Composites Applications Tom Drozda, 1989 The rapidly growing field of composite materials provides opportunities for the manufacturing engineer in cost savings and wider material selection. Because composites can be tailored to specific mechanical requirements, new application doors will continue to open. It is hope that the publication of the papers in this volume will stir the imagination of the reader to increase the list of composite uses in manufacturing.

Medicinal and Aromatic Plants of the World - Africa Volume 3 Mohamed Neffati, Hanen Najjaa, Ákos Máthé, 2017-09-07 This volume in the series is devoted to Africa, a continent that possesses a vast treasure of medicinal plants and has produced some exclusive materials for the world market. This volume is expected to strengthen the medicinal plant sector in African countries by making comprehensive information on medicinal and aromatic plants available to policy-makers and entrepreneurs. It can be used to frame effective policies and create an environment conducive to the growth of the plant-based medicine industry, bringing economic benefit to African nations. It will help health organizations to improve the health of their people by using their own resources and a less expensive system of medicine, which is accepted by African society. It could

also lead scientific communities to increase R&D activities in the field.
