Loes Bogers

Music Scenes Andy Bennett, Richard A. Peterson, 2004 While more than 80 percent of the world's commercial music is controlled by four multinational firms, most music is made and enjoyed in diverse situations divorced from such corporate behemoths. These fourteen original essays examine the fascinating world of music scenes, those largely inconspicuous sites where clusters of musicians, producers, and fans explore their common musical tastes and distinctive lifestyle choices. Although most music scenes come and go with hardly a trace, they nevertheless give immense satisfaction to their participants, and a few - New York bop jazz, Merseybeat, Memphis rockabilly, London punk, Bronx hip-hop - achieve fame and spur musical innovations. To date, serious study of the scenes phenomenon has focused mainly on specific music scenes while paying less attention to recurrent dynamics of scene life, such as how individuals construct and negotiate scenes to the various activities. This volume remedies that neglect. The editors distinguish between three types of scenes - local, translocal, and virtual - which provide the organizing framework for the essays. Aspects of local scenes, which are confined to specific areas, are explored through essays on Chicago blues, rave, karaoke, teen pop, and salsa. The section on translocal scenes, which involve the coming together of scattered local scenes around a particular type of music and lifestyle, includes articles on Riot Grrrls, goths, art music, and anarcho-punk. Aspects of virtual scenes, in which fans communicate via the internet, are illustrated using alternative country, the Canterbury sound, postrock, and Kate Bush fans. Also included is an essay that shows how the social conditions in places where jazz was made influenced that music's development.

The Critical Makers Loes Bogers, 2019

The Undivided Universe David Bohm, Basil J. Hiley, 2006-01-16 First published in 1995. Routledge is an imprint of Taylor & Francis, an informa company.

Unlearning Exercises Binna Choi, Yolande Van Der Heide, 2019-02-19 Learning is often progress-oriented, institutionally driven, and focused on the accumulation of knowledge, skills and behaviour. In contrast, unlearning is directed towards embodied forms of knowledge and the (un)-conscious operation of ways of thinking and doing. Unlearning denotes an active critical investigation of normative structures and practices in order to become aware and get rid of taken-for-granted truths of theory and practice. This book shares the process of unlearning, taking art and art institutions as sites for unlearning and Casco Art Institute: Working for the Commons as an experimental case. Unlearning at an art organization has led to collective unlearning exercises that express the conditions, modalities, and implications of a particular group of art workers. The business of running an art institution is irrevocably tied up with the anxiety and stress of constantly being busy making things visible in competitive and hierarchical conditions. This busyness causes the habitual undervaluing of what often remains invisible?so-called reproductive works such as cleaning, fixing, and caring. Unlearning processes make way for social transformations that lead towards the culture of equality and difference which we call the culture of the commons.

New Developments on Computational Methods and Imaging in Biomechanics and Biomedical Engineering João Manuel R. S. Tavares, Paulo Rui Fernandes, 2019-07-26 This book gathers selected, extended and revised

contributions to the 15th International Symposium on Computer Methods in Biomechanics and Biomedical Engineering (CMBBE2018), and the 3rd Conference on Imaging and Visualization, which took place on 26-29 March, 2018, in Lisbon, Portugal. The respective chapters highlight cutting-edge methods, e.g. new algorithms, image analysis techniques, and multibody modeling methods; and new findings obtained by applying them in biological and/or medical contexts. Original numerical studies, Monte Carlo simulations, FEM analyses and reaction-diffusion models are described in detail, together with intriguing new applications. The book offers a timely source of information for biologists, engineers, applied mathematicians and clinical researchers working on multidisciplinary projects, and is also intended to foster closer collaboration between these groups.

Wheelock's Latin Frederic M. Wheelock, 2010-10-12 The classic, single-volume introductory Latin textbook, introduced in 1956 and still the bestselling and most highly regarded textbook of its kind. Wheelock's Latin, sixth edition, revised, has all the features that have made it the best-selling single-volume beginning Latin textbook, many of them revised and expanded: o 40 chapters with grammatical explanations and readings based on ancient Roman authors o Self-tutorial exercises with an answer key for independent study o An extensive English-Latin/ Latin-English vocabulary section o A rich selection of original Latin readings — unlike other textbooks which contain primarily made-up Latin texts o Etymological aids Also includes maps of the Mediterranean, Italy and the Aegean area, as well as numerous photographs illustrating aspects of classical culture, mythology, and historical and literary figures presented in the chapter readings. o The leading self-tutorial Latin program. Also great for college and accelerated high school courses. o Wheelock's Latin is the top-selling Latin reference in the US. o Interest and enrolments in Latin have been steadily rising in the U.S. for the past 20 years. One-half million people are currently enrolled in Latin classes, and at least 10,000 teachers, professors and graduate assistants are teaching the language in America.

Face Recognition Across the Imaging Spectrum Thirimachos Bourlai, 2016-02-12 This authoritative text/reference presents a comprehensive review of algorithms and techniques for face recognition (FR), with an emphasis on systems that can be reliably used in operational environments. Insights are provided by an international team of pre-eminent experts into the processing of multispectral and hyperspectral face images captured under uncontrolled environments. These discussions cover a variety of imaging sensors ranging from state-of-the-art visible and infrared imaging sensors, to RGB-D and mobile phone image sensors. A range of different biometric modalities are also examined, including face, periocular and iris. This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

Augmented Reality Art Vladimir Geroimenko, 2014-06-17 Written by a team of world-renowned artists, researchers and practitioners - all pioneers in using augmented reality based creative works and installations as a new form of art - this is the first book to explore the exciting new field of augmented reality art and its enabling technologies. As well as investigating augmented reality as a novel artistic medium the book covers cultural, social, spatial and cognitive facets of augmented reality art. Intended as a starting point for exploring this new fascinating area of research and creative practice it

will be essential reading not only for artists, researchers and technology developers, but also for students (graduates and undergraduates) and all those interested in emerging augmented reality technology and its current and future applications in art.

Fabulous and Famous Michelle Woodworth,2021-11-07 This inspiring story encourages children to learn that they are special - just as they are

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

A New Hasidism: Roots Arthur Green,Ariel Evan Mayse,2019-10-01 Neo-Hasidism applies the Hasidic masters' spiritual insights--of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service--to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers--Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi--plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi re-created Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.

Slave Stealers Timothy Ballard, 2018 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day underground railroad which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The Conductor; Abraham Lincoln--the Great Emancipator; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Psychobook Julian Rothenstein, 2016-09-06 Who knew a trip to the therapist could be so much fun, even aesthetically rewarding? Beyond sharing feelings or complaining about your mother, *Psychobook* reveals the rich history of psychological testing in a fascinating sideways look at classic testing methods, from word-association games to inkblots to personality tests. *Psychobook* includes never-before-seen content from long-hidden archives, as well as reimagined tests from contemporary artists and writers, to try out yourself, at home or at parties. A great ebook for the therapist in your life and the therapist in you, for anyone interested in the history of psychology and psychological paraphernalia, or for anyone who enjoys games and quizzes. *Psychobook* will brighten your day and outlook.

Biomechanics Hansruedi Giger, 1990 Swiss fantasist H.R. Giger conducts readers through his diverse alien landscapes, inhabited by the spectral offspring of his vivid dreams and darkest nightmares.

Digital Modernism Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2021-08-11 The book investigates the theme of Modernism (1920-1960 and its epigones) as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several chapters, it contains research results relating to cultural heritage, more specifically Modernism, and current digital technologies. This makes it

possible to record and evaluate the changes that both undergo: the first one, from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one. The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage: from different forms of art to architecture, from design to engineering, from literature to history, representation and restoration. The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism

Damien Hirst: Cherry Blossoms ,2021-04-07 Incandescent and celebratory paintings of cherry blossoms from Damien Hirst, in a glorious oversize volume With 107 new works, *Cherry Blossoms* marks a new chapter in Damien Hirst's career-long exploration of the physical relationship between artist and canvas that began with his *Spot Paintings* in 1986. Hirst describes his cherry blossoms as garish and messy and fragile; the series signals a shift in Hirst's career away from minimalism and the imagined mechanical painter toward a painting that delights in the potential haphazardness of the medium, as well as the artist's own fallibility as a creator. Rich in color and striking in number, Hirst's *Cherry Blossoms* are both an appropriation and a tribute to the pictorial art of the 19th and 20th centuries. Damien Hirst (born 1965) rose to prominence in the 1990s as one of the Young British Artists, garnering attention for his controversial site-specific pieces. A 1989 graduate of Goldsmiths College, Hirst was awarded the Turner Prize in 1995. Now one of the contemporary art world's most famous figures, Hirst continues to surprise audiences with a staggering diversity of work, ranging from sculpture and painting to installation and performance art. In 2012, a retrospective of his nearly 30-year career was staged at Tate Modern. Hirst is represented by Gagosian.
