The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice, 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's

recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

The Talent Code Daniel Coyle, 2009-04-28 What is the secret of talent? How do we unlock it? This groundbreaking work provides readers with tools they can use to maximize potential in themselves and others. Whether you're coaching soccer or teaching a child to play the piano, writing a novel or trying to improve your golf swing, this revolutionary book shows you how to grow talent by tapping into a newly discovered brain mechanism. Drawing on cutting-edge neurology and firsthand research gathered on journeys to nine of the world's talent hotbeds—from the baseball fields of the

Caribbean to a classical-music academy in upstate New York—Coyle identifies the three key elements that will allow you to develop your gifts and optimize your performance in sports, art, music, math, or just about anything.

- **Deep Practice** Everyone knows that practice is a key to success. What everyone doesn't know is that specific kinds of practice can increase skill up to ten times faster than conventional practice.
- **Ignition** We all need a little motivation to get started. But what separates truly high achievers from the rest of the pack? A higher level of commitment—call it passion—born out of our deepest unconscious desires and triggered by certain primal cues. Understanding how these signals work can help you ignite passion and catalyze skill development.
- **Master Coaching** What are the secrets of the world's most effective teachers, trainers, and coaches? Discover the four virtues that enable these “talent whisperers” to fuel passion, inspire deep practice, and bring out the best in their students. These three elements work together within your brain to form myelin, a microscopic neural substance that adds vast amounts of speed and accuracy to your movements and thoughts. Scientists have discovered that myelin might just be the holy grail: the foundation of all forms of greatness, from Michelangelo's to Michael Jordan's. The good news about myelin is that it isn't fixed at birth; to the contrary, it grows, and like anything that grows, it can be cultivated and nourished. Combining revelatory analysis with illuminating examples of regular people who have achieved greatness, this book will not only change the way you think about talent, but equip you to reach your own highest potential.

Seagoing Ships and Seamanship in the Bronze Age Levant Shelley Wachsmann, 2018-05-04 During the Bronze Age, the ancient societies that ringed the Mediterranean, once mostly separate and isolate, began to reach across the great expanse of sea to conduct trade, marking an age of immense cultural growth and technological development. These intersocietal lines of communication and paths for commerce relied on rigorous open-water travel. And, as a potential superhighway, the Mediterranean demanded much in the way of seafaring knowledge and innovative ship design if it were to be successfully navigated. In *Seagoing Ships and Seamanship in the Bronze Age Levant* Shelley Wachsmann presents a one-of-a-kind comprehensive examination of how the early eastern Mediterranean cultures took to the sea--and how they evolved as a result. The author surveys the blue-water ships of the Egyptians, Syro-Canaanites, Cypriots, Early Bronze Age Aegeans, Minoans, Mycenaean, and Sea Peoples, and discusses known Bronze Age shipwrecks. Relying on archaeological, ethnological, iconographic, and textual evidence, Wachsmann delivers a fascinating and intricate rendering of virtually every aspect of early sea travel--from ship construction and propulsion to war on the open water, piracy, and laws pertaining to conduct at sea. This broad study is further enhanced by contributions from other renowned scholars. J. Hoftijzer and W. H. van Soldt offer new and illuminating translations of Ugaritic and Akkadian documents that refer to seafaring. J. R. Lenz delves into the Homeric Greek lexicon to search out possible references to the birdlike

shapes that adorned early ships' stem and stern. F. Hocker provides a useful appendix and glossary of nautical terms, and George F. Bass's foreword frames the study's scholarly significance and discusses its place in the nautical archaeological canon. This book brings together for the first time the entire corpus of evidence pertaining to Bronze Age seafaring and will be of special value to archaeologists, maritime historians, philologists, and Bronze Age textual scholars. Offering an abundance of line drawings and photographs and written in a style that makes the material easily accessible to the layperson, Wachsmann's study is certain to become a standard reference for anyone interested in the dawn of sea travel.

White Cargo Don Jordan, Michael Walsh, 2008-03-08 White Cargo is the forgotten story of the thousands of Britons who lived and died in bondage in Britain's American colonies. In the seventeenth and eighteenth centuries, more than 300,000 white people were shipped to America as slaves. Urchins were swept up from London's streets to labor in the tobacco fields, where life expectancy was no more than two years. Brothels were raided to provide breeders for Virginia. Hopeful migrants were duped into signing as indentured servants, unaware they would become personal property who could be bought, sold, and even gambled away. Transported convicts were paraded for sale like livestock. Drawing on letters crying for help, diaries, and court and government archives, Don Jordan and Michael Walsh demonstrate that the brutalities usually associated with black slavery alone were perpetrated on whites throughout British rule. The trade ended with American independence, but the British still tried to sell convicts in their former colonies, which prompted one of the most audacious plots in Anglo-American history. This is a saga of exploration and cruelty spanning 170 years that has been submerged under the overwhelming memory of black slavery. White Cargo brings the brutal, uncomfortable story to the surface.

An Aqueous Territory Ernesto Bassi, 2016-12-02 In *An Aqueous Territory* Ernesto Bassi traces the configuration of a geographic space he calls the transimperial Greater Caribbean between 1760 and 1860. Focusing on the Caribbean coast of New Granada (present-day Colombia), Bassi shows that the region's residents did not live their lives bounded by geopolitical borders. Rather, the cross-border activities of sailors, traders, revolutionaries, indigenous peoples, and others reflected their perceptions of the Caribbean as a transimperial space where trade, information, and people circulated, both conforming to and in defiance of imperial regulations. Bassi demonstrates that the islands, continental coasts, and open waters of the transimperial Greater Caribbean constituted a space that was simultaneously Spanish, British, French, Dutch, Danish, Anglo-American, African, and indigenous. Exploring the lived geographies of the region's dwellers, Bassi challenges preconceived notions of the existence of discrete imperial spheres and the inevitable emergence of independent nation-states while providing insights into how people envision their own futures and make sense of their place in the world.

The Tipping Point Malcolm Gladwell, 2006-11-01 From the bestselling author of *The Bomber Mafia*: discover Malcolm Gladwell's breakthrough debut and explore the science behind viral trends in business, marketing, and human behavior. The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products

and disseminating ideas. “A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world.” —Michael Lewis

The Witch of Blackbird Pond Elizabeth George Speare, 1958 Sixteen-year-old Kit Tyler is marked by suspicion and disapproval from the moment she arrives on the unfamiliar shores of colonial Connecticut in 1687. Alone and desperate, she has been forced to leave her beloved home on the island of Barbados and join a family she has never met. Torn between her quest for belonging and her desire to be true to herself, Kit struggles to survive in a hostile place. Just when it seems she must give up, she finds a kindred spirit. But Kit's friendship with Hannah Tupper, believed by the colonists to be a witch, proves more taboo than she could have imagined and ultimately forces Kit to choose between her heart and her duty. Elizabeth George Speare won the 1959 Newbery Medal for this portrayal of a heroine whom readers will admire for her unwavering sense of truth as well as her infinite capacity to love.

Luxury Arts of the Renaissance Marina Belozerskaya, 2005-10-01 Today we associate the Renaissance with painting, sculpture, and architecture—the “major” arts. Yet contemporaries often held the “minor” arts—gem-studded goldwork, richly embellished armor, splendid tapestries and embroideries, music, and ephemeral multi-media spectacles—in much higher esteem. Isabella d’Este, Marchesa of Mantua, was typical of the Italian nobility: she bequeathed to her children precious stone vases mounted in gold, engraved gems, ivories, and antique bronzes and marbles; her favorite ladies-in-waiting, by contrast, received mere paintings. Renaissance patrons and observers extolled finely wrought luxury artifacts for their exquisite craftsmanship and the symbolic capital of their components; paintings and sculptures in modest materials, although discussed by some literati, were of lesser consequence. This book endeavors to return to the mainstream material long

marginalized as a result of historical and ideological biases of the intervening centuries. The author analyzes how luxury arts went from being lofty markers of ascendancy and discernment in the Renaissance to being dismissed as “decorative” or “minor” arts—extravagant trinkets of the rich unworthy of the status of Art. Then, by re-examining the objects themselves and their uses in their day, she shows how sumptuous creations constructed the world and taste of Renaissance women and men.

Seeing Like a State James C. Scott, 2020-03-17 “One of the most profound and illuminating studies of this century to have been published in recent decades.”—John Gray, New York Times Book Review Hailed as “a magisterial critique of top-down social planning” by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—New Yorker “A tour de force.”—Charles Tilly, Columbia University
