

World Of Warships

Gary Staff

Neptune's Inferno James D. Hornfischer, 2011 The acclaimed, bestselling author of *The Last Stand of the Tin Can Sailors* now delivers a riveting, character-focused narrative of the United States Navy's bloodiest, most pivotal campaign of World War II.

Warships of the Ancient World Adrian K. Wood, 2013-01-20 The world's first war machines were ships built two millennia before the dawn of the Classical world. Their influence on the course of history cannot be overstated. A wide variety of galleys and other types of warships were built by successive civilisations, each with their own distinctive appearance, capability and utility. The earliest of these were the Punt ships and the war galleys of Egypt which defeated the Sea People in the first known naval battle. Following the fall of these civilisations, the Phoenicians built biremes and other vessels, while in Greece the ships described in detail in the 'Trojan' epics established a tradition of warship building culminating in the pentekonteres and triakonteres. The warships of the period are abundantly illustrated on pottery and carved seals, and depicted in inscriptions and on bas-reliefs. The subject has been intensively studied for two and a half millennia, culminating in the contemporary works of authoritative scholars such as Morrison, Wallinga, Rodgers and Casson. To date there are no works covering the subject which are accessible and available to non-academics.

The World's Worst Warships Antony Preston, 2002 A serious study of the reasons why some warships have achieved bad reputations. It covers the period from 1860 to the present day, and looks at a wide range of nationalities and ship-types. Some examples are the Russian Popoffkas; the French battleship 'Brennus'; and the British vessel 'Captain'.

The Picture World of Warships R. J. Stephen, 1990 Describes the structure and the functions of the various kinds of ships used in warfare.

German Battlecruisers of World War One Gary Staff, 2014-11-29 The most comprehensive English-language study of the German Imperial Navy's WWI battlecruisers, fully illustrated with drawings, diagrams and photographs. In this in-depth study, naval historian and author of *Battle on the Seven Seas* Gary Staff presents a full analysis of Imperial Germany's battlecruisers. Known as Panzerkreuzer, the eight ships of this class were involved in several early North Sea skirmishes before their historic victory against the Royal Navy in the Battle of Jutland. Staff details the design and construction of these ships, and traces the full-service history of each one, recounting their actions, largely from first-hand German sources and official documents. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as

well as in dock, where many aspects of their design—as well as damage sustained in action—can be viewed in close up. A superb series of full-color computer graphics show full length profiles and top-down views of each ship in precise and clear detail. *German Battle Cruisers of World War One* presents a major contribution to German naval history in the English language. It is a must-have volume for Great War historians and enthusiasts, as well as battlecruiser modelers.

World War II Warships John Batchelor, 2006-01-01 This fleet of 28 accurately detailed ships includes the ill-fated PT-109, commanded by a young John F. Kennedy, a German U-boat, and the USS Missouri, the battleship on which the Japanese surrendered.

The Encyclopedia of Warships Robert Jackson, 2006 An exhaustive reference which features more than 300 military vessels from World War II to the present day; contains numerous action photographs and detailed illustrations showing every aspect of the featured ships. Includes an extensive service history of each ship and specification panels that provide information of displacement, dimensions, armament, speed, and complement.

Collins/Jane's Warships of World War II Bernard Ireland, 1996

Warships of the World to 1900 Lincoln P. Paine, 2000 Lincoln P. Paine's *SHIPS OF THE WORLD: AN HISTORICAL HISTORICAL ENCYCLOPEDIA* was honored as one of the best reference books of the year by the New York Public Library, and *Library Journal* described it as clearly the most fascinating book of the year. Now, in two equally fascinating new books, Paine focuses on two of the most interesting areas of maritime history: *WARSHIPS OF THE WORLD TO 1900* and *SHIPS OF DISCOVERY AND EXPLORATION*. *WARSHIPS OF THE WORLD TO 1900* traces the history of naval warfare through the stories of more than two hundred of the most famous and important fighting ships, from the earliest triremes and Viking longships to the *Mary Rose*, *Wasa*, *Bonhomme Richard*, *HMS Victory*, *USS Constitution*, *USS Monitor*, and *Mikasa*. Each ship is described in a vivid short essay that captures its personality as well as its physical characteristics, construction, and history, from the drawing board to the scrap yard or museum. Paintings and photographs show the grandeur and grace of these vessels that helped shape world events. An introductory essay, maps, and a chronology offer the reader a global perspective on the course of naval history from antiquity to the present.

Battleships of World War II Peter Hore, 2007 This authoritative reference book charts the development and history of the battleship from the end of World War I, through World War II and up to the present day. This period saw a dramatic change in the role of the battleship as a result of the vastly

Ships of War Edward J. Reed, Edward Simpson, J. D. Jerrold Kelley, 2012-08 The dawn of the modern warship This interesting, illustrated work concerns the considerable variety of ships of war that were designed and launched during the latter part of the nineteenth century. The author takes as his starting point the era of the American Civil War and the time of the emergence of Monitors, ironclads, early submersibles and, indeed, the coming of powered ships which would shortly consign the age of naval sail to history. In warfare there can be no room for sentiment since every nation must be able to bring armaments to bear equal at least to any potential enemy. So on the oceans, just as it was with land armies, the navies of the world raced into the industrial age and machine powered warfare. The new vessels adopted a host of innovations in construction, capability, function, weaponry and ordnance and quickly replaced famous fighting ships of sail and a mode of fighting that had endured for centuries. This overview, covers the period up to 1887 and examines the warships of the world's navies. The expansive text is supported by many line drawings of the vessels described as well as technical and cross section drawings. A number of statistical charts are also included, making this an indispensable reference work for all those interested in naval warfare during the second half of the 19th century. Leona editions are newly typeset and are not facsimiles; each title is available in softcover and hardback with dustjacket; our hardbacks are cloth bound and feature gold foil lettering on their spines and fabric head and tail bands.

Modern Warships Carolyn Bonner, Kit Bonner, 2007-09-15 Since World War II, the nature of sea battles, and of warships, has changed dramatically, reflecting profound changes in the world at large. This book offers a close-up look at what these changes entail, and how they have come into play in regional conflicts in Southeast Asia, in escalating naval hostilities between the Soviet Bloc and the West, and in skirmishes and major engagements in our day. Here are the warships of the Korean conflict, and the larger Cold War that paralyzed much of the world for forty-six years; here are the vertical takeoff and landing aircraft, which, coupled with the new, smaller aircraft carrier, allowed for a nimbler, more flexible force that could respond to the political brushfires of recent years; and here is the aircraft carrier of the twenty-first century, a military city on the sea. With detailed pictures and text, *Modern Warships* tracks the role of warships in a world of increasingly littoral naval conflict, where small nations can possess increasingly advanced technology and super-power dominance has declined. An invaluable resource for the military and naval historian, with many images appearing for the first time, the book offers a unique vantage point on today's maritime affairs.

German Light Cruisers of World War II Gerhard Koop, Klaus-Peter Schmolke, 2014-07-22 "An

immensely interesting look” at the Emden, Königsberg, Karlsruhe, Köln, Leipzig, and Nürnbergships “from drawing board to destiny” (War History Online). The warships of the World War II era German Navy are among the most popular subject in naval history with an almost uncountable number of books devoted to them. However, for a concise but authoritative summary of the design history and careers of the major surface ships it is difficult to beat a series of six volumes written by Gerhard Koop and illustrated by Klaus-Peter Schmolke. Each contains an account of the development of a particular class, a detailed description of the ships, with full technical details, and an outline of their service, heavily illustrated with plans, battle maps and a substantial collection of photographs. These have been out of print for ten years or more and are now much sought after by enthusiasts and collectors, so this new modestly priced reprint of the series will be widely welcomed. This volume is devoted to the six ships from Emden to Nürnberg that were built between the wars. They were primarily intended for commerce-raiding, but the war gave them few opportunities for such employment, although they did provide useful support for key naval operations in the Baltic and North Sea. Two were lost in the 1940 Norway campaign, but the remainder survived for most of the conflict. “A ship-by-ship history of the cruisers. The text is supported by an excellent collection of plans and photographs. Overall this is a very impressive history of a fairly unimpressive set of warships.”—HistoryOfWar.org
