Yakovlev Yak-36, Yak-38 and Yak-41 E. Gordon, Yefim Gordon, 2008 The latest volume in the 'Red Star' series examines the development of Soviet VTOL aircraft designed by the Yakovlev Aircraft company. As with other volumes in the 'Red Star' series, the book includes a comprehensive account of the development and operational record of the aircraft.

Yakovlev's V/STOL Fighters John Fricker, Piotr Butowski, 1995 Beskrivelse af udviklingen og teknologien bag russiske V/STOL jagerfly.

Soviet V/STOL Aircraft Michael J. Hirschberg, 1997 This important case study reports on the V/STOL development activities in the Soviet Union. As in the West, the Soviets also began using flying test rigs in the late 1950s. By combining the lift engines with modifications to existing engines, the Soviets were able to deploy the Yak-38 Forger only two years after the Harrier. The Forger was in service for 15 years before the political situation forced its retirement from service. Packed with illustrations, references, glossaries, and bibliographies, this case study is a necessary resource for the studies of V/STOL aircraft and systems designers.

Russian Aviation and Air Power in the Twentieth Century John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century. Presenting a comprehensive view of Russian aviation, from its genesis in the late czarist period to the present era, the approach is essentially chronological with a major emphasis on the evolution of military aviation. The contributions are diverse, with appropriate attention to civilian and institutional themes.

International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, *International Warbirds: An Illustrated Guide to World Military Aircraft, 1914-2000* puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

Yakovlev Aircraft Since 1924 Bill Gunston, Yefim Gordon, 1997 Alexandr S. Yakovlev was one of the most versatile aircraft designers of his age, but he had the misfortune to work in the USSR which made him almost unknown to the outside world. In 1926-27 he built his first aeroplane and from then on he designed structures which were, time and again, ahead of their time.

The Billion Dollar Spy David E. Hoffman,2016-05-10 NATIONAL BESTSELLER • A Washington Post Notable Book of the Year • Drawing on previously classified CIA documents and on interviews with firsthand participants, *The Billion Dollar Spy* is a brilliant feat of reporting and a riveting true story of intrigue in the final years of the Cold War. It was the height of the Cold War, and a dangerous time to be stationed in the Soviet Union. One evening, while the chief of the CIA's Moscow station was filling his gas tank, a stranger approached and dropped a note into the car. The chief, suspicious of a KGB trap, ignored the overture. But the man had made up his mind. His attempts to establish contact with the CIA would be rebuffed four times before he thrust upon them an envelope whose contents would stun U.S. intelligence. In the years that followed, that man, Adolf Tolkachev, became one of the most valuable spies ever for the U.S. But these activities posed an enormous personal threat to Tolkachev and his American handlers. They had clandestine meetings in parks and on street corners, and used spy cameras, props, and private codes, eluding the ever-present KGB in its own backyard—until a shocking betrayal put them all at risk.

Affective Neuroscience Jaak Panksepp,2004-09-30 Some investigators have argued that emotions, especially animal emotions, are illusory concepts outside the realm of scientific inquiry. However, with advances in neurobiology and neuroscience, researchers are demonstrating that this position is wrong as they move closer to a lasting understanding of the biology and psychology of emotion. In *Affective Neuroscience*, Jaak Panksepp provides the most up-to-date information about the brain-operating systems that organize the fundamental emotional tendencies of all mammals. Presenting complex material in a readable manner, the book offers a comprehensive summary of the fundamental neural sources of human and animal feelings, as well as a conceptual framework for studying emotional systems of the brain. Panksepp approaches emotions from the perspective of basic emotion theory but does not fail to address the complex issues raised by constructionist approaches. These issues include relations to human consciousness and the psychiatric implications of this knowledge. The book includes chapters on sleep and arousal, pleasure and fear systems, the sources of rage and anger, and the neural control of sexuality, as well as the more subtle emotions related to maternal care, social loss, and playfulness. Representing a

synthetic integration of vast amounts of neurobehavioral knowledge, including relevant neuroanatomy, neurophysiology, and neurochemistry, this book will be one of the most important contributions to understanding the biology of emotions since Darwins The Expression of the Emotions in Man and Animals
