*Folding paper toys* Shari Lewis, 1965

*Papertoy Monsters* Brian Castleforte, 2010-12-29 A

breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), *Papertoy Monsters* offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the

hairy grandpa monster with his very own moustache collection.

**Little Monsters** Helene Brembeck, Karin M. Ekström, Magnus Mörck, 2007 This book is about stories of consumption beyond the culture - economy divide. By bringing along Actor Network Theory, entities that in conventional approaches are taken for granted, such as consumers, goods and companies proves to be unstable assemblages of humans, goods and technologies. We meet materialistic children and parents creating an intimate moment at McDonald's, car poolers trying to get out of the grip of individual transportation, young couples imagining a home in that odd reversal of private space, the furniture store and grown men practicing a hobby so close to childhood that it causes unease. These, and other examples, line that up as our monsters, ready to act out the drama. Considering that actor-network theory has its roots in narratology of Algirdas Greimas (1917-1992), what better use can one imagine for it than its application to the tales of consumption. In the best ANT-ian style, the book refuses to label people, things and phenomena with the received names. The message is: wait until the end of the story to see whether or not a big company wins over small consumers, or if behind a bewitching trademark hides a good fairy or a wicked witch. This collection challenges most of the common places about consumption, production, markets and consumers.

**Made to Play!** Joel Henriques, 2011-10-11 Delight young children and encourage play through unique handmade toys. From sewn and stuffed musical instruments to interlocking paper building blocks and wooden animal figurines, the projects in this book are meant to encourage open-ended play. Organized by kid-loving subjects, the toys here follow the themes of Zoo; House; Blocks, Cars & Trucks; Dress-Up; Music; and Art. Overall, the projects here are meant to stimulate imagination, build confidence through success and enjoyment, and enhance the bond between family and friends through the creation of unique, artistic handmade toys and crafts. The thirty-five projects in this

book include a variety of crafts, from drawing to sewing and light woodworking. The toys presented here are made out of wonderfully tactile materials—repurposed fabrics, wood, and paper—and invite opportunities for creative and imaginative play. Every project is easy to complete, made with accessible materials, and requires little time to make. The projects are simple enough that endless variation can come from the making of each, leaving enough room for you to make the item to suit your own personal interests. With a design aesthetic that is clean, simple, and modern, each project is presented with full-color photos and hand-drawn instructional illustrations and templates. Projects include: • Modern Doll House and Doll House Furniture • Portable Zoo Animals • Abstract Vertical Puzzle • Wooden Nature Scene • Bottle-Cap Tambourine • Exploration Cape • Modern Alphabet Game • Shadow Puppet Theater • And more!

This edition integrates gender, race, student training, and other important social issues throughout. Presents up-to-date coverage of growing issues such as the ethics of rushing to publish Discusses the use of text-similarity detecting software to reveal plagiarism and image analysis techniques for detecting data and image manipulation Features new material on current trends such as universal open access (OA) publishing, increased research metrics, new models for peer review, working for multiple employers, and “shadow labs” for individual scientists Includes access to a companion website with PowerPoint slides of case studies and figures Written by an experienced researcher and PhD mentor, *Research Ethics for Scientists: A Companion for Students*, Second Edition is an indispensable resource for graduate students, postdoctoral researchers, early-career professors, and scientists involved in teaching scientists-in-training.

"Angel particle" bearing properties of both particles and anti-particles, which was recently discovered by the Stanford team of experimental physicists, is usually associated with Majorana fermions (predicted in 1937 by Ettore Majorana). In this message we point out that particles bearing properties of both matter and anti-matter were as well predicted without any connexion with particle physics, but on the basis of pure mathematics, namely — neutrosophic logic which is a generalization of fuzzy and intuitionistic fuzzy logics in mathematics.
