Rumba on the River Gary Stewart, 2020-05-05 There had always been music along the banks of the Congo River-lutes and drums, the myriad instruments handed down from ancestors. But when Joseph Kabasele and his African Jazz went chop for chop with O.K. Jazz and Bantous de la Capitale, music in Africa would never be the same. A sultry rumba washed in relentless waves across new

nations springing up below the Sahara. The Western press would dub the sound soukous or rumba rock; most of Africa called it Congo music. Born in Kinshasa and Brazzaville at the end of World War II, Congolese music matured as Africans fought to consolidate their hard-won independence. In addition to great musicians-Franco, Essous, Abeti, Tabu Ley, and youth bands like Zaiko Langa Langa-the cast of characters includes the conniving King Leopold II, the martyred Patrice Lumumba, corrupt dictator Mobutu Sese Seko, military strongman Denis Sassou Nguesso, heavyweight boxing champs George Foreman and Muhammad Ali, along with a Belgian baron and a clutch of enterprising Greek expatriates who pioneered the Congolese recording industry. *Rumba on the River* presents a snapshot of an era when the currents of tradition and modernization collided along the banks of the Congo. It is the story of twin capitals engulfed in political struggle and the vibrant new music that flowered amidst the ferment. Living the High Life in Minsk Margarita M. Balmaceda, 2014-01-10 Looks at the sources of stability and instability in post-Soviet authoritarian states through the case study of President Lukashenka's firm hold on power in Belarus. In particular, it seeks to understand the role of energy relations, policies, and discourses in the maintenance of this power. The central empirical question Balmaceda seeks to answer is what has been the role of energy policies in the maintenance of Lukashenka's power in Belarus? In particular, it analyzes the role of energy policies in the management of Lukashenka's relationship with three constituencies crucial to his hold on power: Russian actors, the Belarusian nomenklatura, and the Belarusian electorate. In terms of foreign relations, the book focuses on the factors explaining Lukashenka's ability to project Belarus' power in its relationship with Russia in such a way as to compensate for its objective high level of dependency, assuring high levels of energy subsidies and rents continuing well beyond the initial worsening of the relationship in c. 2004. In terms of domestic relations, Balmaceda examines Lukashenka's specific use of those energy rents in such a way as to assure the continuing support of both the Belarusian nomenklatura and the Belarusian

electorate.

The Virgin Directory of World Music Philip Sweeney,1991 In this guide, the author provides a geographical breakdown of the musical styles and artists and analyzes individual recordings, from African artists such as Youssou N'Dour to performers from the Far East, India, Europe and the Americas. Foreword contributors include David Byrne and Peter Gabriel.

Modernity's Spiral Bob Whitman White,1998

Biological Oceanography of the Baltic Sea Pauline Snoeijs-Leijonmalm,Hendrik Schubert,Teresa Radziejewska,2017-04-04 This is the first comprehensive science-based textbook on the biology and ecology of the Baltic Sea, one of the world's largest brackish water bodies. The aim of this book is to

provide students and other readers with knowledge about the conditions for life in brackish water, the functioning of the Baltic Sea ecosystem and its environmental problems and management. It highlights biological variation along the unique environmental gradients of the brackish Baltic Sea Area (the Baltic Sea, Belt Sea and Kattegat), especially those in salinity and climate. pt;font-family:Arial,sans-serif; color:#262626>The first part of the book presents the challenges for life processes and ecosystem dynamics that result from the Baltic Sea's highly variable recent geological history and geographical isolation. The second part explains interactions between organisms and their environment, including biogeochemical cycles, patterns of biodiversity, genetic diversity and evolution, biological invasions and physiological adaptations. In the third part, the subsystems of the Baltic Sea ecosystem – the pelagic zone, the sea ice, the deep soft sea beds, the phytobenthic zone, the sandy coasts, and estuaries and coastal lagoons – are treated in detail with respect to the structure and function of communities and habitats and consequences of natural and anthropogenic constraints, such as climate change, discharges of nutrients and hazardous substances. Finally, the fourth part of the book discusses

monitoring and ecosystem-based management to deal with contemporary and emerging threats to the ecosystem's health.

Boutcher,2003-08-27 This book was commissioned by Somerset Health Authority to provide an updated overview of the case for exercise and mental health promotion.

Data-Centric Business and Applications Dmytro Ageyev,Tamara Radivilova,Natalia

Kryvinska,2020-01-03 Building on the authors' previous work, this book addresses key processes and procedures used in information/data processing and management. Modern methods of business information processing, which draw on artificial intelligence, big data, and cloud-based storage and processing, are opening exciting new opportunities for doing business on the basis of information technologies. Thus, in this third book, the authors continue to explore various aspects – technological as well as business and social – of the information industries. Further, they analyze the challenges and opportunities entailed by these kinds of business.
