Elements of Parametric Design Robert Francis Woodbury,2010 Pushed by practices wanting to produce novelty, computer-aided design systems are increasingly parametric - they represent designs that change with their input data. This book teaches what new knowledge and skills designers need in order to master the parametric and how they can learn and use them.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Mordin on Time Nick Mordin,2003-02 In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

Hand-drawn Perspectives and Sketches ,2021-05-14 ARCHITECTURAL RENDERING: HAND-DRAWN PERSPECTIVES & SKETCHES is a unique book in the form of a compendium of 412 hand-drawn perspectives, sketches, isometrics, axonometrics, paintings and posters collected personally from 27 renowned architects and artists. These drawings have been selected to represent as many styles, types, periods, and regions as possible. The architects and artists whose works have been included in this treatise belong to countries like India, Italy, Kenya, Peru, and the United States of America. They represent about four generations of illustrators - the eldest one was born in 1910 and the youngest one is 1995-born. This range covers a period of almost a century and thus is witness to the many styles and changing trends in architectural rendering. It is hoped that the drawings featured in this book are sufficient to inspire young minds to adopt, adapt and continue the trend of hand-drawn perspectives, sketches, and paintings. The drawings featured in this book are grouped into four Sections. These include: Graphic Section-1: PERSPECTIVES (224 drawings) Graphic Section-2: SKETCHES (108 drawings) Graphic Section-3: ISOMETRICS and AXONOMETRICS (34 drawings) Graphic Section-4: PAINTINGS and POSTERS (46 drawings) The book was conceived of and is presented as a reference book for the use of architects, artists, painters, sketchers, sculptors, and students of these related disciplines. It is hoped that this book will enable them to have an overview of different styles of architectural rendering in the last century and to draw inspiration to continue this art in today's digital world.
