainwater harvesting systems anywhere. Rob Avis, P.Eng and Michelle Avis, P.Eng own and operate Adaptive Habitat, a leading edge property design firm for resilient homes, acreages, and farms and Verge Permaculture, a globally recognized award-winning education business. They have over 20 years of combined experience in project management, ecological design, and sustainable technologies, which they share at vergepermaculture.ca from their suburban house and yard that they've transformed into a model of cold climate urban permaculture in Calgary, Alberta.

Twin-Control Mikel Armendia,Mani Ghassempouri,Erdem Ozturk,Flavien Peysson,2019-01-05 This open access book summarizes the results of the European research project “Twin-model based virtual manufacturing for machine tool-process simulation and control” (Twin-Control). The first part reviews the applications of ICTs in machine tools and manufacturing, from a scientific and industrial point of view, and introduces the Twin-Control approach, while Part 2 discusses the development of a digital twin of machine tools. The third part addresses the monitoring and data management infrastructure of machines and manufacturing processes and numerous applications of energy monitoring. Part 4 then highlights various features developed in the project by combining the developments covered in Parts 3 and 4 to control the manufacturing processes applying the so-called CPSs. Lastly, Part 5 presents a complete validation of Twin-Control features in two key industrial sectors: aerospace and automotive. The book offers a representative overview of the latest trends in the manufacturing industry, with a focus on machine tools.

Syntactic Features and the Limits of Syntactic Change Jóhannes Gísli Jónsson,Thórhallur Eythórsson,2021-02-26 This volume brings together the latest diachronic research on syntactic features and their role in restricting syntactic change. The chapters address a central theoretical issue in diachronic syntax: whether syntactic variation can always be attributed to differences in the features of items in the lexicon, as the Borer-Chomsky conjecture proposes. In answering this question, all the chapters develop analyses of syntactic change couched within a formalist framework in which rich hierarchical structures and abstract features of various kinds play an important role. The first three parts of the volume explore the different domains of the clause, namely the C-domain, the T-domain and the ?P/VP-domain respectively, while chapters in the final part are concerned with establishing methodology in diachronic syntax and modelling linguistic correspondences. The contributors draw on extensive data from a large number of languages and dialects, including several that have received little attention in the literature on diachronic syntax, such as Romeyka, a Greek variety spoken in Turkey, and Middle Low German, previously spoken in northern Germany. Other languages are explored from a fresh theoretical perspective, including Hungarian, Icelandic, and Austronesian languages. The volume sheds light not only on specific syntactic changes from a cross-linguistic perspective but also on broader issues in language change and linguistic theory.

Female entrepreneurs Teresa Alarcos,2022-02-09 We promote the existence of more women in the entrepreneurial world and this book written by Teresa is groundbreaking and timely. HANNAH F. BUCHAN, Hunter Global Investors L.P. When female entrepreneurial talent is abundant, but success stories are so few that it begs the question of where the ecosystem is failing. [...] This book provides an important vision of the critical aspects of digital entrepreneurship. PILAR MANCHÓN, Sr. Director, Artificial Intelligence Google, Silicon Valley The patience and constant resistance with which women have endured the macho structure of society for so long is admirable. Teresa Alarcos has written a good book full of interest on how the new digital society can correct this discrimination forever. I advise reading it urgently and with respect. ANTONIO GARRIGUES WALKER, Honorary president of Garrigues This book will inspire us and will motivate more and more of us to create a legacy that we will be proud to leave our children. CHRISTINA GERAKITEYS, Co-CEO SingularityU Australia Teresa Alarcos has written a very successful book from the heart, in which she shows in a solid and didactic way how a startup is created. ANTONIO COLINO, President of the Royal Academy of Engineering Teresa's book highlights bold and confident female entrepreneurs who are paving the way for others. By leveraging their knowledge and networks, these entrepreneurs are identifying opportunities, understanding potential clients and following their passion to do good. These women are true game changers. ANI L. Design for Water Heather Kinkade-Levario,2007-06-01 A guide to alternate water collection for green new developments, aimed at conserving water and reusing it wisely. In an era of dwindling resources, water is poised to become the new oil as the entire world now faces the reality of a decreasing supply of clean water. To avert a devastating shortage, we must not only look at alternate water sources for existing structures, we must also plan our new developments differently. *Design for Water* is an accessible and clearly written guide to alternate water collection, with a focus on rainwater harvesting in the urban environment. The book: outlines the process of water collection from multiple sources—landscape, residential, commercial, industrial, school, park and municipal systems provides numerous case studies details the assembly and actual application of equipment includes specific details, schematics and references All aspects of rainwater harvesting are outlined, including passive and active system set-up, storage, stormwater reuse, distribution, purification, analysis and filtration. There is even a section on rainwater harvesting for wildlife. In addition to rainwater, there are several affordable and accessible alternate sources, including cooling tower bleed-off water, air conditioning condensate, gray water, and fog collection. *Design for Water* is geared to providing those making development decisions and guidelines with the information they need to set up passive harvesting techniques. The book will especially appeal to engineers, landscape architects, municipal decision-makers, developers and land-owners.

Passive Solar Architecture David Bainbridge,Ken Haggard,2011-08-18 New buildings can be designed to be solar oriented, naturally heated and cooled, naturally lit and ventilated, and made with renewable, sustainable materials—no matter the location or climate. In this comprehensive overview of passive solar design, two of America’s solar pioneers give homeowners, architects, designers, and builders the keys to successfully harnessing the sun and maximizing climate resources for heating, cooling, ventilation, and daylighting. Bainbridge and Haggard draw upon examples from their own experiences, as well as those of others, of more than three decades to offer both overarching principles as well as the details and formulas needed to successfully design a more comfortable, healthy, and secure place in which to live, laugh, dance, and be comfortable. Even if the power goes off. *Passive Solar Architecture* also discusses “greener” and more-sustainable building materials and how to use them, and explores the historical roots of green design that have made possible buildings that produce more energy and other resources than they use.
