Erik Pilawskii

The Yakovlev Yak-1 Family In Profile & Scale Erik Pilawskii, 2022-07-16 Volume № 5 of the Profile & Scale series details the Yakovlev Yak-1 fighter family to an entirely new standard of authenticity. More than 80 I-26 and Yak-1 examples are faithfully documented in full-colour profile, many appearing for the first time. Fifty-eight pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the entire Yak-1 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-1 which have hitherto been unclear. The scale drawings and profiles are complimented by more than 40 photographs, some never before published. It is fervently hoped that at long last many hitherto confused or inaccurate details of the Yak-1 family will be clarified and rectified.

The Soviet Fighter Yakovlev Yak-3 Anirudh Rao, 2020-12-28 Yakovlev Yak-3 is considered one of the best World War 2 fighters, invariably praised by those who flew it in combat for its remarkable performance. The Germans also treated it with respect, which is perhaps best illustrated by Generalleutnant Walter Schwabedissen's remark: The Yak-3 was a tough nut to crack for our pilots. It outperformed our machines in speed, maneuverability and rate of climb. The emergence of Yak-3 was a compromise between the need to improve the Yak-1's characteristics and the limitations of Soviet aircraft industry and its outdated technologies. The basic design concept took those shortcomings into account, which allowed a rapid launch of mass production of this inexpensive fighter. This in turn would provide frontline units with timely deliveries of new equipment to recoup combat losses. The key to Yak-3's success was not the use of a new powerplant (in those days hard to come by in the USSR), but rather squeezing every bit of performance out of the M-105PF engine, which resulted in a five percent increase in power output. In combination with some serious weight shedding, the Yak-3 had a significantly better performance than the Yak-1. At altitudes up to 5,000 m (which is where most of the air combat over Eastern Front took place), Yak-3 outperformed both the Bf-109 and Fw-190 in rate of climb and maneuverability. Unlike the Yak-1, the new fighter could also stay with the enemy in a dive.

Yakovlev Yak-1, Yak-3, Yak-7, Yak-9 Wojciech Sankowski, Wojciech Zmyslony, 2015 By 1941, the career of the Spitfire is well underway and the RAF has a powerful aircraft with the Mark V that exceeds all expectations. But it is the Mk IX, commissioned urgently in the summer of 1942, which becomes the most famous Spitfire. The latest version of the Spitfire, the Mark XVI, fitted with a Rolls Royce Merlin engine, is actually a Mk.

Yakovlev Aircraft Since 1924 Bill Gunston, Yefim Gordon, 1997 Alexandr S. Yakovlev was one of the most versatile aircraft designers of his age, but he had the misfortune to work in the USSR which made him almost unknown to the outside world. In 1926-27 he built his first aeroplane and from then on he designed structures which were, time and again, ahead of their time.

Yakovlev YAK-23 Marian Mikolajczuk, 2008-10-01 The Yak-23 was the final development of the highly successful Soviet fighter series which began with the Yak-1 in 1940. Its immediate predecessors were the Yak-15 and Yak-17, both simple jet-powered Series versions of the wartime Yak-3; the Yak-23 was an updated all-metal version of the basic design. It saw service with several Warsaw Pact air forces, as a lightweight fast-climbing interceptor. The design, development and operations of the Yak-15, -17 and -23 are described and illustrated in this book, which is complete with photos, scale plans, drawings and color profiles. An essential guide to these first-generation Soviet fighter aircraft!

Bf 109E/F vs Yak-1/7 Dmitriy Khazanov, Aleksander Medved, 2015-06-20 Step into the cockpits of the Luftwaffe's Bf 109 and the Red Air Force's Yaks 1-7, two fighters which were involved in some of the largest, fiercest aerial battles in history. The Iconic Messerschmitt fighter and its combat hardened pilots inflicted a fearful beating on the Yaks in the beginning of the war. Some of the highest scoring aces in history benefitted from the Bf 109's technical superiority over the overweight and underpowered Yak 1, racking up incredible successes against their poorly trained and equipped

adversaries. And yet, as the Soviets accumulated combat experience, their tactics improved, as did their mounts in the upgraded Yak 1B and gradually, the Red Force eroded the Jagdwaffe's dominance of the skies in the eastern front, though with the 109G they would never lose qualitative superiority. Featuring first-hand accounts from veteran pilots, rare archival photographs and expert analysis, this volume brings to life the vicious dogfights that took place between the Bf 109 and the Yak as they vied for mastery of the frozen skies of the Eastern Front.

Yakovlev Yak-25/26/27/28 Yefim Gordon,2002 During the 1950s and 1960s the Soviet design bureau Yakovlev was responsible for a series of swept-wing twin-engined jet combat aircraft, all of which are covered in this Aerofax volume and in the usual format with a mass of new information, details, and illustrations from original Russian sources.

Yak-1 Sergei Kouznetsov,2017-03-19 The World War 2 fighters designed by A.S. Yakovlev's and his team are rightfully considered the weapon of the Victory in the history of the Soviet Union and Russia. Their speed, maneuverability and firepower made them famous over the Eastern front. Yet to this day, historians and aviation enthusiasts continue to debate whether the design of these machines was adequate. The goal of this book is not to end these debates, but rather to present as precisely as possible the documents available to tell the story of the first aircraft in the long lineage of Yakovlev's fighters - the Yak-1. Many new, sometimes unexpected facts about this important machine are presented in this book.

Yakovlev Yak-3 Robert Panek,2018-01-29 Scale plans in 1/32, 1/48, 1/72 and 1/144 scale of the famous Yak-3 Russian fighter 10 A3 size scale plans of all Yak-3 versions.

The Yakovlev Yak-9 In Profile & Scale Part I Erik Pilawskii,2021-07-02 Volume № 8 of the Profile & Scale series details the Yakovlev Yak-9 fighter to an entirely new standard of authenticity. More than 65 Yak-9 examples are faithfully documented in full-colour profile, many appearing for the first time. Forty-four pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-9 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-9 which have hitherto been unclear. The scale drawings and profiles are complimented by many photographs, diagrams, appendices and other documentary material to explain the technical and construction details of the Yak-9 models covered by this volume: Yak-9, -9D, -9T, -9R and -9B. It is fervently hoped that at long last many hitherto confused or inaccurate details of the Yak-9 family will be clarified and rectified. Many of the colour profiles represent examples which will be familiar to students of the Yak-9, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-9 fighter for both modellers and students of history.

Yakovlev Aces of World War 2 George Mellinger,2012-10-20 The Yak-1 entered Soviet service in 1941, one of three modern types of aircraft accepted for production just prior to the German invasion of the USSR. Despite initial shortcomings, it soon proved to be the thoroughbred of the Soviet Airforce. Indeed, it remained in production until the end of the war, modernized but fundamentally recognizable. By VE-day about 33,100 Yakovlev fighters had been built. Virtually all Soviet fighter regiments flew at least one variety of Yak for a time, including those which gained their fame identified with other aircraft, and consequently many pilots known as Airacobra or Lavochkin aces also scored victories with the Yak. Many other famous aces were exclusively 'Yak patriots', including the French Normandie pilots. This book focuses on the Soviet aces who scored all, or most of their victories in the Yak, drawing information from official unit histories and memoirs of the Soviet pilots themselves.

The Yakovlev Yak-7 In Profile & Scale Erik Pilawskii,2021-07 Volume № 7 of the Profile & Scale series details the Yakovlev Yak-7 fighter to an entirely new standard of authenticity. More than 65

Yak-7 examples are faithfully documented in full-colour profile, many appearing for the first time. Forty-four pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-7 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-7 which have hitherto been unclear. The scale drawings and profiles are complimented by more than 35 photographs, some never before published. It is fervently hoped that at long last many hitherto confused or inaccurate details of the Yak-7 family will be clarified and rectified. A discussion of the peculiarities of the Moscow built examples is included. Many of the colour profiles represent examples which will be familiar to students of the Yak-7, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-7 fighter for both modellers and students of history.

Single No. 29 Yakovlev Yak-23, 2021-02-15 This book compiles the 4-view color profiles, scale plans, and photo details of the single variant of the Yakovlev Yak-23. Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also included are photos of the details in B&W and color.

Single No. 30 Yakovlev Yak-9p, 2021-02-15 This book compiles the 4-view color profiles, scale plans, and photo details of the single variant of the Yakovlev Yak-9P. Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also included are photos of the details in B&W and color.

Yakovlev Yak-9P, Yak-9U Robert Panek, 2018-01-29 Scale plans in 1/32, 1/48, 1/72 and 1/144 scale of the famous Yak-9P and Yak-9U Russian fighters 10 A3 size scale plans of Yak-9P/Yak-9U versions.

Yakovlev Fighters of World War Two Yefim Gordon, Sergey Komissarov, Dmitriy Komissarov, 2015-03-30 Founded in 1927, the design bureau headed by Aleksandr S. Yakovlev started out with light aircraft but soon became a fighter maker when the prospect of war loomed large. Originally designated I-26, Yakovlev's simple but rugged fighter, first flew in 1940 and entered production at the end of the year as the Yak-1. The Yak-9 followed in 1942 and brought a greater proportion of metal to the airframe design leading to the development of the long-range Yak-9D, the up-gunned tank buster versions (Yak-9-37, Yak-9T, Yak-9K etc.) and the Yak-9B light bomber. Later flown by the French pilots of the Normandie-Niemen squadron of the Soviet Air Force the Yak-3 introduced in 1943 came to be recognized as one of the best fighters of WW II. This detailed history is richly illustrated with unit badges, nose art, scale drawings, color side views and three-views. Previously unreleased photos and personal stories from pilots in the Great Patriotic War ensure Yakovlev Fighters of World War II is a detailed reference source for modelers, enthusiasts and historians alike.

Yakovlev's Piston-Engined Fighters Yefim Gordon, Dmitriy Khazanov, 2002 The Red Star series concentrates on Russian subjects with similar in-depth text, drawings and photographs, with emphasis on color drawings. All are compiled by Russian experts and present an immense amount of fresh material from previously inaccessible archives and sources, proving invaluable for enthusiasts, historians, and modelers. These volumes are packed with authoritative text, photographs, and drawings.

The Yakovlev Yak-3 In Profile & Scale Erik Pilawskii, 2021-03-29 Volume № 10 of the Profile & Scale series covers the famous Yakovlev Yak-3 fighter to an entirely new standard of authenticity. More than 75 Yak-3 examples are faithfully documented in full-colour profile, many appearing for the first time. Many pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-3 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book

presents many development and variant detail facts about the Yak-3 which have been-- despite its popularity-- unclear. The scale drawings and profiles are complimented by photographs, diagrams, appendices and other documentary material to explain the technical and construction details of all of the production versions of the Yak-3, to include the mysterious all-metal post-war model which has hitherto been completely misunderstood. Many of the colour profiles represent examples which will be familiar to students of the Yak-3, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-3 fighter for both modellers and students of history.

The Yakovlev Yak-9 In Profile & Scale Part II Erik Pilawskii, 2020-11-30 Volume № 9 of the Profile & Scale series details the later Yakovlev Yak-9 fighter to an entirely new standard of authenticity. More than 50 Yak-9 examples are faithfully documented in full-colour profile, many appearing for the first time. More than 30 pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-9 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-9 which have hitherto been unclear. The scale drawings and profiles are complimented by many photographs, diagrams, appendices and other documentary material to explain the technical and construction details of the Yak-9 models covered in this volume: Yak-9M, -9DD, -9K, -9UT, -9V and most especially the -9U and -9P models which have hitherto been rather confused and misunderstood. Many of the colour profiles represent examples which will be familiar to students of the Yak-9, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-9 fighter for both modellers and students of history.

LaGG & Lavochkin Aces of World War 2 George Mellinger, 2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Despite technical maladies and political interference from Moscow, the LaGG-3 matured into an effective fighter when flown to its strengths at low level. Many early Soviet aces were weaned on the LaGG-3, and if they survived the early massacres of 1941-42, they went on to fly the Lavochkin family of fighters. Indeed, the Lavochkin La-3, -5 and -7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub, who claimed 62 kills.
