**Animal Spirits** George A. Akerlof,Robert J. Shiller,2010-02-01 From acclaimed economists George Akerlof and Robert Shiller, the case for why government is needed to restore confidence in the economy The global financial crisis has made it painfully clear that powerful psychological forces are imperiling the wealth of nations today. From blind faith in ever-rising housing prices to plummeting confidence in capital markets, animal spirits are driving financial events worldwide. In this book, acclaimed economists George Akerlof and Robert Shiller challenge the economic wisdom that got us into this mess, and put forward a bold new vision that will transform economics and restore prosperity. Akerlof and Shiller reassert the necessity of an active government role in economic policymaking by recovering the idea of animal spirits, a term John Maynard Keynes used to describe the gloom and despondence that led to the Great Depression and the changing psychology that accompanied recovery. Like Keynes, Akerlof and Shiller know that managing these animal spirits requires the steady hand of government—simply allowing markets to work won't do it. In rebuilding the case for a more robust, behaviorally informed Keynesianism, they detail the most pervasive effects of animal spirits in contemporary economic life—such as confidence, fear, bad faith, corruption, a concern for fairness, and the stories we tell ourselves about our economic fortunes—and show how Reaganomics, Thatcherism, and the rational expectations revolution failed to account for them. Animal Spirits offers a road map for reversing the financial misfortunes besetting us today. Read it and learn how leaders can channel animal spirits—the powerful forces of human psychology that are afoot in the world economy today. In a new preface, they describe why our economic troubles may linger for some time—unless we are prepared to take further, decisive action.

**Dancing with Raven and Bear** Sonja Grace,2018-09-25 Original tales inspired by Native American and Norwegian folklore that highlight the wisdom of the divine natural world • Shares unique stories about Earth Medicine and animal magic, inspired by the author's unusual Native American (Hopi) and Norwegian upbringing • Interwoven with ancient teachings and everyday practical applications of Earth Medicine, such as grounding and dream interpretation • Each tale is beautifully illustrated with the author's original art, which promotes spiritual understanding and the power of the Earth's healing properties • Paper with French flaps Drawing on both her Native American (Hopi) heritage and her Norwegian upbringing, renowned mystic and intuitive healer Sonja Grace shares original wisdom tales, received through her heart and soul, to take you on a journey into the magic of Raven and Bear and the healing power of Earth Medicine. Featuring Sonja's distinctive and beautiful artwork, each story is embedded with ancient teachings to inspire you to live closer to the Earth. The fables include powerful examples of animal magic and everyday, practical applications of Earth Medicine, such as simple energy exercises, dream interpretations, Earth Medicine prayers and meditations, and using medicinal plants to manage negative energies. As background to the stories, Sonja reveals parallels between Norse mythology and Native American traditions and explores the symbology of animals and the recurring central theme of the tension between light and darkness. In Norse myth, the great god Odin, for instance, is often accompanied by Ravens. These birds are considered manifestations of the Valkyries, the goddesses who brought brave soldiers to Valhalla, while in Native American traditions, the Raven is viewed as a trickster or messenger, a magical creature with the ability to shapeshift into a human or animal, yet also portrayed as a hero overcoming adversity. The Bear on the other hand can embody the healer who grounds our energy and removes illness or can represent the inner part of us that has faith. In one fable, Sonja brings Bear to life as a mythical creature singing songs to bring in the light, reflecting the powerful lesson that by using our voice and speaking the truth we can hold darkness at bay. Throughout all of the stories, Raven and Bear teach us to be responsible for our actions and develop spiritual accountability. By sharing these tales of Earth Medicine, Sonja offers not only a path of reconnection with the Earth but also medicine for the soul. She shows how the Earth works in unity within herself and provides a warehouse of knowledge for all who live upon her.

**Concepts of Biology** Samantha Fowler, Rebecca Roush, James Wise, 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
