Yakovlev Yak-36, Yak-38 and Yak-41 E. Gordon, Yefim Gordon, 2008 The latest volume in the 'Red Star' series examines the development of Soviet VTOL aircraft designed by the Yakovlev Aircraft company. As with other volumes in the 'Red Star' series, the book includes a comprehensive account of the development and operational record of the aircraft.

Yakovlev's V/STOL Fighters John Fricker, Piotr Butowski, 1995 Beskrivelse af udviklingen og teknologien bag russiske V/STOL jagerfly.

Soviet V/STOL Aircraft Michael J. Hirschberg, 1997 This important case study reports on the V/STOL development activities in the Soviet Union. As in the West, the Soviets also began using flying test rigs in the late 1950s. By combining the lift engines with modifications to existing engines, the Soviets were able to deploy the Yak-38 Forger only two years after the Harrier. The Forger was in service for 15 years before the political situation forced its retirement from service. Packed with illustrations, references, glossaries, and bibliographies, this case study is a necessary resource for the studies of V/STOL aircraft and systems designers.

Scarecrow Matthew Reilly, 2010-04-01 IT IS THE GREATEST BOUNTY HUNT IN HISTORY FIFTEEN NAMES There are 15 targets, the finest warriors in the world—commandos, spies, terrorists. And they must all be dead by 12 noon, today. The price on their heads: almost \$20 million each. ONE HERO Among the names on the target list, one stands out. An enigmatic Marine named Shane Schofield, call-sign: SCARECROW. NO LIMITS And so Schofield is plunged into a headlong race around the world, pursued by a fearsome collection of international bounty hunters—including the 'Black Knight', a notoriously ruthless hunter who seems intent on eliminating only Schofield. The race is on and the pace is frantic as Schofield fights for survival, in the process unveiling a vast international conspiracy and the terrible reason why he cannot, under any circumstances, be allowed to live! He led his men into hell in Ice Station. He protected the President against all odds in Area 7. This time it's different. Because this time Scarecrow is the target. Scarecrow is the third book in the Shane Schofield series. With new exotic locations and weaponry, plus a returning cast of old friends from the battlefield, Scarecrow is set to take the action/adventure world by storm, and leave readers gasping for air. With his trademark style, Matthew Reilly continues to establish himself as one of today's top thriller writers.

Monino Museum Moscow Ken Duffey, 2013-06-19 One of the premier collections of Soviet and Russian aircraft, the Monino museum opened in 1960 and covers an area of about 20 hectares. Patents for Power Robert M. Farley, Davida H. Isaacs, 2020-10-30 In an era when knowledge can travel with astonishing speed, the need for analysis of intellectual property (IP) law—and its focus on patents, trade secrets, trademarks, and issues of copyright—has never been greater. But as Robert M. Farley and Davida H. Isaacs stress in *Patents for Power*, we have long overlooked critical ties between IP law and one area of worldwide concern: military technology. This deft blend of case studies, theoretical analyses, and policy advice reveals the fundamental role of IP law in shaping how states create and transmit defense equipment and weaponry. The book probes two major issues: the effect of IP law on innovation itself and the effect of IP law on the international diffusion, or sharing, of technology. Discussing a range of inventions, from the AK-47 rifle to the B-29 Superfortress bomber to the MQ-1 Predator drone, the authors show how IP systems (or their lack) have impacted domestic and international relations across a number of countries, including the United States, Russia, China, and South Korea. The study finds, among other results, that while the open nature of

the IP system may encourage industrial espionage like cyberwarfare, increased state uptake of IP law is helping to establish international standards for IP protection. This clear-eyed approach to law and national security is thus essential for anyone interested in history, political science, and legal studies.

Dragons in the Surf Michael Squires,2010-05-31 China and Iran form an unholy alliance to dominate the world. This work of fiction reads like your everyday newspaper. See the future unfold before your eyes, and be afraid, very afraid as you watch your jobs and industries fall under China's control before the missiles start coming at you.....believe it. The next World War has already started and most of you haven't even noticed.

Why the West Can't Win Fadi Lama,2023-05-01 Geopolitical upheaval has gripped the world since collapse of the Soviet Union. During the 1990s the West focused on eliminating the resurgence of Russia as a great power. This led to the assimilation of Warsaw Pact countries into NATO, two Chechen wars, and political systems in the Central Asian republics aligned with the West. Russia's economic destruction was managed by the Harvard boys' shock therapy, which left Russian resources in the control of a few oligarchs aligned with the West. By the end of the 1990s Russia was a weak, bankrupt country of marginalized influence in the world. Then the West's focus turned to China as a potential challenger to western global hegemony. It was thought to suffice to control global energy resources and sea-lanes to China to prevent China from challenging western global hegemony. Hence the first two decades of the millennium were focused on controlling West Asia and North Africa's energy resources. For most, the collapse of the Soviet Union in 1991 signaled the victory of the self-denominated Free World. Why the West Can't Win, however, addresses how events in the three following decades signal the end of a millennium of West European expansionism, a plundering and oppression initially labeled Crusades when the popes embodied political power, morphing into colonialism, then to the Free World when colonialism went out of fashion post-World War II, and at last to the "International Community" after the collapse of the Soviet Union. This book's geopolitical analysis includes a historical overview, an understanding of the financial systems established at the Bretton Woods conference that continue dominating the global economy, how they are used as a powerful geopolitical instrument, an economic analysis based on real goods production, global energy dynamics, alliances and strategies of key global players. It addresses the emerging division of the world into two geopolitical groups: Western Europe, North America, Australia, New Zealand and Africa, Asia and Latin America. The current global geopolitical clash is in essence a struggle between the colonial powers wishing to preserve the Bretton Woods system that allows siphoning wealth of nations, and sovereign nations striving for independence and an end to a millennium of oppression. This work compares the geopolitical forces since the turn of the millennium with a view to providing insight into their relative strengths and the likely outcome of this struggle.

Aircraft Carriers Norman Polmar,2008-01-31 In the post-1945 era, the aircraft carrier has remained a valued weapon despite the development of nuclear weapons, cruise and ballistic missiles, and highly capable submarines. At times, as in the early days of the Korean and Vietnam Wars and in the Falklands conflict, carriers alone could deploy high-performance aircraft to the battlefield. In other operations, such as enforcing the no-fly zones and the U.S. invasions of Afghanistan and Iraq, only carriers could provide the bases needed for sustained combat and support operations. This second volume of Norman Polmar's landmark study details the role of carriers in the unification of the U.S. armed forces and strategic deterrence, fiscally constrained Great Britain, the development of British Commonwealth and ex-colonial navies, and the efforts of France and the Netherlands to rebuild their fleets. The role of the modern carrier-nine nations currently possess them-is discussed, as are the issues confronting nations that might acquire them. Chapters on the Soviet Union's effort to produce carriers are included for the first time. The development of both carrier planes and the many oddball aircraft that have flown from carriers-such as the U-2 spy plane-are also examined. Appendixes include comprehensive data on all carriers built and converted through 2006. This volume is a valuable companion to the critically acclaimed Volume I, which covers aircraft carrier development and operations from 1909 to 1945.

ACARS - A Users Guide Lionel K. Anderson MSc,2010-07-07 Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.
