**The Humanities Through the Arts** F. David Martin, Lee A. Jacobus, 1978 Humanities through the Arts is intended for introductory-level, interdisciplinary courses offered across the curriculum in the Humanities, Philosophy, Art, English, Music, and Education departments. Arranged topically by art form from painting, sculpture, photography, and architecture to literature, music, theater, film, and dance. This beautifully illustrated text helps students learn how to actively engage a work of art. The new sixth edition retains the popular focus on the arts as an expression of cultural and personal values..

*Psychology in Everyday Life* David G. Myers, 2011-02-18

*A Child's World* Diane E. Papalia, Sally Wendkos Olds, Ruth Duskin Feldman, 2004

**Social Psychology** John DeLamater, Jessica Collett, 2018-08-15 This fully revised and updated edition of Social Psychology is an engaging exploration of the question, what makes us who we are? presented in a new, streamlined fashion. Grounded in the latest research, Social Psychology explains the methods by which social psychologists investigate human behavior in a social context and the theoretical perspectives that ground the discipline. Each chapter is designed to be a self-contained unit for ease of use in any classroom. This edition features new boxes providing research updates and test yourself opportunities, a focus on critical thinking skills, and an increased emphasis on diverse populations and their experiences.

**The Mind and Heart of the Negotiator** Leigh L. Thompson, 2012 For undergraduate and graduate-level business courses that cover the skills of negotiation. This text provides an integrated view of what to do and what to avoid at the bargaining table, facilitated by an integration of theory, scientific research, and practical

examples.

*Adventures in Kinship with All Life* J. Allen Boone, John Allen Boone, 1994-01-01 With warm humor and well-seasoned experience, J. Allen Boone reenters the wonderful world of unspoken communication between humans and animals. He was an explorer into the realm of the unexpected who felt that by underestimating the mental and spiritual qualities of by animals, we miss out on the oneness and wholeness of life. This book salutes the Divinity within all living creatures. In his encounter with Just Joe, his monkey-companion, Boone struggles to become the pupil, with Just Joe a teacher whose wisdom is not measured in words, but in his ability to vibrate with life's unity. These thoughtful tales demonstrate how the author spoke silently with all forms of life, and how he grew to understand their silent replies. Boone never looked down on animals as lesser creatures; rather, he looked across at them as companions in the grand adventure of life. Everything that lives has something of value to share with us - whenever we are ready for the experience.

The Tragedy of Political Science David M. Ricci, 1984-01-01 This book is both a comprehensive review and a thoughtful critique of the development of political science as an academic discipline in this century. David Ricci eloquently describes the tragic dilemma of political science in America: when political scholars deal with politics in a scientific fashion, they reveal facts that contradict democratic expectations; when the same scholars seek to justify those expectations, their moral arguments carry little professional weight.--

*Parents and Caregivers Across Cultures* Brien K. Ashdown, Amanda N. Faherty, 2020-02-04 This book explores diverse parent-child relationships from around the world, drawing on connections between culture and parenting values and challenges. It identifies parenting practices within various countries' unique historical, political, and cultural backgrounds, reframing parenting as a cultural process whose goals are to encourage culturally-specific child behaviors and outcomes. Chapters focus on parenting research in a range of countries, such as Australia, Bolivia, China, Egypt, Guatemala, India, Rwanda, Namibia, Saudi Arabia, and the United States. Chapters also discuss social, emotional, and physical developmental topics throughout the lifespan, including infancy, early childhood, adolescence, emerging adulthood, and adulthood. Topics featured in this book include: The link between cultural differences in academic success to parents' academic socialization practices. The impact of culturally-specific parental engagement in positive developmental outcomes in children. Transgender children and their parents. The relationship between religious and secular values and their influence on creating polygamous teenagers. How to implement a micro-cultural lens to studying parent-child relationships during emerging adulthood. Differences and similarities in grandparenting among different cultures. *Parents and Caregivers Across Cultures* is a must-have resource for researchers, professors, graduate students as well as clinicians, professionals, and policymakers in the fields of developmental and cross-cultural psychology, parenting and family studies, social work, and related disciplines.

**Negotiating Via Information Technology** Leigh L. Thompson, 2000

**Affective Health and Masculinities in South Africa** Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Applied Research in Child and Adolescent Development Valerie Maholmes, Carmela Gina Lomonaco, 2011-01-11 Developed for an NIH training institute, this volume is organized around the most frequently asked questions by researchers starting their careers in applied research in child and adolescent

development. With contributions from the leading scholars in the field, actual research experiences highlight the challenges one faces in conducting such research. The techniques and theoretical frameworks most suitable for guiding the applied research process are reviewed along with related ethical and cultural considerations. Each chapter features the authors' introduction to their own careers in applied research. Also included are practical tips, case studies, and sidebars featuring frequently asked questions. This practical resource provides tips on how to: Modify the most frequently used methodological techniques while maintaining the integrity of the data Manage the unpredictable nature of real world research Frame community relevant research questions in an academically acceptable way Secure funding to conduct applied research Disseminate the research results so as to have the greatest impact on policy and practice. The book opens with the most frequently asked questions, tips on getting started in an applied research career, and an overview of and theoretical framework for generating applied developmental research ideas. Section 2 focuses on research designs including the most frequently used methodological and measurement techniques and tips on how to modify them to applied settings. Ethical challenges and cultural issues in working with special populations are also addressed. Section 3 focuses on conducting applied research in school, community, and clinical settings with an emphasis on the challenges encountered when conducting actual research as opposed to the more controlled settings taught in a classroom. Guidelines for protecting the populations involved in the study and strategies for recruiting and retaining participants are also addressed. The book concludes with strategies for disseminating research findings so as to have the greatest impact on policy and practice, for publishing research, and for securing funding. Intended as a practical

guide, this book is ideal for those just starting their careers in applied research, for students preparing their dissertations, and for the faculty who prepare these students. The book's accessible approach also appeals to researchers in the behavioral, social, and health sciences, education, and those in government and industry.

Child and Adolescent Psychiatry Savita Malhotra, Paramala Santosh, 2016-11-25 This is a comprehensive volume on issues and concerns relating to child and adolescent mental health in Asia, which includes contributions from experts in child psychiatry from Asia and other parts of the world. The chapters provide accurate and detailed accounts of the current state of knowledge integrating research approaches and findings from clinical studies. Each chapter discusses existing information, emphasizes areas of growth and provides fresh insights on a particular topic especially as these might relate to Asian populations. The book integrates various clinical and scientific perspectives on psychiatric disorders in children and adolescents with a focus on Asia. The various sections deal with important topics in child and adolescent psychiatry: the current understanding of mental disorders and the ways in which possible influences might work in the development of psychopathology; substance use disorders, their neurobiological correlates and implications for the developing brain; early environmental influences in the psychopathology of psychiatric disorders in children; issues of parenting, child rearing and cultural practices in Asia, which influence personality development and adaptation; life-long impact of early parental loss; early diagnosis and intervention in recognizing and treating psychopathology; psychopharmacology of neurodevelopmental disorders in

children; non-pharmacological treatments for children; mental health gap, and telepsychiatry as an innovative model to provide services for children; and a pressing need for a comprehensive child mental health policy across nations.

**Social Development** Marion K. Underwood, Lisa H. Rosen, 2013-09-19 This authoritative, engaging work examines the key role of relationships in child and adolescent development, from the earliest infant-caregiver transactions to peer interactions, friendships, and romantic partnerships. Following the sequence of a typical social development course, sections cover foundational developmental science, the self and relationships, social behaviors, contexts for social development, and risk and resilience. Leading experts thoroughly review their respective areas and highlight the most compelling current issues, methods, and research directions. End-of-chapter suggested reading lists direct students and instructors to exemplary primary sources on each topic. from back cover.
