On Their Own Terms Benjamin A. Elman, 2009-07-01 In *On Their Own Terms*, Benjamin A. Elman offers a much-needed synthesis of early Chinese science during the Jesuit period (1600-1800) and the modern sciences as they evolved in China under Protestant influence (1840s-1900). By 1600 Europe was ahead of Asia in producing basic machines, such as clocks, levers, and pulleys, that would be necessary for the mechanization of agriculture and industry. In the seventeenth and eighteenth centuries, Elman shows, Europeans still sought from the Chinese their secrets of producing silk, fine textiles, and porcelain, as well as large-scale tea cultivation. Chinese literati borrowed in turn new algebraic notations of Hindu-Arabic origin, Tychonic cosmology, Euclidian geometry, and various computational advances. Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. In this book, Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries, under the influence of both Jesuit and Protestant missionaries. In the end, he argues, the Chinese produced modern science on their own terms.

Proceedings of the 2023 2nd International Conference on Economics, Smart Finance and Contemporary Trade (ESFCT 2023) Faruk Balli, Hui Nee Au Yong, Sikandar Ali Qalati, Ziqiang Zeng, 2023-11-11 This is an open access book. The relationship between international trade and economic development is mutual: foreign trade is the driving force of economic growth, and higher export level means that a country has the means to improve its import level. The growth of exports also tends to change the investment fields of the countries concerned. Exports make a country gain the benefits of economies of scale, and competition in the world market will put pressure on a country's export industry. A growing export sector will also encourage domestic and foreign investment. The concept of financial development actually means that the financial structure has changed to a certain extent. This change is not only the change of time, but also the change of internal transaction flow. International trade is known as the driving force of the development of human science and technology, and has created countless employment

opportunities worldwide. It is also international trade that has led to the formation of industrial division worldwide. International trade, from its name, can be seen as trade between different countries, and the financial development level of a country will have a direct impact on the trend of international trade, so the purchasing power will be stronger. In this case, more countries are willing to increase import and export trade, which can not only increase their income, but also increase the relationship between countries. The 2nd International Academic Conference on Economics, Smart Finance, and Contemporary Trade (ESFCT 2023) will be held on July 28-30, 2023 in Dali, China. The purpose of ESFCT 2023 is to explore the relationship between economy, smart finance and contemporary trade. Experts and scholars in relevant fields are welcome to participate in ESFCT 2023.

delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.
