Interacting with Presence Giuseppe Riva, John Waterworth, Dianne Murray, 2014-10-08 The experience of using and interacting with the newest Virtual Reality and computing technologies is profoundly affected by the extent to which we feel ourselves to be really 'present' in computer-generated and -mediated augmented worlds. This feeling of 'Presence', of "being inside the mediated world", is key to understanding developments in applications such as interactive entertainment, gaming, psychotherapy, education, scientific visualisation, sports training and rehabilitation, and many more. This edited volume, featuring contributions from internationally renowned scholars, provides a comprehensive introduction to and overview of the topic of mediated presence - or 'tele-presence' - and of the emerging field of presence research. It is intended for researchers and graduate students in human-computer interaction, cognitive science, psychology, cyberpsychology and computer science, as well as for experienced professionals from the ICT industry. The editors are all well-known professional researchers in the field: Professor Giuseppe Riva from the Catholic University of Milan, Italy; Professor John Waterworth from Umeå University, Sweden; Dianne Murray, an HCI Consultant and editor of the journal "Interacting with Computers".

One year later, Doom opened a portal to hell that flooded university and office networks with rocket launchers and cyberdemons. Then came Quake, a CD-ROM packed with slick 3D graphics and online-ready gameplay that shook the games

industry to its core. For some of the designers at id Software, Quake marked the end of an era. Others were just getting warmed up. **Rocket Jump: Quake and the Golden Age of First-Person Shooters** explores the making of id Software's seminal trilogy, uncovers the internal culture that simultaneously shaped and fractured id Software, and reveals the indelible mark Quake left on game designers, computing technology, and popular culture. ● Follow id Software designers John Carmack, John Romero, American McGee, Jennell Jaquays, Tim Willits, and more as Quake evolves from a medieval fantasy to the granddaddy of competitive shooters ● Learn about the making of other influential first-person shooters (FPS) games including Duke Nukem 3D, Star Wars: Dark Forces, and Team Fortress ● Sit in on the private meetings that decided the fate of legendary game designers
