Pliny the Elder and the Emergence of Renaissance Architecture Peter Fane-Saunders,2016-07-12 The Naturalis historia by Pliny the Elder provided Renaissance scholars, artists and architects with details of ancient architectural practice and long-lost architectural wonders – material that was often unavailable elsewhere in classical literature. Pliny's descriptions frequently included the dimensions of these buildings, as well as details of their unusual construction materials and ornament. This book describes, for the first time, how the passages were interpreted from around 1430 to 1580, that is, from Alberti to Palladio. Chapters are arranged chronologically within three interrelated sections – antiquarianism; architectural writings; drawings and built monuments – thereby making it possible for the reader to follow the changing attitudes to Pliny over the period. The resulting study establishes the Naturalis historia as the single most important literary source after Vitruvius's De architectura.

XML Kevin Howard Goldberg,2010-04-26 What is XML? XML, or eXtensible Markup Language, is a specification for storing information. It is also a specification for describing the structure of that information. And while XML is a markup language (just like HTML), XML has no tags of its own. It allows the person writing the XML to create whatever tags they need. The only condition is that these newly created tags adhere to the rules of the XML specification. In the seven years since the first edition of “XML: Visual QuickStart Guide” was published, XML has taken its place next to HTML as a foundational language on the Internet. XML has become a very popular method for storing data and the most popular method for transmitting data between all sorts of systems and applications. The reason being, where HTML was designed to display information, XML was designed to manage it. “XML: Visual QuickStart Guide, 2nd Edition” is divided into seven parts. Each part contains one or more chapters with step-by-step instructions that explain how to perform XML-related tasks. Wherever possible, examples of the concepts being discussed are displayed, and the parts of the examples on which to focus are highlighted. The order of the book is intentionally designed to be an introduction to the fundamentals of XML, followed by discussions of related XML technologies.

Narratives of Low Countries History and Culture Jane Fenoulhet,Lesley Gilbert,Ulrich Tiedau,2016-11-07 This edited collection explores the ways in which our understanding of the past in Dutch history and culture can be rethought to consider not only how it forms part of the present but how it can relate also to the future. Divided into three parts – The Uses of Myth and History, The Past as Illumination of Cultural Context, and Historiography in Focus – this book seeks to demonstrate the importance of the past by investigating the transmission of culture and its transformations. It reflects on the history of historiography and looks critically at the products of the historiographic process, such as Dutch and Afrikaans literary history. The chapters cover a range of disciplines and approaches: some authors offer a broad view of a particular period, such as Jonathan Israel's contribution on myth and history in the ideological politics of the Dutch Golden Age, while others zoom in on specific genres, texts or historical moments, such as Benjamin Schmidt's study of the doolhof, a word that today means 'labyrinth' but once described a 17th-century educational amusement park. This volume, enlightening and home to multiple paths of enquiry leading in different directions, is an excellent example of what a past-present doolhof might look like.

Artistry in Bronze Jens M Daehner,Kenneth Lapatin,Ambra Spinelli,2017-11-21 The papers in this volume derive from the proceedings of the nineteenth International Bronze Congress, held at the Getty Center and Villa in October 2015 in connection with the exhibition Power and Pathos: Bronze Sculpture of the Hellenistic World. The study of large-scale ancient bronzes has long focused on aspects of technology and production. Analytical work of materials, processes, and techniques has significantly enriched our understanding of the medium. Most recently, the restoration history of bronzes has established itself as a distinct area of investigation. How does this scholarship bear on the understanding of bronzes within the wider history of ancient art? How do these technical data relate to our ideas of styles and development? How has the material itself affected ancient and modern perceptions of form, value, and status of works of art?
