The Yakovlev Yak-9 In Profile & Scale Part I Erik Pilawskii, 2021-07-02

Volume № 8 of the Profile & Scale series details the Yakovlev Yak-9 fighter to an entirely new standard of authenticity. More than 65 Yak-9 examples are faithfully documented in full-colour profile, many appearing for the first time. Forty-four pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-9 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-9 which have hitherto been unclear. The scale drawings and profiles are complimented by many photographs, diagrams, appendices and other documentary material to explain the technical and construction details of the Yak-9 models covered by this volume: Yak-9, -9D, -9T, -9R and -9B. It is fervently hoped that at long last many hitherto confused or inaccurate details of the Yak-9 family will be clarified and rectified. Many of the colour profiles represent examples which will be familiar to students of the Yak-9, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-9 fighter for both modellers and students of history.

The Yakovlev Yak-9 In Profile & Scale Part II Erik Pilawskii, 2020-11-30

Volume № 9 of the Profile & Scale series details the later Yakovlev Yak-9 fighter to an entirely new standard of authenticity. More than 50 Yak-9 examples are faithfully documented in full-colour profile, many appearing for the first time. More than 30 pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the Yak-9 family as never before. These line drawings are the culmination of nearly 30 years' dedicated work on the Yak family, and should present the most complete, accurate and illuminating scale work regarding the aircraft at the present time. The book presents many development and variant detail facts about the Yak-9 which have hitherto been unclear. The scale drawings and profiles are complimented by many photographs, diagrams, appendices and other documentary material to explain the technical and construction details of the Yak-9 models covered in this volume: Yak-9M, -9DD, -9K, -9UT, -9V and most especially the -9U and -9P models which have hitherto been rather confused and misunderstood. Many of the colour profiles represent examples which will be familiar to students of the Yak-9, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally. A brief awards and claim graphic is provided for a number of aces. These pilot cards will round out a volume which should be a treasure trove of information regarding the Yak-9 fighter for both modellers and students of history.

Single No. 30 Yakovlev Yak-9p, 2021-02-15 This book compiles the 4-view color profiles, scale plans, and photo details of the single variant of the Yakovlev Yak-9P. Scale plans in 1/72 and 1/48 scales plus drawings from wartime technical manuals. Also included are photos of the details in B&W and

color.

Yakovlev Robert Panek,2006 Beskriver detaljeret det sovjetiske jagerfly fra 2. verdenskrig, Yak-9, i dets forskellige varianter.

Yakovlev Yak-1, Yak-3, Yak-7, Yak-9 Wojciech Sankowski,Wojciech Zmyslony,2015 By 1941, the career of the Spitfire is well underway and the RAF has a powerful aircraft with the Mark V that exceeds all expectations. But it is the Mk IX, commissioned urgently in the summer of 1942, which becomes the most famous Spitfire. The latest version of the Spitfire, the Mark XVI, fitted with a Rolls Royce Merlin engine, is actually a Mk.

Yakovlev Aces of World War 2 George Mellinger,2012-10-20 The Yak-1 entered Soviet service in 1941, one of three modern types of aircraft accepted for production just prior to the German invasion of the USSR. Despite initial shortcomings, it soon proved to be the thoroughbred of the Soviet Airforce. Indeed, it remained in production until the end of the war, modernized but fundamentally recognizable. By VE-day about 33,100 Yakovlev fighters had been built. Virtually all Soviet fighter regiments flew at least one variety of Yak for a time, including those which gained their fame identified with other aircraft, and consequently many pilots known as Airacobra or Lavochkin aces also scored victories with the Yak. Many other famous aces were exclusively 'Yak patriots', including the French Normandie pilots. This book focuses on the Soviet aces who scored all, or most of their victories in the Yak, drawing information from official unit histories and memoirs of the Soviet pilots themselves.

Yakovlev Aircraft Since 1924 Bill Gunston,Yefim Gordon,1997 Alexandr S. Yakovlev was one of the most versatile aircraft designers of his age, but he had the misfortune to work in the USSR which made him almost unknown to the outside world. In 1926-27 he built his first aeroplane and from then on he designed structures which were, time and again, ahead of their time.

Yakovlev Fighters of World War Two Yefim Gordon,Sergey Komissarov,Dmitriy Komissarov,2015-03-30 Founded in 1927, the design bureau headed by Aleksandr S. Yakovlev started out with light aircraft but soon became a fighter maker when the prospect of war loomed large. Originally designated I-26, Yakovlev's simple but rugged fighter, first flew in 1940 and entered production at the end of the year as the Yak-1. The Yak-9 followed in 1942 and brought a greater proportion of metal to the airframe design leading to the development of the long-range Yak-9D, the up-gunned tank buster versions (Yak-9-37, Yak-9T, Yak-9K etc.) and the Yak-9B light bomber. Later flown by the French pilots of the Normandie-Niemen squadron of the Soviet Air Force the Yak-3 introduced in 1943 came to be recognized as one of the best fighters of WW II. This detailed history is richly illustrated with unit badges, nose art, scale drawings, color side views and three-views. Previously unreleased photos and personal stories from pilots in the Great Patriotic War ensure Yakovlev Fighters of World War II is a detailed reference source for modelers, enthusiasts and historians alike.

Yakovlev Yak-25/26/27/28 Yefim Gordon,2002 During the 1950s and 1960s the Soviet design bureau Yakovlev was responsible for a series of swept-wing twin-engined jet combat aircraft, all of which are covered in this Aerofax volume and in the usual format with a mass of new information, details, and illustrations from original Russian sources.

Yakovlev Yak-36, Yak-38 and Yak-41 E. Gordon,Yefim Gordon,2008 The latest volume in the 'Red Star' series examines the development of Soviet VTOL

aircraft designed by the Yakovlev Aircraft company. As with other volumes in the 'Red Star' series, the book includes a comprehensive account of the development and operational record of the aircraft.

Fw 190 Defence of the Reich Aces John Weal, 2012-10-20 Renowned aviation author and artist, John Weal, presents the last volume of Fw 190 Aces not previously covered in the Aircraft of the Aces series. From mid-1942 until the end of the war, German fighter pilots were deployed in the defence of the homeland in an effort to halt the near-constant bombing raids by Britain and America. This book tells their story, from the moment when the Luftwaffe began to retreat to the dying days of the Reich. Using previously unpublished photographs, this book charts the story of the men who earned their status as aces while fighting a hopeless battle to protect the land and the people they loved.

LaGG & Lavochkin Aces of World War 2 George Mellinger, 2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Despite technical maladies and political interference from Moscow, the LaGG-3 matured into an effective fighter when flown to its strengths at low level. Many early Soviet aces were weaned on the LaGG-3, and if they survived the early massacres of 1941-42, they went on to fly the Lavochkin family of fighters. Indeed, the Lavochkin La-3, -5 and -7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub, who claimed 62 kills.

OKB Yakovlev Yefim Gordon, Dmitriy Komissarov, Sergey Komissarov, 2010 8-1/2 x 11, 400 b/w photos, 16 pgs of color, plus line drawings

Early Soviet Jet Fighters E. Gordon, Yefim Gordon, 2002 This charts the development and service history of the first-generation Soviet jet fighters designed by such renowned fighter makers as Mikoyan, Yakovlev and Sukhoi, as well as design bureau no longer in existence--the Lavochkin and Alekseyev OKBs, during the 1940s and early 1950s. Each type is detailed and compared to other contemporary jet fighters. As ever the extensive photo coverage includes much which is previously unseen.

Korean War Aces Robert F Dorr, 2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.

Yakovlev's Piston-Engined Fighters Yefim Gordon, Dmitriy Khazanov, 2002 The Red Star series concentrates on Russian subjects with similar in-depth text, drawings and photographs, with emphasis on color drawings. All are compiled by Russian experts and present an immense amount of fresh material from previously inaccessible archives and sources, proving invaluable for enthusiasts, historians, and modelers. These volumes are packed with authoritative text, photographs, and drawings.

The Illustrated Directory of Fighting Aircraft of World War II Bill Gunston, 1999-01 Specs for more than 160 aircraft, with illustrations and period photos to detail paint schemes. Ideal for scale and R/C modelers.

Soviet Fighters of the Second World War Jason Nicholas Moore,2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa, the invasion of the Soviet Union. Hundreds of fighters were destroyed in the first few days, but many of these were obsolete biplanes. Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin. Starting with outdated aircraft such as the Polikarpov Po-2 biplane and monoplane fighters, the Soviets then settled on two main lines of development: the inline-engine LaGG-3 and its radial-engine derivatives, the La-5 and La-7, and the inline-engine Yakovlev fighters, which were produced in greater numbers than any other series of fighters. Not only are these aircraft accurately described, but experimental fighters are also dealt with. In addition, colour profiles illustrate these aircraft in terms of design, camouflage and markings. From the I-15bis biplane of the late 1930s to the superb La-7 and Yak-3 fighters of the last year of the war, all Red Air Force fighters are covered in this comprehensive volume.

Russia's Military Aircraft in the 21st Century Yefim Gordon,2006 This interesting survey looks at Russian military aviation in the post-Soviet era. While difficulties with funding means that the large new aircraft programs of the Cold War era are likely to remain things of the past, military aviation in Russia is not standing still. Upgrades to existing programs and reorganization of current resources are two of the ways in which combat capability is being not just maintained but enhanced. This volume looks at programs like the new Mi-8MTKO and Mi-24PN night-capable helicopters from Mil. The latest Sukhoi upgrades such as the Su-24M2, Su-25SM, and Su-27SM are also explored, along with the programs designed to extend the capabilities of the Tu-95MS and Tu-160 bombers by allowing for the carriage of new and more capable missiles. The revamping of the Russian Air Force's training fleet with the Yakovlev's Yak-130 is also considered, contrasting the differences between the first ones built and production-standard aircraft.
