The Yakovlev Yak-9 In Profile & Scale Part I
Erik Pilawskii, 2021-07-02 Volume № 8 of the
Profile & Scale series details the Yakovlev Yak-9
fighter to an entirely new standard of
authenticity. More than 65 Yak-9 examples are
faithfully documented in full-colour profile, many
appearing for the first time. Forty-four pages of
original and not previously published 1:48 scale
line drawings reveal the development and
complexity of the Yak-9 family as never before.
These line drawings are the culmination of nearly
30 years' dedicated work on the Yak family, and
should present the most complete, accurate and
illuminating scale work regarding the aircraft at
the present time. The book presents many
development and variant detail facts about the
Yak-9 which have hitherto been unclear. The scale
drawings and profiles are complimented by many
photographs, diagrams, appendices and other
documentary material to explain the technical and
construction details of the Yak-9 models covered
by this volume: Yak-9, -9D, -9T, -9R and -9B. It
is fervently hoped that at long last many hitherto
confused or inaccurate details of the Yak-9 family
will be clarified and rectified. Many of the
colour profiles represent examples which will be
familiar to students of the Yak-9, albeit
completed to the utmost standard of accuracy.
Several profiles will doubtless be new even to
experienced readers, and it is hoped these will
delight both the casual reader and the serious
student, equally. A brief awards and claim graphic
is provided for a number of aces. These pilot
cards will round out a volume which should be a
treasure trove of information regarding the Yak-9
fighter for both modellers and students of
history.

Soviet Bombers of the Second World War Jason
Nicholas Moore, 2019-09-08 Soviet bombers were a

varied lot during the Second World War, ranging from single-engined biplanes such as the 1920's era Polikarpov U-2 to the excellent and modern twin-engined Tu-2 medium bomber. Although the use of four-engined strategic bombers was mostly limited to use of the huge Pe-8 bomber, the Soviets used many other aircraft for both strategic and tactical bombing. As the bombers of the Red Air Force were mainly tasked with supporting the Red Army, most of the bombers were used for tactical bombing, attacking tanks, troop convoys, trains, and airfields. This book will deal with both strategic bombers and tactical bombers, but will concentrate on the smaller tactical bombers, as this is where the Red Air Force's emphasis lay. Such types as the Il-4, the Su-2, the aforementioned Tu-2, and the most important bomber of all, the Il-2 Shturmovik attack bomber, will be described in great detail, including not only details on the aircraft themselves, but how they were deployed in combat. The one truly strategic bomber, the Pe-8, will not be forgotten, and neither will the comparatively tiny U-2 biplane, which was so effective in its use as a night-time nuisance raider that the Germans copied the tactic wholesale. Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers.

Single No. 30 Yakovlev Yak-9p ,2021-02-15 This book compiles the 4-view color profiles, scale plans, and photo details of the single variant of the Yakovlev Yak-9P. Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also included are photos of the details in B&W and color.

The Yakovlev Yak-9 In Profile & Scale Part II
Erik Pilawskii,2020-11-30 Volume № 9 of the Profile & Scale series details the later Yakovlev Yak-9 fighter to an entirely new standard of authenticity. More than 50 Yak-9 examples are

faithfully documented in full-colour profile, many appearing for the first time. More than 30 pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-9 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-9 which have hitherto been unclear. The scale drawings and profiles are complimented by many photographs, diagrams, appendices and other documentary material to explain the technical and construction details of the Yak-9 models covered in this volume: Yak-9M, -9DD, -9K, -9UT, -9V and most especially the -9U and -9P models which have hitherto been rather confused and misunderstood. Many of the colour profiles represent examples which will be familiar to students of the Yak-9, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-9 fighter for both modellers and students of history.

Yakovlev Robert Panek, 2006 Beskriver detaljeret det sovjetiske jagerfly fra 2. verdenskrig, Yak-9, i dets forskellige varianter.

Soviet Aces of World War 2 Hugh

Morgan, 2013-01-20 No single volume in English has ever appeared in the West dealing with this intriguing subject area, but now that restrictions have relaxed in the former Soviet Union, records of the deeds of the elite pilots of the various

Soviet Air Forces are coming to light. Although initially equipped with very poor aircraft, and robbed of effective leadership thanks as much to Stalin's purges in the late 1930s as to the efforts of the Luftwaffe, Soviet fighter pilots soon turned the tables through the use of both lend-lease aircraft like the Hurricane, Spitfire, P-39 and P-40, and home-grown machines like the MiG-3, LaGG-3/5, Lavochkin La-5/7/9 and the Yak-1/3.

Yakovlev Yak-1, Yak-3, Yak-7, Yak-9 Wojciech Sankowski, Wojciech Zmyslony, 2015 By 1941, the career of the Spitfire is well underway and the RAF has a powerful aircraft with the Mark V that exceeds all expectations. But it is the Mk IX, commissioned urgently in the summer of 1942, which becomes the most famous Spitfire. The latest version of the Spitfire, the Mark XVI, fitted with a Rolls Royce Merlin engine, is actually a Mk.

Yakovlev Fighters of World War Two Yefim Gordon, Sergey Komissarov, Dmitriy Komissarov, 2015-03-30 Founded in 1927, the design bureau headed by Aleksandr S. Yakovlev started out with light aircraft but soon became a fighter maker when the prospect of war loomed large. Originally designated I-26, Yakovlev's simple but rugged fighter, first flew in 1940 and entered production at the end of the year as the Yak-1. The Yak-9 followed in 1942 and brought a greater proportion of metal to the airframe design leading to the development of the long-range Yak-9D, the up-gunned tank buster versions (Yak-9-37, Yak-9T, Yak-9K etc.) and the Yak-9B light bomber. Later flown by the French pilots of the Normandie-Niemen squadron of the Soviet Air Force the Yak-3 introduced in 1943 came to be recognized as one of the best fighters of WW II. This detailed history is richly illustrated with unit badges, nose art, scale drawings, color side views and three-views. Previously unreleased photos and personal stories

from pilots in the Great Patriotic War ensure Yakovlev Fighters of World War II is a detailed reference source for modelers, enthusiasts and historians alike.

Soviet Combat Aircraft of the Second World War

E. Gordon, Yefim Gordon, Dmitrii Khazanov, 1998
Soviet Combat Aircraft of the Second World War, Volume One Gordon and Khazanov Subtitled: Single-Engined Fighters. Arranged by manufacturer, this authoritative study contains the products of Soviet designers Lavochkin, Mikoyan and Yakovlev, as well as several lesser known names. Fact-filled with design and development histories, political backgrounds, production numbers, flight test results, operational accounts, and details of units and campaigns. Technical descriptions are backed up by comprehensive spec tables. Exceptional archive photography. Introduction by Bill Gunston. Hdbd., 9 1/2x 12, 184 pgs., 358 bandw ill., 17 color.

Red Devils over the Yalu Igor Seidov, Stuart Britton, 2014-03-19 The Korean War (1950-1953) was the first - and only - full-scale air war in the jet age. It was in the skies of North Korea where Soviet and American pilots came together in fierce aerial clashes. The best pilots of the opposing systems, the most powerful air forces, and the most up-to-date aircraft in the world in this period of history came together in pitched air battles. The analysis of the air war showed that the powerful United States Air Force and its allies were unable to achieve complete superiority in the air and were unable to fulfill all the tasks they'd been given. Soviet pilots and Soviet jet fighters, which were in no way inferior to their opponents and in certain respects were even superior to them, was the reason for this. The combat experience and new tactical aerial combat tactics, which were tested for the first time in the skies of Korea, have been eagerly studied and

applied by modern air forces around the world today. This book fully discusses the Soviet participation in the Korean War and presents a view of this war from the opposite side, which is still not well known in the West from the multitude of publications by Western historians. The reason for this, of course, is the fact that Soviet records pertaining to the Korean War were for a long time highly classified, since Soviet air units were fighting in the skies of North Korea incognito, so to speak or even more so to write about this was strictly forbidden in the Soviet Union right up to its ultimate collapse. The given work is in essence the first major work in the post-Soviet era. First published in a small edition in Russian in 1998, it was republished in Russia in 2007. For the first time, the Western reader can become acquainted with the most detailed and informative work existing on the course of the air war from the Soviet side, now in English language. The work rests primarily on the recollections of veterans of this war on the so-called 'Red' side - Soviet fighter pilots, who took direct part in this war on the side of North Korea. Their stories have been supplemented with an enormous amount of archival documents, as well as the work of Western historians. The author presents a literal day-by-day chronicle of the aerial combats and combat work of Soviet fighter regiments in the period between 1950 and 1953, and dedicates this work to all the men on both sides who fought and died in the Korean air war.

Soviet Air Power in World War 2 E. Gordon, Yefim Gordon, 2008 From the team that published the 'Famous Russian Aircraft' series comes Soviet Air Power in World War 2, the authoritative guide to all of the aircraft flown by the Soviet Air Force during the conflict. As well as exploring in-depth the individual aircraft types, this book also takes a closer look at the Soviet Air Force's

structure and aircraft fleet. Included are all of the unit insignia of Soviet air armies, divisions and regiments, as well as the varied artwork and camouflage schemes used on individual aircraft. An extensive selection of unseen photographs and colour side views of all the aircraft types that operated in the immediate pre-war years and in World War 2 are featured, including many British and American aircraft flown by the Soviet Air Force and Soviet Naval Aviation. The book also reveals information about the Soviet Air Force commanders and famous aces of the period; the aces' aircraft and their personal insignia are illustrated, as well as the combat operations they flew against the Axis air forces between 1941 and 1945. Written by an acknowledged expert in Soviet and Russian military aviation, and illustrated with photographs, profiles and detailed line drawings, this guide to the Soviet Air Force in World War 2 will be of interest not only to aviation and military history enthusiasts but to modellers of this period.--BOOK JACKET.

Yakovlev Aces of World War 2 George Mellinger, 2012-10-20 The Yak-1 entered Soviet service in 1941, one of three modern types of aircraft accepted for production just prior to the German invasion of the USSR. Despite initial shortcomings, it soon proved to be the thoroughbred of the Soviet Airforce. Indeed, it remained in production until the end of the war, modernized but fundamentally recognizable. By VE-day about 33,100 Yakovlev fighters had been built. Virtually all Soviet fighter regiments flew at least one variety of Yak for a time, including those which gained their fame identified with other aircraft, and consequently many pilots known as Airacobra or Lavochkin aces also scored victories with the Yak. Many other famous aces were exclusively 'Yak patriots', including the French Normandie pilots. This book focuses on the

Soviet aces who scored all, or most of their victories in the Yak, drawing informaion from official unit histories and memoirs of the Soviet pilots themselves.

Arizona Warbird Survivors 2002 Harold A.

Skaarup, 2002-07-25 During the twentieth century, civil and military aviation has played a prominent role in the history and development of Arizona. Commercial operators have exploited the advantages offered by aircraft to overcome its unique challenges of geography and climate. By virtue of Arizonas dry climate and excellent storage facilities, as well as its clear air and wide open spaces in the Southwest (some might say Old West) area of the continental USA, a wide variety of military aircraft have been based or stored there through the years. The list of military aircraft types that made up the tapestry of Arizona aviation is as extensive as the list of legendary figures who have contributed to its amazing history. While most of the military aircraft types no longer grace the airspace over Arizona, many can be viewed in their former splendor as they stand as gate guards; museum exhibits, or as they stand mothballed in the Boneyard. This booklet provides a comprehensive guide to where these aircraft can be found. Finally, the descriptions of the recovery, restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time, energy and financial support to ensure this rich heritage is preserved.

Stalingrad Ben Skipper, 2023-05-30 The very name Stalingrad has become synonymous with military folly and political arrogance. Its capture by the Wehrmacht was a crushing defeat, both militarily and politically, for the Red Army. The 6th Army was a highly experienced key element of Army Group South. In late June 1942 it rolled eastwards as part of the summer offensive to capture the vital oilfields of Baku and secure the city on the Volga

that bore the name of the Soviet leader. The 6th Army was the acme of German military might and on paper it should have easily overwhelmed the defenders of Chuikov's 62nd Army. However its commander, General Friedrich Wilhelm Ernst Paulus, lacked field experience. His army would pay the price. Stalingrad was a new type of battlefield and it would test the mettle of attacker and defender to the very limit, all the while the thermometer plunged. This Battle Craft title also looks at four pieces of military hardware that were involved in these legendary battles.

Innumerable T-34's, which often rolled off local assembly lines unpainted and straight into battle took on the Stug III assault gun as it supported troops fighting for mere meters of territory. Overhead, in the frigid air, deadly V, Ju87 Stuka and Yak 9s, were locked in battle for air superiority over the shattered remains of a once vibrant city. The Quartermaster section provides the modeller with an insight into the development and operational use of the four chosen vehicles and aircraft that were involved in the Battles of El Alamein. A selection of historical and contemporary photos and illustrations feature alongside stunning showcase builds, providing the modeller with subjects to whet the creative appetite. It also features details of model kits and extras that can really help the modeller bring military history to life.

Flying Guns World War II Emmanuel Gustin, Anthony Williams, 2003-06-08 This book describes the history of aircraft guns, their ammunition and their installations in aircraft. It commences with a technical history covering the development of guns, their ammunition, and related issues such as mountings and sights. This is followed by chapters on aircraft installations covering all nations and an evaluation of their use in combat. Appendices include comprehensive tables of the gun

installations of World War II combat aircraft with details and illustrations of the guns used and specifications of their ammunition. There has never before been a comprehensive description of World War II aircraft gun armament. This book has been written with the aim of being the definitive work on this subject, dealing with armament of all participating air forces. Every technical aspect has been covered: gun design in the full range of sizes from small-caliber machine guns to heavy cannon; ammunition types and their use; fixed, flexible and turreted installations and gun sights. Comparative drawings and specifications of service weapons are provided, plus illustrations and data concerning their ammunition.

The World's Most Powerful Military Aircraft
Thomas Newdick, 2016-12-15 Ever since man first took to the air, combat aircraft have been at the cutting edge of aviation technology, resulting in some of the greatest and most complex designs ever built. *The World's Greatest Military Aircraft* features 52 of the most important military aircraft of the last hundred years, including everything from biplane fighters and carrier aircraft to tactical bombers, transport aircraft, multirole fighters, strategic strike aircraft, and stealth bombers. Each entry includes a brief description of the model's development and history, a profile view, key features, and specifications. Packed with more than 200 artworks and photographs, this is a colorful guide for the military aviation enthusiast.

Soviet Air Force Fighter Colours 1941-1945 Erik Pilawskii, 2003 This book represents probably the most detailed study published in the English language of the camouflage and markings of the fighter aircraft of the Soviet Air Force during World War II. Erik Pilawskii is a scholar of the Soviet Air Force in World War II and has undertaken several years of research to produce

this ground-breaking book. With information drawn from previously inaccessible Soviet archives, the author first presents a detailed analysis of the developments, trends, patterns and irregularities of the color systems seen on Russian fighters and offers a fascinating insight into the workings of the Soviet manufacturing system responsible for this task. He then brings readers a technical study of each of the main fighter aircraft and variants, and each description is followed by coverage of camouflage and markings, factory-applied, field variations and seasonal. The text is supported by hundreds of rare and previously unpublished photographs and more than 40 commissioned full color artworks. Furthermore, hundreds of color illustrations portray the immense variety of patterns related to this fascinating subject. This book will be a must-have for all students of Soviet air power and Russian aircraft modelers.

F-51 Mustang Units of the Korean War Warren Thompson, 2015-12-20 By the time the Korean War erupted, the F-51 Mustang was seen as obsolete, but that view quickly changed when the USAF rushed 145 of them to the theatre in late 1950. They had the endurance to attack targets in Korea from bases in Japan, where the modern F-86 fighters and other jets did not. Rather than the interceptor and escort fighter roles the Mustang had performed during World War 2, in the Korean War they were assigned to ground attack missions - striking at communist troop columns advancing south. This is the chronicle of the Mustang units that fought in the Korean War, detailing the type's involvement in a series of intense actions, its successes and its considerable losses. Drawing on meticulous research and gripping first-hand accounts from aircrew, this book explains how the faithful Mustang was able to roll back the years, fight, and prove itself in a new era of aerial warfare.

Yakovlev's Piston-Engined Fighters Yefim

Gordon, Dmitriy Khazanov, 2002 The Red Star series concentrates on Russian subjects with similar in-depth text, drawings and photographs, with emphasis on color drawings. All are compiled by Russian experts and present an immense amount of fresh material from previously inaccessible archives and sources, proving invaluable for enthusiasts, historians, and modelers. These volumes are packed with authoritative text, photographs, and drawings.

Kursk 1943 Robert Forczyk, 2014-09-20 In the summer of 1943, recoiling from defeat at Stalingrad, Hitler conducted a limited objective offensive to eliminate the Soviet Kursk salient. Operating a classic pincer attack of the kind that succeeded during the 1942 Kharkov campaign he hoped that the resulting heavy losses inflicted on the Red Army would give the Wehrmacht time to recover its strength. However, the Soviet anticipation of the attack led to extensive losses on both sides as Soviet anti-tank mines and fierce fighting pushed the Germans back, liberating the German-held Orel in the process. Focusing on the northern front of the battle with Generaloberst Walter Model's forces pitted against General Rokossovsky's Central Front between 5 July and 18 August, this volume will explore both the German offensive and the Soviet counteroffensive. Using documents from both sides, extensive photographs - both contemporary and modern, maps and bird's-eye-views this title will shed new light on this often ignored part of the battle.
