SIPRI Yearbook 1994 Stockholm International Peace Research Institute,1994 The SIPRI Yearbook 1994 continues SIPRI's review of the latest developments in nuclear weapons, world military expenditure, the international arms trade and arms production, chemical and biological weapons, the proliferation of ballistic missile technology, armed conflicts in 1993, and nuclear and conventional arms control. The Origins and Development of the European Union 1945-2008 Martin Dedman,2010 The new edition of this accessible introduction to the history of the European Union (EU) has been fully revised and updated to reflect the significant changes within the EU over the past decade. The book is ideal introductory reading for those new to the study of the EU who want a concise and up-to-date account of the political and economic development of the EU.

An Imperfect Union Michael J Baun,2018-02-20 Exploring the politics of European integration, Michael Baun argues that the end of the Cold War and German unification have created a new set of geopolitical realities in Europe that have profoundly affected the nature and dynamics of European union. His primary focus is the high politics of European integration after 1989, especially the role of the Franco-German relationship in the Maastricht Treaty process.Acknowledging the important roots of the treaty in economic and institutional developments prior to 1989, Baun argues that Maastricht principally can be understood as a response by the EU and its member states to German unification and the end of the cold war. In making this argument, he departs from more conventional neofunctionalist or institutionalist interpretations of European integration.After providing the historical background of developments before 1989, Baun weighs the decision to launch parallel intergovernmental conferences on monetary and political union in 1990 and describes in detail the negotiations and treaty outcomes in each of these areas. He then examines the difficult ratification of the Maastricht treaty in 1992-1993, in the face of growing popular opposition and economic and monetary instability. The book concludes with an analysis of the future prospects for European union in the post-Maastricht era, as the EU approaches its next major intergovernmental conference in 1996.

The EU and the European Security Strategy Sven Biscop,Jan Joel Andersson,2007-09-12 The European Security Strategy (ESS) has become an important reference framework for the EU since its inception in 2003. Without strategy an actor can only really be a ‘reactor’ to events and developments. In the ESS the EU now has a strategy, with which it has the potential of shifting boundaries and shaping the World. This volume explores this statement and examines the underlying concepts and implementation of the ESS as a judging tool of all the European Union’s external actions. Contributors, closely involved in the early debate leading up to the ESS, assess questions such as how the strategy has shaped EU policy, how it relates to existing policies but also how it has added value to these policies and whether the strategy’s objectives are sufficient to safeguard EU interests or whether they should be reviewed and added too. The outline of the strategy itself is followed; addressing its historical and conceptual context, the threat assessment, the multilateral and regional policies of the EU, its military capabilities and its strategic partnerships. This book offers a comprehensive vision of how the EU can achieve the ambitious objectives of the European Security Strategy and become an effective global actor as the strategy helps to forge a global Europe. The EU and the European Security Strategy will be of great interest to students and researchers of European politics and security studies.

Global Arms Production Ethan B. Kapstein,1992 Why do states collaborate in the production of advanced weaponry? Under what conditions do such collaborative arrangements succeed? What are the implications of armaments collaboration for the international economic and security environments? Arms collaboration is not a new phenomenon, but there is increasing debate-both in the United States and abroad-over the associated costs and benefits. Critics charge that collaborative projects result in technology give-aways, the creation of defense-industrial competitors, and the loss of domestic jobs. Supporters argue that the very same projects strengthen alliance relations, provide access to new technology, and result in arms sales which might otherwise have been lost to foreign competitors. In Global Arms Production these issues are addressed by distinguished contributors such as Ethan B. Kapstein, Jacques S. Gansler, William Keller, Joel L. Johnson, Jack Nun, Robert H. Trice, C. Michael Farr, Grant T. Hammond and Stanley Sienkiewicz. Co-published with the Center for International Affairs of Harvard University.

The Origins of NATO Joseph Smith,1990 A collection of papers by scholars from Britain, France, Germany, Holland and the United States, highlighting the complex nature of the diplomatic process that led to the North Atlantic Treaty in 1949.
