New Approaches to Cinematic Space Filipa Rosário,Iván Villarmea Álvarez,2019-01-03 New Approaches to Cinematic Space aims to discuss the process of creation of cinematic spaces through moving images and the subsequent interpretation of their purpose and meaning. Throughout seventeen chapters, this edited collection will attempt to identify and interpret the formal strategies used by different filmmakers to depict real or imaginary places and turn them into abstract, conceptual spaces. The contributors to this volume will specifically focus on a series of systems of representation that go beyond the mere visual reproduction of a given location to construct a network of meanings that ultimately shapes our spatial worldview.

Nanotechnology in Space Maria Letizia Terranova,Emanuela Tamburri,2021-09-14 This book presents selected topics on nanotechnological applications in the strategic sector of space. It showcases some current activities and multidisciplinary approaches that have given an unprecedented control of matter at the nanoscale and will enable it to withstand the unique space environment. It focuses on the outstanding topic of dual-use nanotechnologies, illustrating the mutual benefits of key enabling materials that can be used successfully both on earth and in space. It highlights the importance of space as a strategic sector in the global economy, with ever-increasing related businesses worldwide. In this light, it dedicates a chapter to the analysis of current and future markets for space-related nanotechnological products and applications.

Parameter Estimation and Hypothesis Testing in Linear Models Karl-Rudolf Koch,1999-04 The necessity to publish the second edition of this book arose when its third German edition had just

been published. This second English edition is therefore a translation of the third German edition of *Parameter Estimation and Hypothesis Testing in Linear Models*, published in 1997. It differs from the first English edition by the addition of a new chapter on robust estimation of parameters and the deletion of the section on discriminant analysis, which has been more completely dealt with by the author in the book *Bayesian Inference with Geodetic Applications*, Springer-Verlag, Berlin Heidelberg New York, 1990. Smaller additions and deletions have been incorporated, to improve the text, to point out new developments or to eliminate errors which became apparent. A few examples have been also added. I thank Springer-Verlag for publishing this second edition and for the assistance in checking the translation, although the responsibility of errors remains with the author. I also want to express my thanks to Mrs. Ingrid Wahl and to Mrs. Heidemarlen Westhiiuser who prepared the second edition. Bonn, January 1999 Karl-Rudolf Koch Preface to the First Edition This book is a translation with slight modifications and additions of the second German edition of *Parameter Estimation and Hypothesis Testing in Linear Models*, published in 1987.

The Blue Lantern and Other Stories Victor Pelevin, 1997 Comic stories by a Russian writer. In *Hermit and Six Toes*, chickens debate the nature of the world, which is ruled by bloodthirsty gods in white coats, while in *Mid-Game*, young Communist activists change sex to become hard-currency prostitutes.

Transport Systems of Russian Cities Mikhail Blinkin, Elena Koncheva, 2016-11-24 This volume discusses post-socialist urban transport functioning and development in Russia, within the context of the country's recent transition towards a market economy. Over the past twenty-five years, urban transport in Russia has undergone serious transformations, prompted by the transitioning economy. Yet, the lack of readily available statistical data has led to a gap in the inclusion of Russia in the

body of international transport economics research. By including ten chapters of original, cutting-edge research by Russian transport scholars, this book will close that gap. Discussing topics such as the relationship between urban spatial structure and travel behavior in post-soviet cities, road safety, trends and reforms in urban public transport development, transport planning and modelling, and the role of institutions in post-soviet transportation management, this book provides a comprehensive survey of the current state of transportation in Russia. The book concludes with a forecast for future travel development in Russia and makes recommendations for future policy. This book will be of interest to researchers in transportation economics and policy as well as policy makers and those working in the field of urban and transport planning.

Autobusy a trolejbusy východního bloku Harák Martin,2013-11-27 Autobusy a trolejbusy mají nepopiratelné kouzlo: od starých autobusů, které se cestou do hor plné lyží šplhaly do zatáček, přes tlačence v městské hromadné dopravě až po moderní dálkové vozy, jimiž lze pohodlně cestovat přes půl kontinentu. Mnoho pozoruhodných strojů, často velmi progresivní konstrukce, vzniklo v druhé polovině 20. století i na naší straně bývalé železné opony, v továrnách tzv. východního bloku. Tato kniha nabízí v encyklopedické podobě přehled autobusů, trolejbusů i zajímavých nerealizovaných prototypů, které se vyráběly v letech 1945-1990 v jednotlivých zemích socialistického tábora, doplněný unikátními fotografiemi a tabulkami technických údajů. Neomezuje se ovšem jen na suchá fakta - výklad je doplněn mnoha zajímavostmi a nečekanými souvislostmi, díky nimž se před čtenáři otevírá plastický obraz jednoho segmentu dějin techniky doby nedávno minulé.
