

YAKOVLEV YAK 14

GENERALLEUTNANT WALTER SCHWABEDISSEN

- 📖 **Yakovlev Aircraft Since 1924** Bill Gunston,Yefim Gordon,1997 Alexandr S. Yakovlev was one of the most versatile aircraft designers of his age, but he had the misfortune to work in the USSR which made him almost unknown to the outside world. In 1926-27 he built his first aeroplane and from then on he designed structures which were, time and again, ahead of their time.
- 📖 **Yakovlev Yak-36, Yak-38 and Yak-41** E. Gordon,Yefim Gordon,2008 The latest volume in the 'Red Star' series examines the development of Soviet VTOL aircraft designed by the Yakovlev Aircraft Company. As with other volumes in the 'Red Star' series, the book includes a comprehensive account of the development and operational record of the aircraft.
- 📖 **The Soviet Fighter Yakovlev Yak-3** Anirudh Rao,2020-12-28 Yakovlev Yak-3 is considered one of the best World War 2 fighters, invariably praised by those who flew it in combat for its remarkable performance. The Germans also treated it with respect, which is perhaps best illustrated by Generalleutnant Walter Schwabedissen's remark: The Yak-3 was a tough nut to crack for our pilots. It outperformed our machines in speed, maneuverability and rate of climb. The emergence of Yak-3 was a compromise between the need to improve the Yak-1's characteristics and the limitations of Soviet aircraft industry and its outdated technologies. The basic design concept took those shortcomings into account, which allowed a rapid launch of mass production of this inexpensive fighter. This in turn would provide frontline units with timely deliveries of new equipment to recoup combat losses. The key to Yak-3's success was not the use of a new powerplant (in those days hard to come by in the USSR), but rather squeezing every bit of performance out of the M-105PF engine, which resulted in a five percent increase in power output. In combination with some serious weight shedding, the Yak-3 had a significantly better performance than the Yak-1. At altitudes up to 5,000 m (which is where most of the air combat over Eastern Front took place), Yak-3 outperformed both the Bf-109 and Fw-190 in rate of climb and maneuverability. Unlike the Yak-1, the new fighter could also stay with the enemy in a dive.

- 📖 **The Osprey Encyclopedia of Russian Aircraft** Bill Gunston,2000-05-25 Sweeping away the red herrings and spurious details invented in the West between 1950 and 1970, this exhaustive volume can be offered to the public with the knowledge that it documents the true histories of some 1000 aircraft types. Much of what was believed to be fact has been proven wrong in various degrees, and it can confidently be claimed that no book in the history of aviation has ever contained so much new information. The volume is prefixed by sections on aircraft designations, engines, air launched weapons and much more - this really is the definitive work on Russian aircraft.
- 📖 **Airborne Combat** James E. Mrazek,2011 Long pursued by civilian thrill seekers and dare devils, airborne gliding came of age during World War II as one of that conflict's most dangerous combat operations. The armed forces of Axis and Allied nations developed gliders ... and flew them into battle at Eben Emael, Crete, Normandy, Arnhem, and Bastogne. [The author's] account brings to life both the men who carried out these perilous missions and the gliders that proved vital to the success of airborne attacks--Page 4 of cover.

- 📖 **The Russian Air Force in the Eyes of German Commanders** Generalleutnant Walter Schwabedissen,2017-06-28 The Russian Air Force in the Eyes of German Commanders by Generalleutnant A. D. Walter Schwabedissen, is one of a series of historical studies written by, or based on information supplied by, former key officers of the GAF for the United States Air Force Historical Division. The overall purpose of the series is twofold: 1) To provide the U.S. Air Force with a comprehensive and, insofar as possible, authoritative history of a major air force which suffered defeat in World War II, a history prepared by many of the principal and responsible leaders of that air force; 2) to provide a firsthand account of that air force's unique combat in a major war, especially its fight against the forces of the Soviet Union. This series of studies therefore covers in large part virtually all phases of the Luftwaffe's operations and organization, from its camouflaged origin in the Reichswehr, during the period of secret German rearmament following World War I, through its participation in the Spanish Civil War and its massive operations and final defeat in World War II, with particular attention to the air war on the Eastern Front. In World War II the Russian Air Force came of age. The men most vitally concerned with this, aside from the Russians themselves, were commanders in the German armed forces. The experience of these commanders, then, constitutes a unique source for information on an organization whose capabilities, both past and future, are of vital concern to the world. The chief German experience with the Russian Air Force derives from World War II. It was during this period that the Russians learned most from the Germans and the Germans learned most about the Russians. This study exploits this broad German experience. Compiled from the official records of the German Air Force and from reports written by German commanders who saw action in the Russian campaign, it documents many of the Russian Air Force's achievements as well as its failures.
- 📖 **Russia's Military Aircraft in the 21st Century** Yefim Gordon,2006 This interesting survey looks at Russian military aviation in the post-Soviet era. While difficulties with funding means that the large new aircraft programs of the Cold War era are likely to remain things of the past, military aviation in Russia is not standing still. Upgrades to existing programs and reorganization of current resources are two of the ways in which combat capability is being not just maintained but enhanced. This volume looks at programs like the new Mi-8MTKO and Mi-24PN night-capable helicopters from Mil. The latest Sukhoi upgrades such as the Su-24M2, Su-25SM, and Su-27SM are also explored, along with the programs designed to extend the capabilities of the Tu-95MS and Tu-160 bombers by allowing for the carriage of new and more capable missiles. The revamping of the Russian Air Force's training fleet with the Yakovlev's Yak-130 is also considered, contrasting the differences between the first ones built and production-standard aircraft.

- 📖 **Polikarpov I-15, I-16 and I-153 Aces** Mikhail Maslov,2013-02-20 The I-15, I-16 and I-153 fighters were the world's first mass-produced fighters. Some 17,000 Polikarpovs had been manufactured by the time production ceased in 1941. They served with the Republicans in the Spain, the Chinese against Japan in 1937-38, and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War. By 1941, more than 20 Soviet pilots had made ace in Polikarpovs, and many more attained that status during the first months of the German invasion. Though thoroughly outclassed, the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east, and continued to serve, as training aircraft and as frontline fighters, some right through to 1945.

- 📖 **Early Soviet Jet Fighters** E. Gordon,Yefim Gordon,2002 This charts the development and service history of the first-generation Soviet jet fighters designed by such renowned fighter makers as Mikoyan, Yakovlev and Sukhoi, as well as design bureau no longer in existence--the Lavochkin and Alekseyev OKBs, during the 1940s and early 1950s.
