Hitler's Strategic Bombing Offensive on the Eastern Front Dmitry Degtev,Dmitry Zubov,2021-09-01 Germany was never able to match the power of the Allied air forces with their great four-engine bombers, the Lancasters, Liberators and Flying Fortresses. Indeed, many have ascribed the defeat of Germany in the Second World to its lack of a strategic bombing force. There were, though, two occasions when the Luftwaffe’s twin-engine bombers undertook strategic objectives on a large scale. The first of these was the ‘Blitz’ of 1940-1941, in which the Luftwaffe attempted to wreck Britain’s industrial and military capacity. The second was on the eve of Operation Zitadelle, a major offensive against Soviet forces in the Kursk salient Hitler’s objective was to replicate the successful Allied mass-bombing of German cities, the Luftwaffe being tasked with destroying the main tank and aircraft production facilities and fuel depots. Hitler saw this as the necessary prelude to weaken the Russians before the ‘decisive’ onslaught of Zitadelle. The aerial operation, Carmen II, lasted for a month and covered a huge target area from the Rybinsk reservoir to the Caspian Sea. For these complex and risky night missions, all the Ju-88 and ??-111 bombers available to Hitler in the East were employed. The authors have collected a huge amount of factual material, reconstructing all the details of this little-known campaign, which was the largest operation Luftwaffe on the Eastern front. This book opens a completely new page in the history of the German air war and provides a comprehensive investigation into the nature of the targets attacked, the degree of damage suffered by the Soviet military machine, and how this affected Operation Zitadelle. The descriptions of the dangerous missions carried out by Luftwaffe as part of this operation are presented in great detail and all these exclusive facts are complemented by a large number of unique photos and documents.

War and Memory in Russia, Ukraine and Belarus Julie Fedor,Markku Kangaspuro,Jussi Lassila,Tatiana Zhurzhenko,2017-12-05 This edited collection contributes to the current vivid multidisciplinary debate on East European memory politics and the post-communist instrumentalization and re-mythologization of World War II memories. The book focuses on the three Slavic countries of post-Soviet Eastern Europe – Russia, Ukraine and Belarus – the epicentre of Soviet war suffering, and the heartland of the Soviet war myth. The collection gives insight into the persistence of the Soviet commemorative culture and the myth of the Great Patriotic War in the post-Soviet space. It also demonstrates that for geopolitical, cultural, and historical reasons the political uses of World War II differ significantly across Ukraine, Russia and Belarus, with important ramifications for future developments in the region and beyond. The chapters 'Introduction: War and Memory in Russia, Ukraine and Belarus', 'From the Trauma of Stalinism to the Triumph of Stalingrad: The Toponymic Dispute over Volgograd' and 'The “Partisan Republic”: Colonial Myths and Memory Wars in Belarus' are published open access under a CC BY 4.0 license at link.springer.com. The chapter 'Memory, Kinship, and Mobilization of the Dead: The Russian State and the “Immortal Regiment” Movement' is published open access under a CC BY-NC-ND 4.0 license at link.springer.com.

Soviet T-54 Main Battle Tank James Kinnear,Stephen Sewell,2018-11-29 The menacing silhouette of the T-54 tank prowling down streets of Eastern European capitals or roaring across fields in massive exercises remains one of the most enduring images of Soviet power in the early years of the Cold War. Its sleek and unmistakable shape was a warning to any nation that wanted to stand against the USSR. Yet all of this masked a flawed, outdated design, and when T-54s began to clash with the Western armoured vehicles in proxy wars in Southeast Asia and the Middle East, they were found to be on the losing side of many of the battles. Containing over 500 stunning contemporary and modern photographs, and written by two experts on Soviet armour, this authoritative book tells the complete story of the T-54, one of the most widely produced tanks of all time, including many previously unheard of variants.

Red Phoenix Rising Von Hardesty ,Ilya Grinberg,2021-07-01 A groundbreaking account of the Soviet Air Force in World War II, the original version of this book, Red Phoenix, was hailed by the Washington Post as both brilliant and monumental. That version has now been completely overhauled in the wake of an avalanche of declassified Russian archival sources, combat documents, and statistical information made available in the past three decades. The result, Red Phoenix Rising, is nothing less than definitive. The saga of the Soviet air force, one of the least chronicled aspects of the war, marked a transition from near annihilation in 1941 to the world's largest operational-tactical air force four years later. Von Hardesty and Ilya Grinberg reveal the dynamic changes in tactics and operational art that allowed the VVS to bring about that remarkable transformation. Drawing upon a wider array of primary sources, well beyond the uncritical and ultra-patriotic Soviet memoirs underpinning the original version, this volume corrects, updates, and amplifies its predecessor. In the process, it challenges many official accounts and revises misconceptions promoted by scholars who relied heavily on German sources, thus enlarging our understanding of the brutal campaigns fought on the Eastern Front. The authors describe the air campaigns as they unfolded, with full chapters devoted to the monumental victories at Moscow, Stalingrad, and Kursk. By combining the deeply affecting human drama of pilots, relentlessly confronted by lethal threats in the air and on the ground, with a rich technical understanding of complex military machines, they have produced a fast-paced, riveting look at the air war on the Eastern Front as it has never been seen before. They also address dilemmas faced by the Soviet Air Force in the immediate postwar era as it moved to adopt the new technology of long-range bombers, jet propulsion and nuclear arms. Drawing heavily upon individual accounts down to the unit level, Hardesty and Grinberg greatly enhance our understanding of their story's human dimension, while the book's more than 100 photos, many never before seen in the West, vividly portray the high stakes and hardware of this dramatic tale. In sum, this is the definitive one-volume account of a vital but still underserved dimension of the war-surpassing its predecessor so decisively that no fan of that earlier work can afford to miss it.

Best Practice for Conservation Planning in Rural Areas ,2005-08-15 This report draws on lessons learned from observations made at seven case study sites, all of which permit economic activities, especially recreation, that are not harmful to the biological values and natural functions of the area. There is now a need to translate these experiences into policy instruments. The guidelines, summarized in some 20 pages, offer sound and well-documented advice on how to proceed.

Soviet T-10 Heavy Tank and Variants James Kinnear,Stephen Sewell,2017-06-29 A highly illustrated study of the T-10 Heavy Tank that served from the 1950s through to the end of the Soviet Union. When it was

introduced into service in 1953, the T-10 represented a return to the “classic” Soviet heavy tank. Although considered a major threat to NATO tank forces, it also represented the end of an era. All gun heavy tanks like the T-10 would eventually be made effectively redundant by later models like the T-62 which had powerful next generation armament and new ammunition types. The tank was gradually withdrawn from service in the 1970s, though the last tanks would only leave Russian service, by decree of the President of the Russian Federation, in 1997. As such the T-10 outlived the Soviet state that had created it. Never exported outside of the Soviet Union and rarely used in combat, the T-10 has remained a mysterious tank, with many of its variants unknown in the West until very recently. This study, written from original Russian and Ukrainian primary source documents that have only recently been made available, uncovers the history of this enigmatic tank using 130 stunning contemporary and modern photographs of the T-10 as well as full colour side-view artwork.

Smersh Dr. Vadim Birstein,2013-11-01 SMERSH is the award-winning account of the top-secret counterintelligence organisation that dealt with Stalin's enemies from within the shadowy recesses of Soviet government. As James Bond's nemesis in Ian Fleming's novels, SMERSH and its operatives were depicted in exotic duels with 007, rather than fostering the bleak oppression and terror they actually spread in the name of their dictator. Stalin drew a veil of secrecy over SMERSH's operations in 1946, but that did not stop him using it to terrify Red Army dissenters in Leningrad and Moscow, or to abduct and execute suspected spooks - often without cause - across mainland Europe. Formed to mop up Nazi spy rings at the end of the Second World War, SMERSH gained its name from a combination of the Russian words for 'Death to Spies'. Successive Communist governments suppressed traces of Stalin's political hit squad; now Vadim Birstein lays bare the surgical brutality with which it exerted its influence as part of the paranoid regime, both within the Soviet Union and in the wider world. SMERSH was the most mysterious and secret of organisations - this definitive and magisterial history finally reveals truths that lay buried for nearly fifty years.
