The Chinese Navy Institute for National Strategic Studies,2011-12-27 Tells the story of the growing Chinese Navy - The People's Liberation Army Navy (PLAN) - and its expanding capabilities, evolving roles and military implications for the USA. Divided into four thematic sections, this special collection of essays surveys and analyzes the most important aspects of China's naval modernization.

Naval Accidents, 1945-1988 William M. Arkin,Joshua Handler,1989

China's Evolving Surface Fleet Peter Dutton,Ryan D. Martinson,2017 Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin blue-water, or far-seas operations, helping the United States to predict the future nature of Chinese maritime missions. Submarine Hydrodynamics Martin Renilson,2018-04-20 This book covers specific aspects of submarine hydrodynamics in a very practical manner. The author reviews basic concepts of ship hydrodynamics and goes on to show how they are applied to submarines, including a look at the use of physical model experiments. The book is intended for professionals working in submarine hydrodynamics, as well as for advanced students in the field. This revised edition includes updated information on empirical methods for predicting the hydrodynamic manoeuvring coefficients, and for predicting the resistance of a submarine. It also includes new material on how to assess propulsors, and includes measures of wake distortion, which has a detrimental influence on propulsor performance. Additional information on safe manoeuvring envelopes is also provided. The wide range of references has been updated to include the latest material in the field.

Echelon Defense Ryan D. Martinson,2018 This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called echelon defense, involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. Iranian Naval Forces: A Tale of Two Navies Office of Naval Intelligence (U S),2017-06-21 This updated resource provides a more comprehensive history, including: Iran's Persian imperial past, the spread of Islam, and the Iran-Iraq War The Islamic Revolutionary Guard Corps Navy (IRGCN) emphasizes an asymmetric doctrine to ensure national security in the Persian Gulf against regional neighbors and foreign presence. The Islamic Republic of Iran Navy (IRIN) employs a more conventional doctrine and focuses on forward presence and naval diplomacy. Both navies have considerable equities and are well positioned to influence and leverage the Strait of Hormuz; a vital chokepoint for the flow of resources and international commerce. Illustrated with organizational charts, and photos of key Iranian leaders, including commanders within the Navy Command and Control Leadership, as well as rank insignia graphics, maps, ships, aircrafts, missile images, and more. Submarine Commander Paul R. Schratz,2013-07-24 A fascinating personal memoir of underwater combat in World War II, told by a man who played a major role in those dangerous operations. Frank and beautifully written, Submarine Commander's breezy style and irrepressible humor place it in a class by itself. This book will be of lasting value as a submarine history by an expert and as an enduring military and political analysis. In early 1943 the submarine USS Scorpion, with Paul R. Schratz as torpedo officer, slipped into the shallow waters east of Tokyo, laid a minefield, and made successful torpedo attacks on merchant shipping. Schratz participated in many more patrols in heavily mined Japanese waters as executive officer of the Sterlet and the Atule. At war's end he participated in the Japanese surrender, aided the release of American POWs, and had a key role in the disarming of enemy suicide submarines. He then took command of the revolutionary new Japanese submarine I-203 and returned it to Pearl Harbor. But this was far from the end of Schratz's submarine career. In 1949 he commissioned the ultramodern USS Pickerel, the most deadly submarine then afloat, and set a world's record in a 21-day, 5,200-mile submerged passage from Hong Kong to Honolulu. With the outbreak of the Korean War, the Pickerel was immediately sent to Korea to participate in secret intelligence operations only recently declassified and never before revealed in print. Schratz's broad military experience makes this a far from ordinary memoir.

China Military Power ,2019

Unrestricted Warfare Liang Qiao,Xiangsui Wang,2002 Three years before the September 11 bombing of the World Trade Center-a Chinese military manual called Unrestricted Warfare touted such an attack-suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in Unrestricted Warfare clearly demonstrates that the People's Republic of China is preparing to confront the United States and our allies by conducting asymmetrical or multidimensional attack on almost every aspect of our social, economic and political life.

War with China David C. Gompert,Astrid Stuth Cevallos,Cristina L. Garafola,2016-07-05 A Sino-U.S. war could take various, and unintended, paths. Because intense, reciprocal conventional counterforce attacks could inflict heavy losses and costs on both sides, leaders need options and channels to contain and terminate fighting.

The Paradox of Power David C. Gompert,2020 The second half of the 20th century featured a strategic competition between the United States

and the Soviet Union. That competition avoided World War III in part because during the 1950s, scholars like Henry Kissinger, Thomas Schelling, Herman Kahn, and Albert Wohlstetter analyzed the fundamental nature of nuclear deterrence. Decades of arms control negotiations reinforced these early notions of stability and created a mutual understanding that allowed U.S.-Soviet competition to proceed without armed conflict. The first half of the 21st century will be dominated by the relationship between the United States and China. That relationship is likely to contain elements of both cooperation and competition. Territorial disputes such as those over Taiwan and the South China Sea will be an important feature of this competition, but both are traditional disputes, and traditional solutions suggest themselves. A more difficult set of issues relates to U.S.-Chinese competition and cooperation in three domains in which real strategic harm can be inflicted in the current era: nuclear, space, and cyber. Just as a clearer understanding of the fundamental principles of nuclear deterrence maintained adequate stability during the Cold War, a clearer understanding of the characteristics of these three domains can provide the underpinnings of strategic stability between the United States and China in the decades ahead. That is what this book is about.

The PLA Navy Office of Naval Intelligence,2020-09-20 Released in 2015, Printed in Full COLOR The People's Liberation Army Navy (PLA(N)) has made significant strides in operationalizing as well as modernizing its force. Although the PLA(N)'s primary focus remains in the East Asia region, where China faces multiple disputes over the sovereignty of various maritime features and associated maritime rights, in recent years, the PLA(N) has increased its focus on developing blue-water naval capabilities. Over the long term, Beijing aspires to sustain naval missions far from China's shores. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 50-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com We include a Table of Contents on the back cover for quick reference. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers.

China's Incomplete Military Transformation Michael S. Chase,Jeffrey Engstrom,Tai Ming Cheung,Kristen A. Gunness,Scott Warren Harold,Susan Puska,Samuel K. Berkowitz,2015-02-13 Through extensive primary source analysis and independent analysis, this report seeks to answer a number of important questions regarding the state of China's armed forces. The authors found that the PLA is keenly aware of its many weaknesses and is vigorously striving to correct them. Although it is only natural to focus on the PLA's growing capabilities, understanding the PLA's weaknesses—and its self-assessments—is no less important.

Sustaining U.S. Nuclear Submarine Design Capabilities John Frederic Schank,2007 For the first time since the design of the first nuclear submarine, the U.S. Navy has no nuclear submarine design program under way, which raises the possibility that design capability could be lost. Such a loss could result in higher costs and delays when the next submarine design is undertaken, as well as risks to system performance and safety. The authors estimate and compare the costs and delays of letting design capability erode vs. those of alternative means of managing the workload and workforce over the gap in design demand and beyond. The authors recommend that the Navy consider stret.

The Smell of Kerosene National Aeronautics and Space Administration,Donald L. Mallick,Peter W. Merlin,2023-12-28 This book puts the reader in the pilot's seat for a day at the office unlike any other. The Smell of Kerosene tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.
