Mobile Suit Gundam WING 9 Katsuyuki Sumizawa,Yoshiyuki Tomino,Hajime Yatate,2018-11-13 One of the biggest anime/manga properties of all time returns with the release of Mobile Suit Gundam Wing. A longtime hit of the Cartoon Network, Gundam Wing remains one of the most recognized Japanese titles in recent history spinning off a number of movie, books, and model kit collections. The Glory of Losers retells the original WING story by incorporating elements of the anime and its recent light novel adaptations. Following the actions of five fighters and their mobile suits (large robots made for destruction), Gundam Wing is a heavily political, dramatic action work that is centered around a war between Earth and its surrounding colonies in space.

Reinforced Concrete Beams, Columns and Frames Jostein Hellesland,Noël Challamel,Charles Casandjian,Christophe Lanos,2013-02-13 This book is focused on the theoretical and practical design of reinforced concrete beams, columns and frame structures. It is based on an analytical approach of designing normal reinforced concrete structural elements that are compatible with most international design rules, including for instance the European design rules – Eurocode 2 – for reinforced concrete structures. The book tries to distinguish between what belongs to the structural design philosophy of such structural elements (related to strength of materials arguments) and what belongs to the design rule aspects associated with specific characteristic data (for the material or loading parameters). A previous book, entitled Reinforced Concrete Beams, Columns and Frames – Mechanics and Design, deals with the fundamental aspects of the mechanics and design of reinforced concrete in general, both related to the Serviceability Limit State (SLS) and the Ultimate Limit State (ULS), whereas the current book deals with more advanced ULS aspects, along with instability and second-order analysis aspects. Some recent research results including the use of non-local mechanics are also presented. This book is aimed at Masters-level students, engineers, researchers and teachers in the field of reinforced concrete design. Most of the books in this area are very practical or code-oriented, whereas this book is more theoretically based, using rigorous mathematics and mechanics tools. Contents 1. Advanced Design at Ultimate Limit State (ULS). 2. Slender Compression Members – Mechanics and Design. 3. Approximate Analysis Methods. Appendix 1. Cardano's Method. Appendix 2. Steel Reinforcement Table. About the Authors Jostein Hellesland has been Professor of Structural Mechanics at the University of Oslo, Norway since January 1988. His contribution to the field of stability has been recognized and magnified by many high-quality papers in famous international journals such as Engineering Structures, Thin-Walled Structures, Journal of Constructional Steel Research and Journal of Structural Engineering. Noël Challamel is Professor in Civil Engineering at UBS, University of South Brittany in France and chairman of the EMI-ASCE Stability committee. His contributions mainly concern the dynamics, stability and inelastic behavior of structural components, with special emphasis on Continuum Damage Mechanics (more than 70 publications in International peer-reviewed journals). Charles Casandjian was formerly Associate Professor at INSA (French National Institute of Applied Sciences), Rennes, France and the chairman of the course on reinforced concrete design. He has published work on the mechanics of concrete and is also involved in creating a web experience for teaching reinforced concrete design – BA-CORTEX. Christophe Lanos is Professor in Civil Engineering at the University of Rennes 1 in France. He has mainly published work on the mechanics of concrete, as well as other related subjects. He is also involved in creating a web experience for teaching reinforced concrete design – BA-CORTEX.

Arnold Wesker Reade W. Dornan,2014-05-01 The only collection of essays on one of Britain's Angry Young Men, this book contains discussions of most of Wesker's published plays with an emphasis on the more recent works. Essays reevaluate the plays that made Wesker a household name in Britain (the Trilogy, The Kitchen , and Chips with Everything). Clive Barker, co-director of Centre 42, gives a fresh account of that movement, and playwright Paul Levitt provides a previously unrecorded history of Caritas, Blood Libel, and Shylock. A personal profile of Wesker by novelist Margaret Drabble is reprinted from an earlier article. Original essays cover the theory and practice of theatre-Wesker's in-text stage directions, British television's adaptation of his plays, and an actor's and a director's perspectives on working with the playwright. Major international Weskerian critics are assembled here: Klaus Peter Möller and Heiner Zimmermann from Germany; Rossana Bonadei, Angela Locatelli, and Alessandra Marzola from Italy; Keith Gore, Glenda Leeming, Martin Priestman, Jeremy Ridgman, Margaret Rose, and Robert Wilcher from Great Britain; Menakshi Ponnuswami from India; Robert Gross, Kimball King, and Robert Skloot from the United States. These essays take a wide range of critical approaches from an exploration of gender, to semiotics, biography, and the New Historicism. This is the most comprehensive collection of criticism on Arnold Wesker to date. Every major Weskerian scholar writing in English has contributed a piece to this casebook. Originating in Germany, Italy, Great Britain, India, and the United States, their essays create an international cultural context for Wesker's plays. They also position his work among his contemporaries, in his historical era, and in the political and theatrical environment that defines his world. Furthermore, they form a biographical profile of Wesker, often giving us firsthand accounts of turning points in his career. Finally, some essays evaluate and interpret the major plays, dissecting and scrutinizing the formal elements that make them distinct. Their critical approaches are varied in that they make liberal use of semiotics, Bakhtinian and communication theory, cultural studies, and traditional readings. Their contributions compose a multi-faceted view of Wesker's life

and work setting out fresh arguments for all his plays.
