*Pop City* Youjeong Oh,2018-12-15 Pop City examines the use of Korean television dramas and K-pop music to promote urban and rural places in South Korea. Building on the phenomenon of Korean pop culture, Youjeong Oh argues that pop culture-featured place selling mediates two separate domains: political decentralization and the globalization of Korean popular culture. The local election system introduced in the mid 90s has stimulated strong desires among city mayors and county and district governors to develop and promote their areas. Riding on the Korean Wave—the overseas popularity of Korean entertainment, also called Hallyu—Korean cities have actively used K-dramas and K-pop idols in advertisements designed to attract foreign tourists to their regions. Hallyu, meanwhile, has turned the Korean entertainment industry into a speculative field into which numerous players

venture by attracting cities as sponsors. By analyzing the process of culture-featured place marketing, Pop City shows that urban spaces are produced and sold just like TV dramas and pop idols by promoting spectacular images rather than substantial physical and cultural qualities. Popular culture-associated urban promotion also uses the emotional engagement of its users in advertising urban space, just as pop culture draws on fans' and audiences' affective commitments to sell its products. Oh demonstrates how the speculative, image-based, and consumer-exploitive nature of popular culture shapes the commodification of urban space and ultimately argues that pop culture-mediated place promotion entails the domination of urban space by capital in more sophisticated and fetishized ways.

**Soul in Seoul** Crystal S. Anderson, 2020-08-25 K-pop (Korean popular music) reigns as one of the most popular music genres in the world today, a phenomenon that appeals to listeners of all ages and nationalities. In *Soul in Seoul: African American Popular Music and K-pop*, Crystal S. Anderson examines the most important and often overlooked aspect of K-pop: the music itself. She demonstrates how contemporary K-pop references and incorporates musical and performative elements of African American popular music culture as well as the ways that fans outside of Korea understand these references. K-pop emerged in the 1990s with immediate global aspirations, combining musical elements from Korean and foreign cultures, particularly rhythm and blues genres of black American popular music. Korean solo artists and groups borrow from and cite instrumentation and vocals of R&B genres, especially hip-hop. They also enhance the R&B tradition by utilizing Korean musical strategies. These musical citational practices are deemed authentic by global fans who function as part of K-pop's music press and promotional apparatus. K-pop artists also cite elements of African

American performance in Korean music videos. These disrupt stereotyped representations of Asian and African American performers. Through this process K-pop has arguably become a branch of a global R&B tradition. Anderson argues that Korean pop groups participate in that tradition through cultural work that enacts a global form of crossover and by maintaining forms of authenticity that cannot be faked, and furthermore propel the R&B tradition beyond the black-white binary.
