Refractions Frauke Reitemeier,2022 Put simply, refraction describes a change in the direction of light or sound due to a change in the medium the light or sound goes through. Writing a Bachelor’s or Master’s thesis means changing the direction of light shed on a particular text or topic, as the theses collected in this volume conclusively show: A dystopian novel is shown to hinge on questions of animal rights; a complex novelistic structure is revealed to have its origins in scientific discourses; a clearly Gothic novel has its foundation in aesthetic Christianity, to outline just some of the topics. All these papers have in common that they take a well-known text or idea and change the angle through which it is read and analysed – and suddenly a rainbow of new insights is created.

The 50th anniversary edition of Richard Adam’s timeless classic, the tale of a band of wild rabbits struggling to hold onto their place in the world—“a classic yarn of discovery and struggle” (The New York Times). A worldwide bestseller for over thirty years, Watership Down is one of the most beloved novels of all time. Set in England’s Downs, a once idyllic rural landscape, this stirring tale follows a band of very special creatures on their flight from the intrusion of man and the certain destruction of their home. Led by a stouthearted pair of brothers, they journey from their native Sandleford Warren, through the harrowing trials posed by predators and adversaries, and toward the dream of a mysterious promised land and a more perfect society. “Spellbinding...Marvelous...A taut tale of suspense, hot pursuit and derring-do.” —Chicago Tribune

Leading theological ethicist Stanley Hauerwas shows how discussions of Christology and the authority of scripture involve questions about what kind of community the church must be to rightly tell the stories of God.
