Rugby, Resistance and Politics Buntu Siwisa, 2023-10-06 Buntu Swisa has written a vivid biography of Dan Qeqe, the legendary sportsman, powerbroker and pioneer of black rugby and the liberation of sport. His book examines the complex and questionable relationships that Qeqe had with the enemies of non-racial sport, which cemented his power base. Siwisa tells the story of Qeqe's life and times and at the same time has written a social and political biography of Port Elizabeth—a people's history of Port Elizabeth. As much as Qeqe was a local legend, his achievements had national repercussions and, indeed, continue to this day. Print editions not for sale in Sub Saharan Africa.

West African Drumming and Dance in North American Universities George Worlasi Kwasi Dor, 2014-02 More than twenty universities and twenty other colleges in North America (USA and

Canada) offer performance courses on West African ethnic dance drumming. Since its inception in 1964 at both UCLA and Columbia, West African drumming and dance has gradually developed into a vibrant campus subculture in North America. The dances most practiced in the American academy come from the ethnic groups Ewe, Akan, Ga, Dagbamba, Mande, and Wolof, thereby privileging dances mostly from Ghana, Togo, Benin, Senegal, Mali, Guinea, and Burkina Faso. This strong presence and practice of a world music ensemble in the diaspora has captured and engaged the interest of scholars, musicians, dancers, and audiences. In the first-ever ethnographic study of West African drumming and dance in North American universities the author documents and acknowledges ethnomusicologists, ensemble directors, students, administrators, and academic institutions for their key roles in the histories of their respective ensembles. Dor collates and shares perspectives including debates on pedagogical approaches that may be instructive as models for both current and future ensemble directors and reveals the multiple impacts that participation in an ensemble or class offers students. He also examines the interplay among historically situated structures and systems, discourse, and practice, and explores the multiple meanings that individuals and various groups of people construct from this campus activity. The study will be of value to students, directors, and scholars as an ethnographic study and as a text for teaching relevant courses in African music, African studies, ethnomusicology/world music, African diaspora studies, and other related disciplines.

New Trends in Analysis and Geometry Mohamed A.

Khamsi,2020-01-24 This unique mathematical volume brings together geometers, analysts, differential equations specialists and graph-theorists to provide a glimpse on recent mathematical trends whose commonalities have hitherto remained, for the most part, unnoticed. The applied mathematician will be pleasantly surprised with the interpretation of a voting system in terms of the fixed points of a mapping given in the book, as much as the classical analyst will be enthusiastic to find detailed discussions on the generalization of the notion of metric space, in which the metric takes values on an abstract monoid. Classical themes on fixed point theory are adapted to the diverse setting of graph theory, thus uncovering a set of tools whose power and versatility will be appreciated by mathematicians working on either area. The volume also includes recent results on variable exponent spaces which reveal much-needed connections with partial differential equations, while the incipient field of variational inequalities on manifolds, also explored here, will be of interest to researchers from a variety of fields.
