*Remembering and Disremembering the Dead* Floris Tomasini, 2017-08-01 This book is open access under a CC BY 4.0 licence. This book is a multidisciplinary work that investigates the notion of posthumous harm over time. The question what is and when is death, affects how we understand the possibility of posthumous harm and redemption. Whilst it is impossible to hurt the dead, it is possible to harm the wishes, beliefs and memories of persons that once lived. In this way, this book highlights the vulnerability of the dead, and makes connections to a historical oeuvre, to add critical value to similar concepts in history that are overlooked by most philosophers. There is a long historical view of case studies that illustrate the conceptual character of posthumous punishment; that is, dissection and gibbetting of the criminal corpse after the Murder Act (1752), and those shot at dawn during

the First World War. A long historical view is also taken of posthumous harm; that is, body-snatching in the late Georgian period, and organ-snatching at Alder Hey in the 1990s.

It establishes the study of pop culture and its language as a serious subfield within language education and applied linguistics and explores how studies of pop culture, its language, and its non-linguistic affordances can inform language education at various levels of proficiency and with various learner populations. Presenting a broad range of quantitative and qualitative research approaches including case studies on how pop culture has been used successfully in language education in and beyond the classroom, this book will be of great interest for academics, researchers, and students in the field of language education, applied linguistics, psycholinguistics, and sociolinguistics, as well as for language teachers and materials developers.
