Neutron Cross Sections Victoria McLane,2012-12-02 Neutron Cross Sections, Volume 2: Neutron Cross Section Curves presents data for total reaction cross sections and related fission parameters as a function of incident-neutron energy. This book covers energy range from 0.01 eV to 200 MeV to exclude crystalline and magnetic effects for slow neutrons and relativistic effects for high energy neutrons. The data in this volume are grouped into sections corresponding to the element of the target nucleus in the neutron-induced reaction. These sections are ordered in increasing atomic number. Within a section, graphical data are presented for the natural element followed by the isotopes of that element in order of increasing atomic mass. A list of the reaction types is provided at the end of each section. This book also provides graphical section, wherein each graphical page is annotated on the outer edge with a symbol for an element or isotope followed by the list of the cross section data for that element or isotope. The data plotted in the graphical section are tagged by a mnemonic consisting of year, laboratory, and author's last name. This tag can be used to find the corresponding reference on the bibliographic pages.

Integrated Process Design and Operational Optimization via Multiparametric Programming Baris Burnak,Nikolaos A. Diangelakis,Efstratios N. Pistikopoulos,2022-06-01 This book presents a comprehensive optimization-based theory and framework that exploits the synergistic interactions and tradeoffs between process design and operational decisions that span different time scales. Conventional methods in the process industry often isolate decision making mechanisms with a hierarchical information flow to achieve tractable problems, risking suboptimal, even infeasible operations. In this book, foundations of a systematic model-based strategy for simultaneous process design, scheduling, and control optimization is detailed to achieve reduced cost and improved energy consumption in process systems. The material covered in this book is well suited for the use of industrial practitioners, academics, and researchers. In Chapter 1, a historical perspective on the milestones in model-based design optimization techniques is presented along with an overview of the state-of-the-art mathematical tools to solve the resulting complex problems. Chapters 2 and 3 discuss two fundamental concepts that are essential for the reader. These concepts are (i) mixed integer dynamic optimization problems and two algorithms to solve this class of optimization problems, and (ii) developing a model based multiparametric programming model predictive control. These tools are used to systematically evaluate the tradeoffs between different time-scale decisions based on a single high-fidelity model, as demonstrated on (i) design and control, (ii) scheduling and control, and (iii) design, scheduling, and control problems. We present illustrative examples on chemical processing units, including continuous stirred tank reactors, distillation columns, and combined heat and power regeneration units, along with discussions of other relevant work in the literature for each class of problems.

Manding-English Dictionary Valentin Vydrine,2015-02-07 Manding is a common name for several closely related languages in West Africa: Maninka (or Malinke), Bamana (or Bambara), Jula, Mandinka, Xasonka, etc., spoken by up to 40 million people. In this dictionary, forms of Malian Bamana and Guinean Maninka are included. The polysemy of words is represented in all details, the senses are represented hierarchically. Verbal valencies are indicated throughout and clarified by abundant illustrative examples. Numerous idiomatic expressions are given. Most of lexemes are provided with etymological information: sources of borrowing or proto-forms and their reflexes in other Mande languages. The dictionary is oriented toward advanced language learners and professional linguists, but it can be also useful for native speakers of Bamana and Maninka languages.

Diskursanalyse von Verkaufsgesprächen Achim Pothmann,2013-07-02 Mehr als eintausend Veröffentlichungen befassen sich schwerpunktmäßig mit der Thematik von Verkaufsgesprächen. Diese Literatur ist geprägt von normativen Tips, Tricks und Ratschlägen für Verkaufsgespräche, die vornehmlich von Praktikern für Verkaufspraktiker propagiert werden. Sprachwissenschaftlich wurde das Verkaufsgespräch bisher nur partiell untersucht. Umfassende linguistische Analyseergebnisse fehlen. Diese Studie stellt eine erste empirisch fundierte Einführung in den Untersuchungsgegenstand Verkaufsgespräch aus linguistischer, insbesondere kommunikationsanalytischer Perspektive dar.

Anime's Identity Stevie Suan,2021-11-09 A formal approach to anime rethinks globalization and transnationality under neoliberalism Anime has become synonymous with Japanese culture, but its global reach raises a perplexing question—what happens when anime is produced outside of Japan? Who actually makes anime, and how can this

help us rethink notions of cultural production? In *Anime's Identity*, Stevie Suan examines how anime's recognizable media-form—no matter where it is produced—reflects the problematics of globalization. The result is an incisive look at not only anime but also the tensions of transnationality. Far from valorizing the individualistic “originality” so often touted in national creative industries, anime reveals an alternate type of creativity based in repetition and variation. In exploring this alternative creativity and its accompanying aesthetics, Suan examines anime from fresh angles, including considerations of how anime operates like a brand of media, the intricacies of anime production occurring across national borders, inquiries into the selfhood involved in anime's character acting, and analyses of various anime works that present differing modes of transnationality. *Anime's Identity* deftly merges theories from media studies and performance studies, introducing innovative formal concepts that connect anime to questions of dislocation on a global scale, creating a transformative new lens for analyzing popular media.
