

Yakovlev Yak 15

Frank Schwede

Yakovlev YAK-23 Marian Mikolajczuk,2008-10-01 The Yak-23 was the final development of the highly successful Soviet fighter series which began with the Yak-1 in 1940. Its immediate predecessors were the Yak-15 and Yak-17, both simple jet-powered Seriesversions of the wartime Yak-3; the Yak-23 was an updated all-metal version of the basic design. It saw service with several Warsaw Pact air forces, as a lightweight fast-climbing interceptor. The design, development and operations of the Yak-15, -17 and -23 are described and illustrated in this book, which is complete with photos, scale plans, drawings and color profiles. An essential guide to these first-generation Soviet fighter aircraft!

Yakovlev Aircraft Since 1924 Bill Gunston,Yefim Gordon,1997 Alexandr S. Yakovlev was one of the most versatile aircraft designers of his age, but he had the misfortune to work in the USSR which made him almost unknown to the outside world. In 1926-27 he built his first aeroplane and from then on he designed structures which were, time and again, ahead of their time.

Early Soviet Jet Fighters E. Gordon,Yefim Gordon,2002 This charts the development and service history of the first-generation Soviet jet fighters designed by such renowned fighter makers as Mikoyan, Yakovlev and Sukhoi, as well as design bureau no longer in existence--the Lavochkin and Alekseyev OKBs, during the 1940s and early 1950s. Each type is detailed and compared to other contemporary jet fighters. As ever the extensive photo coverage includes much which is previously unseen.

Yakovlev Yak-36, Yak-38 and Yak-41 E. Gordon,Yefim Gordon,2008 The latest volume in the 'Red Star' series examines the development of Soviet VTOL aircraft designed by the Yakovlev Aircraft company. As with other volumes in the 'Red Star' series, the book includes a comprehensive account of the development and operational record of the aircraft.

Russian Aviation and Air Power in the Twentieth Century John Greenwood,Von Hardesty,Robin Higham,2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century. Presenting a comprehensive view of Russian aviation, from its genesis in the late czarist period to the present era, the approach is essentially chronological with a major emphasis on the evolution of military aviation. The contributions are diverse, with appropriate attention to civilian and institutional themes.

Yakovlev Yak-1, Yak-3, Yak-7, Yak-9 Wojciech Sankowski,Wojciech Zmyslony,2015 By 1941, the career of the Spitfire is well underway and the RAF has a powerful aircraft with the Mark V that exceeds all expectations. But it is the Mk IX, commissioned urgently in the summer of 1942, which becomes the most famous Spitfire. The latest version of the Spitfire, the Mark XVI, fitted with a Rolls Royce Merlin engine, is actually a Mk.

Fighter Aircraft Since, 1945 Frank Schwede,2017-11-30 The world's first jet engines were already available shortly before the end of the Second World War, but they had not been developed to a high enough standard to take part. This changed after 1945 when, on both sides of the Iron Curtain, one technological development surpassed the others and records tumbled almost every week. The era of the piston engine was finally over and jet fighters now dominated the skies. By the mid-1950s their speed had already reached double that of the speed of sound; an achievement which a few years earlier, would have sounded to many like science fiction.

MIG Alley: The Fight For Air Superiority [Illustrated Edition] William Y'Blood,2014-08-15 Includes more than 20 photo illustrations The fight for air superiority began the day the Korean War started and

only ended with the armistice three years later. Once the shock of the North Koreans' invasion wore off, it did not take long for the United States Air Force, assisted by other United Nations air forces, to destroy the North Korean Air Force. The arrival of the MiG-15 in November 1950, often flown by Soviet pilots, changed things considerably however. For the remainder of the war, bitterly contested air battles were fought almost daily. Yet despite a decided numerical superiority in jet fighters, the Communists were never able to gain air superiority, testament to the skill and training of the UN fighter pilots, primarily those U.S. Air Force airmen flying the magnificent F-86 Sabre.

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 The I-15, I-16 and I-153 fighters were the world's first mass-produced fighters. Some 17,000 Polikarpovs had been manufactured by the time production ceased in 1941. They served with the Republicans in the Spain, the Chinese against Japan in 1937–38, and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War. By 1941, more than 20 Soviet pilots had made ace in Polikarpovs, and many more attained that status during the first months of the German invasion. Though thoroughly outclassed, the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east, and continued to serve, as training aircraft and as frontline fighters, some right through to 1945.

In Cold War Skies Michael Napier, 2020-08-20 Throughout the second half of the 20th century, international relations across the globe were dominated by the Cold War. From 1949 until the fall of the Berlin Wall in 1989, US and Soviet strategic forces were deployed across the Arctic Ocean in North America and Northern Russia, while the best-equipped armed forces that the world had ever seen faced each other directly across the 'Iron Curtain' in Europe. In *Cold War Skies* examines the air power of the major powers both at a strategic and at a tactical level throughout the 40 years of the Cold War. In this fascinating book, acclaimed historian Michael Napier looks at each decade of the war in turn, examining the deployment of strategic offensive and defensive forces in North America and Northern Russia as well as the situation in Europe. He details the strategic forces and land-based tactical aircraft used by the air forces of the USA, USSR, NATO, Warsaw Pact countries and the European non-aligned nations. He also describes the aircraft types in the context of the units that operated them and the roles in which they were used. The text is supported by a wide range of first-hand accounts of operational flying during the Cold War, as well as numerous high-quality images.

The Little Book of Aviation Norman Ferguson, 2013-05-01 The Little Book of Aviation is a collection of facts, figures and interesting stories from the world of flight. Sad, humorous, baffling and astounding stories abound, from the pioneering days of the Wright Brothers to the present day, and covering everything from great milestones, famous names who've served, and the greatest of aircraft icons; phantom pilots and aircraft and a glossary of slang; the origins of plane-spotting and unusual aircraft names; great feats and enduring mysteries; lucky escapes and great aircraft in the movies... the trivia is limitless and will appeal to everyone, whether you want help telling your Spitfire from your Messerschmitt or you know a Spitfire I from a Spitfire II!

Great Paper Fighter Planes Norman Schmidt, 2005-08 Offers instructions for making paper models from standard index cards.

Korean War Aces Robert F Dorr, 2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the

US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.

Monino Museum Moscow Ken Duffey,2013-06-19 One of the premier collections of Soviet and Russian aircraft, the Monino museum opened in 1960 and covers an area of about 20 hectares. It has on display more than 173 aircraft and 127 aero engines, with 44 of its exhibits having been declared as monuments of science and technology. The Monino museum charts the history of Soviet and Russian aviation from the earliest pre-revolutionary days until the present time, with exhibits in the form of models, artefacts, posters, aero engines, weapons etc., as well as airframes, ejection seats, rockets covering the later period. This book describes and illustrates all the exhibits on display in this amazing museum. It serves as a guide for those visiting Monino, and a mouth-watering taste for those unable to get there in person!

The Russian Air Force in the Eyes of German Commanders Generalleutnant Walter Schwabedissen,2017-06-28 The Russian Air Force in the Eyes of German Commanders by Generalleutnant a. D. Walter Schwabedissen, is one of a series of historical studies written by, or based on information supplied by, former key officers of the GAF for the United States Air Force Historical Division. The overall purpose of the series is twofold: 1) To provide the U.S. Air Force with a comprehensive and, insofar as possible, authoritative history of a major air force which suffered defeat in World War II, a history prepared by many of the principal and responsible leaders of that air force; 2) to provide a firsthand account of that air force's unique combat in a major war, especially its fight against the forces of the Soviet Union. This series of studies therefore covers in large part virtually all phases of the Luftwaffe's operations and organization, from its camouflaged origin in the Reichswehr, during the period of secret German rearmament following World War I, through its participation in the Spanish Civil War and its massive operations and final defeat in World War II, with particular attention to the air war on the Eastern Front. In World War II the Russian Air Force came of age. The men most vitally concerned with this, aside from the Russians themselves, were commanders in the German armed forces. The experience of these commanders, then, constitutes a unique source for information on an organization whose capabilities, both past and future, are of vital concern to the world. The chief German experience with the Russian Air Force derives from World War II. It was during this period that the Russians learned most from the Germans and the Germans learned most about the Russians. This study exploits this broad German experience. Compiled from the official records of the German Air Force and from reports written by German commanders who saw action in the Russian campaign, it documents many of the Russian Air Force's achievements as well as its failures.

Soviet Air Defence Aviation 1945-1991 Yefim Gordon,Dmitriy Komissarov,2012-10-31

History of Strategic Air and Ballistic Missile Defense: 1945-1955,2009 From the book's Foreword: In the early 1970s, the U.S. Army Center of Military History contracted with BDM Corporation for a history of U.S. efforts to counter Soviet air and missile threats during the Cold War. The resulting two-volume History of Strategic Air and Ballistic Missile Defense covers the years 1945-1972 when the strategic arms competition between the United States and the Soviet Union was at its height. The study was first published for limited distribution in 1975 and recently declassified with minimal redaction. These volumes address the passive and active defense strategies, technologies, and techniques adopted by both U.S. and Soviet defense planners. Much of their actions centered around three common questions: How might we be

attacked? How shall we defend our country? What can technology do to solve the basic problems of defending against this new intercontinental threat?
