Small Unmanned Aircraft Randal W. Beard, Timothy W. McLain, 2012-02-26 Autonomous unmanned air vehicles (UAVs) are critical to current and future military, civil, and commercial operations. Despite their importance, no previous textbook has accessibly introduced UAVs to students in the engineering, computer, and science disciplines--until now. *Small Unmanned Aircraft* provides a concise but comprehensive description of the key concepts and technologies underlying the dynamics, control, and guidance of fixed-wing unmanned aircraft, and enables all students with an introductory-level background in controls or robotics to enter this exciting and important area. The authors explore the essential underlying physics and sensors of UAV problems, including low-level autopilot for stability and higher-level autopilot functions of path planning. The textbook leads the student from rigid-body dynamics through aerodynamics, stability augmentation, and state estimation using onboard sensors, to maneuvering through obstacles. To facilitate understanding, the authors have replaced traditional homework assignments with a simulation project using the MATLAB/Simulink environment. Students begin by modeling rigid-body dynamics, then add aerodynamics and sensor models. They develop low-level autopilot code, extended Kalman filters for state estimation, path-following routines, and high-level path-planning algorithms. The final chapter of the book focuses on UAV guidance using machine vision. Designed for advanced undergraduate or graduate students in engineering or the sciences, this book offers a bridge to the aerodynamics and control of UAV flight.

The Case for Israel Alan Dershowitz, 2011-01-06 The Case for Israel is an ardent defense of Israel's rights, supported by indisputable evidence. Presents a passionate look at what Israel's accusers and detractors are saying about this war-torn country. Dershowitz accuses those who attack Israel of international bigotry and backs up his argument with hard facts. Widely respected as a civil libertarian, legal educator, and defense attorney extraordinaire, Alan Dershowitz has also been a passionate though not uncritical supporter of Israel.

Stiff: The Curious Lives of Human Cadavers Mary Roach, 2004-05-17 Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, *Forbes*) classic, now with a new epilogue. For two thousand years, cadavers - some willingly, some unwittingly - have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. "Delightful-though never disrespectful" (Les Simpson, *Time Out New York*), *Stiff* investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is."

-Tara Parker-Pope, *Wall Street Journal* "Gross, educational, and unexpectedly sidesplitting." -*Entertainment Weekly*

The Origins of the Slavic Nations Serhii Plokhy, 2006-09-07 This book documents developments in the countries of eastern Europe, including the rise of authoritarian tendencies in Russia and Belarus, as well as the victory of the democratic 'Orange Revolution' in Ukraine, and poses important questions about the origins of the East Slavic nations and the essential similarities or differences between their cultures. It traces the origins of the modern Russian, Ukrainian and Belarusian nations by focusing on pre-modern forms of group identity among the Eastern Slavs. It also challenges attempts to 'nationalize' the Rus' past on behalf of existing national projects, laying

the groundwork for understanding of the pre-modern history of Russia, Ukraine and Belarus. The book covers the period from the Christianization of Kyivan Rus' in the tenth century to the reign of Peter I and his eighteenth-century successors, by which time the idea of nationalism had begun to influence the thinking of East Slavic elites.

Education, Human Rights and Peace in Sustainable Development Maigul Nugmanova, Heimo Mikkola, Alexander Rozanov, Valentina Komleva, 2020-11-19 The aim of sustainable development is to balance our economic, environmental and social needs, allowing prosperity for current and future generations. Countries must be allowed to meet their basic needs of employment, food, energy, water and sanitation. There is a clear relationship between the three topics of the book: right to education has been recognized as a human right - education has a role in peace-building. Additionally, education, human rights and peace have a significant role in sustainable development. The United Nations have defined a broad range of internationally accepted rights, including civil, cultural, economic, political and social rights. However, this book demonstrates that there are still people and nations not respecting the Universal Declaration of Human Rights. Chapters from Brazil, Cameroon, Ethiopia, Kazakhstan, Israel, Peru, Russia and South-Africa cover topics like civil war, human abuses, the vulnerability of indigenous people, abortion, epilepsy, food security, lack of health equities in maternal and child health, and democracy or lack of it. We sincerely hope that this book will contribute to the joint pursuit of humanity to make the world better after we all get over the coronavirus pandemic.

The Crimean Tatars Brian Glyn Williams, 2001-01-01 This volume provides the most up-to-date analysis of the ethnic cleansing of the Crimean Tatars, their exile in Central Asia and their struggle to return to the Crimean homeland. It also traces the formation of this diaspora nation from Mongol times to the collapse of the Soviet Union. A theme which emerges through the work is the gradual construction of the Crimea as a national homeland by its indigenous Tatar population. It ends with a discussion of the post-Soviet repatriation of the Crimean Tatars to their Russified homeland and the social, emotional and identity problems involved.

Digital Human Modeling Vincent D. Duffy, 2007-08-24 This book constitutes the refereed proceedings of the First International Conference on Digital Human Modeling, DHM 2007, held in Beijing, China in July 2007. The papers thoroughly cover the thematic area of digital human modeling, addressing the following major topics: shape and movement modeling and anthropometry, building and applying virtual humans, medical and rehabilitation applications, as well as industrial and ergonomic applications.

Minister of Finance Incorporated Edmund Terence Gomez, Thirshalar Padmanabhan, Norfaryanti Kamaruddin, Sunil Bhalla, Fikri Fisal, 2017-07-24 This is a study of Malaysia's new political economy, with a focus on ownership and control of the corporate sector. It offers a pioneering assessment of government-linked investment companies (GLICs), a type of state-owned institution that has long prevailed in the corporate sector but has not been analysed. Malaysia's history of government-business ties is unique, while the nature of the nexuses between the state and the corporate sector has undergone major transitions. Corporate power has shifted from the hands of foreign firms to the state to the ruling party, and well-connected businessmen, and back to the state. Corporate wealth is now heavily situated in the leading publicly-listed government-linked companies (GLCs), controlled through block shareholdings by a mere seven GLICs under the jurisdiction of the Minister of Finance. To indicate why these GLICs are important actors in Corporate Malaysia, this study provides a deep assessment of their ownership and control of Bursa Malaysia's top 100 publicly-listed enterprises.

The Strange Death of Europe Douglas Murray, 2018-06-14 The Strange Death of Europe is the internationally bestselling account of a continent and a culture caught in the act of suicide, now updated with new material taking in developments since it was first published to huge acclaim. These include rapid changes in the dynamics of global politics, world leadership and terror attacks across Europe. Douglas Murray travels across Europe to examine first-hand how mass immigration, cultivated self-distrust and delusion have contributed to a continent in the grips of its own demise. From the shores of Lampedusa to migrant camps in Greece, from Cologne to London, he looks critically at the factors that have come together to make Europeans unable to argue for themselves and incapable of resisting their alteration as a society. Murray's tremendous and shattering book (The Times) addresses the disappointing failures of multiculturalism, Angela Merkel's U-turn on migration, the lack of repatriation and the Western fixation on guilt, uncovering the malaise at the very heart of the European culture. His conclusion is bleak, but the predictions not irrevocable. As Murray argues, this may be our last chance to change the outcome, before it's too late.

Killing Hope William Blum, 2022-07-14 In Killing Hope, William Blum, author of the bestselling Rogue State: A Guide to the World's Only Superpower, provides a devastating and comprehensive account of America's covert and overt military actions in the world, all the way from China in the 1940s to the invasion of Iraq in 2003 and – in this updated edition – beyond. Is the United States, as it likes to claim, a global force for democracy? Killing Hope shows the answer to this question to be a resounding 'no'.

World Economic Outlook, October 2019 International Monetary Fund. Research Dept., 2019-10-15 Global growth is forecast at 3.0 percent for 2019, its lowest level since 2008-09 and a 0.3 percentage point downgrade from the April 2019 World Economic Outlook.

Ableism in Academia Nicole Brown, Jennifer Leigh, 2020-10-05 Rather than embracing difference as a reflection of wider society, academic ecosystems seek to normalise and homogenise ways of working and of being a researcher. As a consequence, ableism in academia is endemic. However, to date no attempt has been made to theorise experiences of ableism in academia. Ableism in Academia provides an interdisciplinary outlook on ableism that is currently missing. Through reporting research data and exploring personal experiences, the contributors theorise and conceptualise what it means to be/work outside the stereotypical norm. The volume brings together a range of perspectives, including feminism, post-structuralism, such as Derridean and Foucauldian theory, crip theory and disability theory, and draw on the width and breadth of a number of related disciplines. Contributors use technicism, leadership, social justice theories and theories of embodiment to raise awareness and increase understanding of the marginalised; that is those academics who are not perfect. These theories are placed in the context of neoliberal academia, which is distant from the privileged and romanticised versions that exist in the public and internalised imaginations of academics, and used to interrogate aspects of identity, aspects of how disability is performed, and to argue that ableism is not just a disability issue. This timely collection of chapters will be of interest to researchers in Disability Studies, Higher Education Studies and Sociology, and to those researching the relationship between theory and personal experience across the Social Sciences.

World Development Report 1978, 1978 This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international

economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Stalin's Genocides Norman M. Naimark, 2010-07-19 The chilling story of Stalin's crimes against humanity Between the early 1930s and his death in 1953, Joseph Stalin had more than a million of his own citizens executed. Millions more fell victim to forced labor, deportation, famine, bloody massacres, and detention and interrogation by Stalin's henchmen. *Stalin's Genocides* is the chilling story of these crimes. The book puts forward the important argument that brutal mass killings under Stalin in the 1930s were indeed acts of genocide and that the Soviet dictator himself was behind them. Norman Naimark, one of our most respected authorities on the Soviet era, challenges the widely held notion that Stalin's crimes do not constitute genocide, which the United Nations defines as the premeditated killing of a group of people because of their race, religion, or inherent national qualities. In this gripping book, Naimark explains how Stalin became a pitiless mass killer. He looks at the most consequential and harrowing episodes of Stalin's systematic destruction of his own populace—the liquidation and repression of the so-called kulaks, the Ukrainian famine, the purge of nationalities, and the Great Terror—and examines them in light of other genocides in history. In addition, Naimark compares Stalin's crimes with those of the most notorious genocidal killer of them all, Adolf Hitler.

Metaphor and Persuasion in Strategic Communication Federica Ferrari, 2018-10-22 This groundbreaking work adopts an alternative metaphor-based approach to challenge, unpack, and redefine our understanding of persuasion and strategic communication and the extents to which they shape political discourse. The book's theoretical and methodological grounding in metaphor allows for an alternative perspective on strategic communication but also a robust discussion of both persuasion and other kinds of related discursive processes at work in political communication, including narrative, identification, and ideology. The volume integrates case studies from prominent political discourses, including those of George W. Bush, Jr., Tony Blair, and Barack Obama, to highlight the crucial role of persuasion management and sustainability in the public sphere and the ways in which it might inform political action and change in a positive way. Broadening our perception of the possibilities of persuasion and strategic communication, this dynamic volume is key reading for students and scholars in communication studies, political science, rhetoric, and cognitive linguistics.
