Topics in Statistical Information Theory Solomon
Kullback, John C. Keegel, Joseph H.
Kullback, 2013-12-01 The relevance of information
theory to statistical theory and its applications
to stochastic processes is a unifying influence in
these TOPICS. The integral representation of
discrimination information is presented in these
TOPICS reviewing various approaches used in the
literature, and is also developed herein using
intrinsically information-theoretic methods. Log
likelihood ratios associated with various
stochastic processes are computed by an
application of minimum discrimination information
estimates. Linear discriminant functionals are
used in the information-theoretic analysis of a
variety of stochastic processes. Sections are
numbered serially within each chapter, with a
decimal notation for subsections. Equations,
examples, theorems and lemmas, are numbered
serially within each section with a decimal
notation. The digits to the left of the decimal
point represent the section and the digits to the
right of the decimal point the serial number
within the section. When reference is made to a
section, equation, example, theorem or lemma
within the same chapter only the section number or
equation number, etc., is given. When the
reference is to a section, equation, etc., in a
different chapter, then in addition to the section
or equation etc., number, the chapter number is
also given. References to the bibliography are by
the author's name followed by the year of
publication in parentheses. The transpose of a
matrix is denoted by a prime; thus one-row
matrices are denoted by primes as the transposes
of one-column matrices (vectors).

Duped Ph. D Kassin, 2022-06-15 Why do people confess to crimes they did not commit? And, surely, those cases must be rare? In fact, it happens all the time—in police stations, workplaces, public schools, and the military. Psychologist Saul Kassin, the world's leading expert on false confessions, explains how interrogators trick innocent people into confessing, and then how the criminal justice system deludes us into believing these confessions. *Duped* reveals how innocent men, women, and children, intensely stressed and befuddled by lawful weapons of psychological interrogation, are induced into confession, no matter how horrific the crime. By featuring riveting case studies, highly original research, work by the Innocence Project, and quotes from real-life exonerees, Kassin tells the story of how false confessions happen, and how they corrupt forensics, witnesses, and other evidence, force guilty pleas, and follow defendants for their entire lives— even after they are exonerated by DNA. Starting in the 1980's, Dr. Kassin pioneered the scientific study of interrogations and confessions. Since then, he has been on the forefront of research and advocacy for those wrongfully convicted by police-induced false confessions. Examining famous cases like the Central Park jogger case and Amanda Knox case, as well as stories of ordinary innocent people trapped into confession, Dr. Kassin exposes just how widespread this problem is. Concluding with actionable solutions and proposals for legislative reform, *Duped* shows why the stigma of confession persists and how we can reform the criminal justice system to make it stop.

International Tank Development From 1970

Alexander Ludeke, 2018-01-30 A great upheaval in tank construction took place in the 1970s, as new combat techniques, helicopters, weaponry and new types of ammunition reduced the value of a conventional combat battalion. Nevertheless, complete new developments are rare and in this book, Alexander Ludeke looks at the most important developments that have taken place since 1970.

Spasticity Alfred F. Thilmann, David J.

Burke, William Z. Rymer, 2012-12-06 Over the past 10-20 years there has been an explosion of work on the disturbance of motor control that is manifested as spasticity. This work has been based on new insights from animal experiments into the basis of normal motor control and the development of experimental techniques that could be used in patients with neurological disturbances. For this reason, on the initiative of Alfred Thilmann, the editors of this volume organized a workshop on spasticity, held in Essen, Germany, in November, 1992. The intention of the meeting was to bring together leading scientists in an atmosphere that would generate discussion and hopefully consensus and ideas for future work. The attendance was restricted and deliberately selective, with a mix of basic scientists, clinical scientists and practicing clinicians. The product of their presentations and deliberations is this volume. The book is organized in the same sequence as the workshop, so that the discussion sessions could be summarized by the appropriate chairman.

The Chinese Army Today Dennis J.

Blasko, 2013-06-17 The Chinese Army Today is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This

new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People's Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.

Soviet T-62 Main Battle Tank James Kinnear, Stephen Sewell, 2021-05-13 The T-62 is one of the most widespread tanks used by the Soviets during the Cold War. Developed from the T-55, the T-62 enjoyed a long career in the Red Army and even into the early days of the reformed Russian Army. It was the principal tank used by Soviet forces in the Soviet-Afghan War, and went on to see service with Russian forces in Chechnya and South Ossetia. It has also been employed in almost

every conflict in the Middle East and Africa from its introduction into service. It remains in service with many countries throughout the world and has seen a great deal of use in the Syrian Civil War. Containing more than 400 stunning contemporary and modern photographs, and written by two experts on Soviet armour, this authoritative book tells the complete story of the T-62.
