Tetris Brian "Box" Brown,2016-11-01 For fans of Tetris on Apple TV+, read the true story of Henk Rogers, Alexey Pajitnov, and the perfect game. Simple yet addictive, Tetris delivers an irresistible, unending puzzle that has players hooked. Play it long enough and you'll see those brightly colored geometric shapes everywhere. You'll see them in your dreams. Alexey Pajitnov had big ideas about games. In 1984, he created Tetris in his spare time while developing software for the Soviet government. Once Tetris emerged from behind the Iron Curtain, it was an instant hit. Nintendo, Atari, Sega—game developers big and small all wanted Tetris. A bidding war was sparked, followed by clandestine trips to Moscow, backroom deals, innumerable miscommunications, and outright theft. In this graphic novel, New York Times–bestselling author Box Brown untangles this complex history and delves deep into the role games play in art, culture, and commerce. For the first time and in unparalleled detail, Tetris: The Games People Play tells the true story of the world's most popular video game.

Rutherford Chang The Container,2016-02-11 Game Boy Tetris is a bilingual (Eng/Jap) catalogue for an exhibition by the New York artist, Rutherford Chang, at The Container in Tokyo. His installation presents the artist's obsessive tendencies and preoccupation with repetitive activities, showcasing 1,764 videos of documentation of Chang's efforts to rise to Tetris world domination. Currently ranked #2 worldwide by Twin Galaxies, the official record-keeper. It's safe to say that Chang's sights are still on the top position and that he's not giving up anytime soon. The Container is a contemporary art gallery in Nakameguro, Tokyo. The gallery has opened in March 2011 to create a site that encourages people to engage with art installations and works, where the emphasis is on curation and the accessibility of contemporary art and ideas to the general public. As the name suggests, the physical space is no more than a constructed shipping container (485x180x177cm), made to measurements of old Japanese shipping containers, housed inside Bross hair salon, in one of Tokyo's most loved and trendy neighbourhoods. The Container invites Japanese and international artists to make site-specific installations four times a year. Each installation remains on view to the public for two-and-a-half months. The gallery receives extensive international coverage, including ArtAsiaPacific, Artforum, Hyperallergic, Glass Magazine, Art & Antiques Magazine, Dazed & Confused, Blouin Artinfo, Art-iT, Bijutsu-Techo/BT, NHK, Tokyo Art Beat, The Japan Times, and The Sunday Times, travel guides and in-flight magazines, to mention only a few. www.the-container.com

Mind-Blowing Modular Origami Byriah Loper,2016-10-11 Modular origami is the latest craze in paper folding! These three-dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins—to ornate flower-like spheres. Each piece of paper is held by the tension of the other papers—demonstrating the remarkable hidden properties of paper, which is at the same time flexible but also strong! Author Byriah Loper has been creating modular origami sculptures for just five years, but in that time, he's pushed the upper limits of the art form with some of the largest, most complex geometric paper constructions ever assembled. While many geo-modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open, linear wire frame approach, which results in a very complex-looking model that reveals the interior of its form. He exhibits his sculptures annually at the Origami USA convention in New York, and was recently a featured artist at the Surface to Structure exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy-to-follow diagrams and step-by-step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge, and the paper sculptures you create look fantastic on your desk or shelf!
