Tangram Puzzle Book, The: A New Approach To The Classic Pieces Goodman David Hillel, Garibi Ilan, 2018-05-25 THE TANGRAM is one of the oldest types of dissection puzzles in the world that originated from China. It traditionally requires the participant to arrange seven pieces (or tans) into a shape just by looking at the given silhouette. LEARN WHILE PLAYING The puzzles in this unique book are fresh, innovative and compelling. The puzzle pieces are building units for puzzles that boost mental dexterity with a variety of challenges from various fields of recreational mathematics. Come on and play with symmetry puzzles, cover-up puzzles and self-similarity puzzles to increase your skill and mental acuity! NEW PUZZLE DESIGNS To add variety and challenge, some of the puzzles may not use all seven pieces of the Tangram set, while others may use pieces from two or more sets. The authors utilize a creative twist in this collection that is different from classic Tangram puzzles: Most of the puzzles do not allow connections between the pieces unless they share a common edge. With this slight change to the rules, an entirely new universe of Tangram puzzles and challenges is unleashed to delight the puzzle solver! PROVIDES HOURS OF FUN The majority of the puzzles in this book are new and original. They range in difficulty to suit various levels of puzzle enthusiasts. Some selections are based upon famous classic puzzles while others are modified to stimulate and captivate the puzzlist as they have done for more than a thousand years! The Tangram Puzzle Book David Goodman, Ilan Garibi, 2018-05-28 The Tangram is one of the most ancient puzzles in the world, focused on deciphering silhouettes composed with the seven pieces. This book presents a collection of totally different types of puzzles. The puzzles we present here use the pieces as building blocks only, and present many versatile challenges, from all types of recreational mathematics fields. For example, here you will find symmetry puzzles, cover-up puzzles and even a Poker-related puzzle. In several puzzles we will use not all seven pieces but a subset of them, and there are also puzzles for which you will need to join all pieces from two Tangram sets. From the moment we changed the rules (using the seven pieces to decipher silhouettes) we felt that the sky is the limit! There is something magical and enchanting in those seven pieces that enabled us to find many puzzles and challenges! Almost all the puzzles presented are new, unique and original. Some are based on classic puzzles, as well as more modern ones, modified and presented with using the set of Tangram pieces--
