PoC or GTFO Manul Laphroaig,2017-10-31 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like Reliable Code Execution on a Tamagotchi, ELFs are Dorky, Elves are Cool, Burning a Phone, Forget Not the Humble Timing Attack, and A Sermon on Hacker Privilege. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

The Brand Innovation Manifesto John Grant,2006-05-12 The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of The New Marketing Manifesto, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In The Brand Innovation Manifesto, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

My Search for Ramanujan Ken Ono,Amir D. Aczel,2016-04-20 The son of a prominent Japanese mathematician who came to the United States after World War II, Ken Ono was raised on a diet of high expectations and little praise. Rebelling against his pressure-cooker of a life, Ken determined to drop out of high school to follow his own path. To obtain his father's approval, he invoked the biography of the famous Indian mathematical prodigy Srinivasa Ramanujan, whom his father revered, who had twice flunked out of college because of his single-minded devotion to mathematics. Ono describes his rocky path through college and graduate school, interweaving Ramanujan's story with his own and telling how at key moments, he was inspired by Ramanujan and guided by mentors who encouraged him to pursue his interest in exploring Ramanujan's mathematical legacy. Picking up where others left off, beginning with the great English mathematician G.H. Hardy, who brought Ramanujan to Cambridge in 1914, Ono has devoted his mathematical career to understanding how in his short life, Ramanujan was able to discover so many deep mathematical truths, which Ramanujan believed had been sent to him as visions from a Hindu goddess. And it was Ramanujan who was ultimately the source of reconciliation between Ono and his parents. Ono's search for Ramanujan ranges over three continents and crosses paths with mathematicians whose lives span the globe and the entire twentieth century and beyond. Along the way, Ken made many fascinating discoveries. The most important and surprising one of all was his own humanity.

Sound and Music for the Theatre Deena Kaye,James LeBrecht,2015-09-25 Covering every phase of a theatrical production, this fourth edition of Sound and Music for the Theatre traces the process of sound design from initial concept through implementation in actual performances. The book discusses the early evolution of sound design and how it supports the play, from researching sources for music and effects, to negotiating a contract. It shows you how to organize the construction of the sound design elements, how the designer functions in a rehearsal, and how to set up and train an operator to run sound equipment. This instructive information is interspersed with 'war stores' describing real-life problems with solutions that you can apply in your own work, whether you're a sound designer, composer, or sound operator.

Sfera E Il Labirinto Manfredo Tafuri,1990 Tafuri's work is probably the most innovative and exciting new form of European theory since French poststructuralism and this book is probably the best introduction to it for the newcomer. ...

Submarine Commander Paul R. Schratz,2013-07-24 A fascinating personal memoir of underwater combat in World War II, told by a man who played a major role in those dangerous operations. Frank and beautifully written, Submarine Commander's breezy style and irrepressible humor place it in a class by itself. This book will be of lasting value as a submarine history by an expert and as an enduring military and political analysis. In early 1943 the submarine USS Scorpion, with Paul R. Schratz as torpedo officer, slipped into the shallow waters east of Tokyo, laid a minefield, and made successful torpedo attacks on merchant shipping. Schratz participated in many more patrols in heavily mined Japanese waters as executive officer of the Sterlet and the Atule. At war's end he participated in the Japanese surrender, aided the release of American POWs, and had a key role in the disarming of enemy suicide submarines. He then took command of the revolutionary new Japanese submarine I-203 and returned it to Pearl Harbor. But this was far from the end of Schratz's submarine career. In 1949 he commissioned the ultramodern USS Pickerel, the most deadly submarine then afloat, and set a world's record in a 21-day, 5,200-mile submerged passage from Hong Kong to Honolulu. With the outbreak of the Korean War, the Pickerel was immediately sent to Korea to participate in secret intelligence operations only recently declassified and never before revealed in print. Schratz's broad military experience makes this a far from ordinary memoir.

Transcendence Christopher McKitterick,2010-11 Humankind rushes toward self-destruction and must evolve or die. Our perspective: a scientist exploring an alien artifact on Triton, a teen-aged hacker in a city gone mad, three actors manipulated into igniting interplanetary war, the de-facto ruler of half the solar system, a soldier fighting in Africa to entertain his audience, an artificial intelligence facing personal crisis, and a cast of billions.-- Publisher description.

Narrative Mechanics Beat Suter,René Bauer,Mela Kocher,2021-05-31 What do stories in games have in common with political narratives? This book identifies narrative strategies as mechanisms for meaning and manipulation in games and real life. It shows that the narrative mechanics so clearly identifiable in games are increasingly used (and abused) in politics and social life. They have »many faces«, displays and interfaces. They occur as texts, recipes, stories, dramas in three acts, movies, videos, tweets, journeys of heroes, but also as rewarding stories in games and as narratives in society - such as a career from rags to riches, the concept of modernity or market economy. Below their surface, however, narrative mechanics are a particular type of motivational design - of game mechanics.

Peter Greenaway's Postmodern / Poststructuralist Cinema Paula Willoquet-Maricondi,Mary Alemany-Galway,2008-07-17 Since the 1960s, British multi-media artist Peter Greenaway has shocked and intrigued audiences with his avant-garde approach to filmmaking and other artistic ventures. From early experimental films to provocative features, Greenaway has deployed strategies associated with structuralist cinema, only to challenge or critique the very limits of that cinema and of film in general. In this collection of essays, scholars from a variety of disciplines explore various postmodern and poststructuralist aspects of Greenaway's films, starting with his early shorts and delving into his feature-length works, including The Draughtman's Contract, The Belly of an Architect, A Zed and Two Noughts, The Cook, the Thief, His Wife and Her Lover, The Baby of M%con, and The Pillow Book. Other artistic productions, including his paintings and installations are also discussed. These essays examine the filmmaker's position within British and avant-garde cinema and his interest in constructing and deconstructing representational systems. In the years since the first edition of this book, Greenaway has enjoyed continued success in creating hybridized media projects for the stage and screen, as evidenced by additional essays for this revised edition. A new chapter addresses how Dutch political events and Dutch art have been crucial in shaping Greenaway's aesthetic, focusing on The Draughtsman's Contract, the 1991 opera Writing to Vermeer, and Nightwatching, the audio-visual installation and 2007 film of the

same name, which were inspired by Rembrandt's Night Watch. Also new to this collection is an essay that examines Greenaway's most ambitious endeavor to date, The Tulse Luper Suitcases, which exists as four feature films, multiple websites, an online game, several books and installations, and a number of theatrical events. Peter Greenaway's Postmodern/Poststructuralist Cinema, Revised Edition explores the cultural, historical, and philosophical implications of this hybrid artist whose paintings, drawings, exhibitions, installations, and operatic productions are an intrinsic part of his work in film. This collection of diverse essays, which includes two texts by Greenaway, two interviews with the director, and a revised filmography, will interest students, teachers, critics and lovers of both postmodern art and cinema.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Andean Cocaine Paul Gootenberg, 2009-06-01 Illuminating a hidden and fascinating chapter in the history of globalization, Paul Gootenberg chronicles the rise of one of the most spectacular and now illegal Latin American exports: cocaine. Gootenberg traces cocaine's history from its origins as a medical commodity in the nineteenth century to its repression during the early twentieth century and its dramatic reemergence as an illicit good after World War II. Connecting the story of the drug's transformations is a host of people, products, and processes: Sigmund Freud, Coca-Cola, and Pablo Escobar all make appearances, exemplifying the global influences that have shaped the history of cocaine. But Gootenberg decenters the familiar story to uncover the roles played by hitherto obscure but vital Andean actors as well--for example, the Peruvian pharmacist who developed the techniques for refining cocaine on an industrial scale and the creators of the original drug-smuggling networks that decades later would be taken over by Colombian traffickers. Andean Cocaine proves indispensable to understanding one of the most vexing social dilemmas of the late twentieth-century Americas: the American cocaine epidemic of the 1980s and, in its wake, the seemingly endless U.S. drug war in the Andes.
