Duncan J. Watts

Everything is Obvious Duncan J. Watts, 2011-07-01 Why is the Mona Lisa the most famous painting in the world? Why did Facebook succeed when other social networking sites failed? Did the surge in Iraq really lead to less violence? And does higher pay incentivize people to work harder? If you think the answers to these questions are a matter of common sense, think again. As sociologist and network science pioneer Duncan Watts explains in this provocative book, the explanations that we give for the outcomes that we observe in life--explanations that seem obvious once we know the answer--are less useful than they seem. Watts shows how commonsense reasoning and history conspire to mislead us into thinking that we understand more about the world of human behavior than we do; and in turn, why attempts to predict, manage, or manipulate social and economic systems so often go awry. Only by understanding how and when common sense fails can we improve how we plan for the future, as well as understand the present--an argument that has important implications in politics, business, marketing, and even everyday life.

You Are Now Less Dumb David McRaney, 2013-07-30 The author of the bestselling *You Are Not So Smart* shares more discoveries about self-delusion and irrational thinking, and gives readers a fighting chance at outsmarting their not-so-smart brains. David McRaney's first book, *You Are Not So Smart*, evolved from his wildly popular blog of the same name. A mix of popular psychology and trivia, McRaney's insights have struck a chord with thousands, and his blog--and now podcasts and videos--have become an Internet phenomenon. Like *You Are Not So Smart*, *You Are Now Less Dumb* is grounded in the idea that we all believe ourselves to be objective observers of reality--except we're not. But that's okay, because our delusions keep us sane. Expanding on this premise, McRaney provides eye-opening analyses of fifteen more ways we fool ourselves every day, including: The Misattribution of Arousal (Environmental factors have a greater affect on our emotional arousal than the person right in front of us) Sunk Cost Fallacy (We will engage in something we don't enjoy just to make the time or money already invested "worth it") Deindividuation (Despite our best intentions, we practically disappear when subsumed by a mob mentality) McRaney also reveals the true price of happiness, why Benjamin Franklin was such a badass, and how to avoid falling for our own lies. This smart and highly entertaining book will be wowing readers for years to come.

Tree Shaker Bill Keller, 2013-12-24 The story of Nelson Mandela who challenged apartheid in South Africa and who went on to become the president of the country.

How Minds Change David McRaney, 2022-06-21 The 2022 Porchlight Marketing and Sales Book of the Year A brain-bending investigation of why some people never change their minds--and others do in an instant--by the bestselling author of *You Are Not So Smart* What made a prominent conspiracy-theorist YouTuber finally see that 9/11 was not a hoax? How do voter opinions shift from neutral to resolute? Can widespread social change only take place when a generation dies out? From one of our greatest thinkers on reasoning, *HOW MINDS CHANGE* is a book about the science, and the experience, of transformation. When self-delusion expert and psychology nerd David McRaney began a book about how to change someone's mind in one conversation, he never expected to change his own. But then a diehard 9/11 Truther's conversion blew up his theories--inspiring him to ask not just how to persuade, but why we believe, from the eye of the beholder. Delving into the latest research of psychologists and neuroscientists, *HOW MINDS CHANGE* explores the limits of reasoning, the power of groupthink, and the effects of deep canvassing. Told with McRaney's trademark sense of humor, compassion, and scientific curiosity, it's an eye-opening journey among cult members, conspiracy theorists, and political activists, from Westboro Baptist Church picketers to LGBTQ campaigners in California--that ultimately challenges us to question our own motives and beliefs. In an age of dangerous conspiratorial thinking, can we rise to the occasion with empathy? An expansive, big-hearted journalistic narrative, *HOW MINDS CHANGE* reaches surprising and thought-provoking conclusions, to demonstrate the rare but transformative circumstances under which minds can change.

Butch Heroes Ria Brodell, 2018-12-11 Portraits and texts recover lost queer history: the lives of people who didn't conform to gender norms, from the fifteenth through the twentieth centuries. "A serious--and seriously successful--queer history recovery project." --Publishers Weekly Katherine Hetzeldorfer, tried "for a crime that didn't have a name" (same sex sexual relations) and sentenced to death by drowning in 1477; Charles aka Mary Hamilton, publicly whipped for impersonating a man in eighteenth-century England; Clara, aka "Big Ben," over whom two jealous women fought in 1926 New York: these are just three of the lives that the artist Ria Brodell has reclaimed for queer history in *Butch Heroes*. Brodell offers a series of twenty-eight portraits of forgotten but heroic figures, each accompanied by a brief biographical note. They are individuals who were assigned female at birth but whose gender presentation was more masculine than feminine, who did not want to enter into heterosexual marriage, and who often faced dire punishment for being themselves. Brodell's detailed and witty paintings are modeled on Catholic holy cards, slyly subverting a religious template. The portraits and the texts offer intriguing hints of lost lives: cats lounge in the background of domestic settings; one of the figures is said to have been employed variously as "a prophet, a soldier, or a textile worker"; another casually holds a lit cigarette. Brodell did extensive research for each portrait, piecing together a life from historical accounts, maps, journals, paintings, drawings, and photographs, finding the heroic in the forgotten.

Elephants on Acid Alex Boese, 2011-03-21 The Sunday Times Top Ten Bestseller Have you ever wondered if a severed head retains consciousness long enough to see what happened to it? Or whether your dog would run to fetch help, if you fell down a disused mineshaft? And what would happen if you were to give an elephant the largest ever single dose of LSD? The chances are that someone, somewhere has conducted a scientific experiment to find out... 'Excellent accounts of some of the most important and interesting experiments in biology and psychology' Simon Singh If left to their own devices, would babies instinctively choose a well-balanced diet? Discover the secret of how to sleep on planes Which really tastes better in a blind tasting - Coke or Pepsi?

Back to Our Future David Sirota, 2011-03-15 Wall Street scandals. Fights over taxes. Racial resentments. A Lakers-Celtics championship. The Karate Kid topping the box-office charts. Bon Jovi touring the country. These words could describe our current moment--or the vaunted iconography of three decades past. In this wide-ranging and wickedly entertaining book, New York Times bestselling journalist David Sirota takes readers on a rollicking DeLorean ride back in time to reveal how so many of our present-day conflicts are rooted in the larger-than-life pop culture of the 1980s--from the "Greed is good" ethos of Gordon Gekko (and Bernie Madoff) to the "Make my day" foreign policy of Ronald Reagan (and George W. Bush) to the "transcendence" of Cliff Huxtable (and Barack Obama). Today's mindless militarism and hypernarcissism, Sirota argues, first became the norm when an '80s generation weaned on Rambo one-liners and "Just Do It" exhortations embraced a new religion--with comic books, cartoons, sneaker commercials, videogames, and even children's toys serving as the key instruments of cultural indoctrination. Meanwhile, in productions such as *Back to the Future*, *Family Ties*, and *The Big Chill*, a campaign

was launched to reimagine the 1950s as America's lost golden age and vilify the 1960s as the source of all our troubles. That 1980s revisionism, Sirota shows, still rages today, with Barack Obama cast as the 60s hippie being assailed by Alex P. Keaton-esque Republicans who long for a return to Eisenhower-era conservatism. "The past is never dead," William Faulkner wrote. "It's not even past." The 1980s—even more so. With the native dexterity only a child of the Atari Age could possess, David Sirota twists and turns this multicolored Rubik's Cube of a decade, exposing it as a warning for our own troubled present—and possible future.

The Way of the Linguist Steve Kaufmann, 2005-11 The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist, A language learning odyssey*, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Guy Laliberté Ian Halperin, 2009 Laliberte means freedom in French, but Laliberte gives freedom new meaning. This title takes you inside Laliberte's world, followed by over-the-top partying by night. It lets you experience relentless drive of this visionary, his passion for life, the Cirque, and women.

Obama's BlackBerry Kasper Hauser, 2009-06-30 When Obama stated that if elected, he would keep his Blackberry, debate echoed through Washington and among the ranks of the Secret Service. What would it be like to have a president who could Twitter, send text messages, and navigate the web with ease? What would it be like to receive a text message from inside the Oval Office and, most importantly, what would it say? Now, for the first time, We The People are privy to our new leader's epistolary back-and-forths on his wily hand-held device. We're about to discover that his emails (and the replies, from his wife and daughters, Biden, Palen, Rush, Hannity, the new first puppy, and even Bush) are so tuned in to the language of electronic correspondence they come hilariously close to the brink of legibility. This giftable, imagined glimpse into Obama's beloved Blackberry traverses the mundane and momentous contours of the Commander in Chief's life, from security briefings to spam, basketball practice to domestic bliss, and the panic of oops-I-hit-reply-all, to, of course, the trauma of dealing with the First Mother In Law. To wit: BidenMyTime: Hey U, whatcha doin? BARACK0: M rly busy BidenMyTime: Right :(Can I lv at 4:45?

Electrified Sheep Alex Boese, 2011-09-01 Benjamin Franklin was a pioneering scientist, leader of the Enlightenment and founding father of the USA. But perhaps less well known is that he was also the first person to use artificial respiration to revive an electric shock victim. Odder still, it was actually mouth-to-beak resuscitation on a hen that he himself had shocked. Welcome to some of the most weird and wonderful experiments ever conducted in the name of science. Packed full of eccentric characters, irrational obsessions and extreme experiments, *Electrified Sheep* is the long-awaited follow-up to the bestselling *Elephants on Acid*. Watch as scientists attempt to blow up the moon, wince at the doctor who performs a self-appendectomy - and catch the faint whiff of singed wool from an electrified sheep.

Are You Smart Enough to Work at Google? William Poundstone, 2012-01-04 You are shrunk to the height of a nickel and thrown in a blender. The blades start moving in 60 seconds. What do you do? Amazing World Atlas Lonely Planet Kids, 2014-10-01 Finally, Lonely Planet has made the Atlas kids have been waiting for! With 160 pages of illustrated maps, engaging infographics, mind-blowing photography and a large dose of humour, this is the atlas that shows kids aged 8 and up what the world is really like.

The Gospel of Food Barry Glassner, 2007-01-02 Enjoy what you eat. From the author of the national bestseller *The Culture of Fear* comes a rallying cry to abandon food fads and myths for calmer and more pleasurable eating. For many Americans, eating is a religion. We worship at the temples of celebrity chefs. We raise our children to believe that certain foods are good and others are bad. We believe that if we eat the right foods, we will live longer, and if we eat in the right places, we will raise our social status. Yet what we believe to be true about food is, in fact, quite contradictory. Offering part exposé, part social commentary, sociologist Barry Glassner talks to chefs, food chemists, nutritionists, and restaurant critics about the way we eat. Helping us recognize the myths, half-truths, and guilt trips they promulgate, *The Gospel of Food* liberates us for greater joy at the table.

The Three Christs of Ypsilanti Milton Rokeach, 2011-04-19 On July 1, 1959, at Ypsilanti State Hospital in Michigan, the social psychologist Milton Rokeach brought together three paranoid schizophrenics: Clyde Benson, an elderly farmer and alcoholic; Joseph Cassel, a failed writer who was institutionalized after increasingly violent behavior toward his family; and Leon Gabor, a college dropout and veteran of World War II. The men had one thing in common: each believed himself to be Jesus Christ. Their extraordinary meeting and the two years they spent in one another's company serves as the basis for an investigation into the nature of human identity, belief, and delusion that is poignant, amusing, and at times disturbing. Displaying the sympathy and subtlety of a gifted novelist, Rokeach draws us into the lives of three troubled and profoundly different men who find themselves "confronted with the ultimate contradiction conceivable for human beings: more than one person claiming the same

identity."

Language Regard Betsy E. Evans, Erica J. Benson, James N. Stanford, 2018-01-18 The first book of its kind to provide historical and state-of-the-art perspectives on language regard.

Carpenter, 2010 ,2010 The National Occupational Analysis (NOA) has the following objectives: to describe and group the tasks performed by skilled workers; to identify which tasks are performed in every province and territory; to develop instruments for use in the preparation of interprovincial Red Seal examinations and curricula for training leading to the certification of skilled workers; to facilitate the mobility of apprentices and skilled workers in Canada; and, to supply employers, employees, associations, industries, training institutions and governments with analyses of occupations. This analysis covers tasks performed by carpenters, defined as workers who construct, renovate and repair residential, civil, institutional, commercial and industrial (ICI) structures made of wood, steel, concrete and other materials.--Includes text from document.

Anticorruption in History Ronald Kroeze, André Vitória, Guy Geltner, 2018 Anticorruption in History is a timely and urgent book: corruption is widely seen today as a major problem we face as a global society, undermining trust in government and financial institutions, economic efficiency, the principle of equality before the law and human wellbeing in general. Corruption, in short, is a major hurdle on the path to Denmark a feted blueprint for stable and successful statebuilding. The resonance of this view explains why efforts to promote anticorruption policies have proliferated in recent years. But while the subject of corruption and anticorruption has captured the attention of politicians, scholars, NGOs and the global media, scant attention has been paid to the link between corruption and the change of anticorruption policies over time and place, with the attendant diversity in how to define, identify and address corruption. Economists, political scientists and policy-makers in particular have been generally content with tracing the differences between low-corruption and high-corruption countries in the present and enshrining them in all manner of rankings and indices. The long-term trends & social, political, economic, cultural; potentially undergirding the position of various countries plays a very small role. Such a historical approach could help explain major moments of change in the past as well as reasons for the success and failure of specific anticorruption policies and their relation to a country's image (of itself or as construed from outside) as being more or less corrupt. It is precisely this scholarly lacuna that the present volume intends to begin to fill. The book addresses a wide range of historical contexts: Ancient Greece and Rome, Medieval Eurasia, Italy, France, Great Britain and Portugal as well as studies on anticorruption in the Early Modern and Modern era in Romania, the Ottoman Empire, the Netherlands, Germany, Denmark, Sweden and the former German Democratic Republic.
