Bound Donna Jo Napoli,2012-12-11 YOUNG XING XING IS BOUND. Bound to her father's second wife and daughter after Xing Xing's father has passed away. Bound to a life of servitude as a young girl in ancient China, where the life of a woman is valued less than that of livestock. Bound to be alone and unmarried, with no parents to arrange for a suitable husband. Dubbed Lazy One by her stepmother, Xing Xing spends her days taking care of her half sister, Wei Ping, who cannot walk because of her foot bindings, the painful but compulsory tradition for girls who are fit to be married. Even so, Xing Xing is content, for now, to practice her gift for poetry and calligraphy, to tend to the mysterious but beautiful carp in her garden, and to dream of a life unbound by the laws of family and society. But all of this is about to change as the time for the village's annual festival draws near, and Stepmother, who has spent nearly all of the family's money, grows desperate to find a husband for Wei Ping. Xing Xing soon realizes that this greed and desperation may threaten not only her memories of the past, but also her dreams for the future. In this searing story, Donna Jo Napoli, acclaimed author of *Beast and Breath*,delves into the roots of the Cinderella myth and unearths a tale as powerful as it is familiar.

Rich Quasiparticle Properties In Layered Graphene-related Systems Ming-fa Lin,Chiun-yan Lin,Ching-hong Ho,Hsien-ching Chung,Lu-yao Wang,Chih-wei Chiu,2023-12-27 This comprehensive book delves into the fascinating world of quasiparticle properties of graphene-related materials.

The authors thoroughly explore the intricate effects of intrinsic and extrinsic interactions on the material's properties, while unifying the single-particle and many-particle properties through the development of a theoretical framework. The book covers a wide range of research topics, including long-range Coulomb interactions, dynamic charge density waves, Friedel oscillations and plasmon excitations, as well as optical reflection and transmission spectra of thin films. Also it highlights the crucial roles of inelastic Coulomb scattering and optical scattering in the quasiparticle properties of layered systems, and the impact of crystal symmetry, number of layers, and stacking configuration on their uniqueness. Furthermore, the authors explore the topological properties of quasiparticles, including 2D time-reversal-symmetry protected topological insulators with quantum spin Hall effect, and rhombohedral graphite with Dirac nodal lines. Meanwhile, the book examines the gate potential application for creating topological localized states and shows topological invariants of 2D Dirac fermions, and binary Z₂ topological invariants under chiral symmetry. The calculated results are consistent with the present experimental observations, establishing it as a valuable resource for individuals interested in the quasiparticle properties of novel materials.

Operation Yao Ming Brook Larmer, 2005-11-03 The riveting story behind NBA giant Yao Ming, the ruthless Chinese sports machine that created him, and the East-West struggle over China's most famous son. The NBA's 7'6 All-Star Yao Ming has changed the face of basketball, revitalizing a league desperate for a new hero while becoming a multimillionaire pitchman for Reebok and McDonald's. But his journey to America—like that of his forgotten foil, 7'1 Wang Zhizhi—began long before he set foot on the world's brightest athletic stage. Operation Yao Ming opens with the story of the two boys' parents, basketball players brought together by Chinese officials intent on creating a generation of athletes who could bring glory to their resurgent motherland. Their children would have no more freedom to choose their fates. By age thirteen, Yao was pulled out of sports school to join the Shanghai Sharks pro team, following in the footsteps of Wang, then the star of the People's Liberation Army team. Rumors of the pair of Chinese giants soon attracted the NBA and American sports companies, all eager to tap a market of 1.3 billion consumers. In suspenseful scenes, journalist Brook Larmer details the backroom maneuverings that brought China's first players to the NBA. Drawing on years of firsthand reporting, Larmer uncovers the disturbing truth behind China's drive to produce Olympic champions, while also taking readers behind the scenes of America's multibillion-dollar sports empire. Caught in the middle are two young men—one will become a mega-rich superstar and hero to millions, the other a struggling athlete rejected by his homeland yet lost in America.
