Design Thinking in Technical Communication Jason Tham,2021-05-18 This book explicates the relationships between design thinking, critical making, and socially responsive technical communication. It leverages the recent technology-powered DIY culture called the Maker Movement to identify how citizen innovation can inform cutting-edge social innovation that advocates for equitable change and progress on today's wicked problems. After offering a succinct account of the origin and recent history of design thinking, along with its connections to the design paradigm in writing studies, the book analyzes maker culture and its influences on innovation and education through an ethnographic study of three academic makerspaces. It offers opportunities to cultivate a sense of critical changemaking in technical communication students and practitioners, showcasing examples of socially responsive innovation and expert interviews that urge a disciplinary attention to social justice advocacy and an embrace of the design-thinking principle of radical collaboration. The value of design thinking methodologies for teaching and practicing socially responsible technical communication are demonstrated as the author argues for a future in the field that sees its constituents as leaders in radical innovation to solve wicked social problems. This book is essential reading for instructors, students, and practitioners of technical communication, and can be used as a supplemental text for graduate and undergraduate courses in usability and user-centered design and research.

The Best Thinking in Business Analytics from the Decision Sciences Institute Decision Sciences Institute,Merrill Warkentin,2015-08-18 Today, business success depends on making great decisions – and making them fast. Leading organizations apply sophisticated business analytics tools and technologies to evaluate vast amounts of data, glean new insights, and increase both the speed and quality of decision making. In The Best Thinking and Practices in Business Analytics from the Decision Sciences Institute, DSI has compiled award-winning and award-nominated contributions from its most recent conferences: papers that illuminate exceptionally high-value applications and research on analytics for decision-making. These papers have appeared in no other DSI collection. Explore them here, and you'll discover powerful new opportunities for competitive advantage through analytics. For all business, academic, and organizational professionals concerned with the science of more effective decision-making; and for undergraduate students, graduate students, and certification candidates in all related fields.

Knowledge Based Expert Systems in Engineering D. Sriram,R. A. Adey,Robert A. Adey,1987

The Meaning of Thought Markus Gabriel,2020-12-03 From populist propaganda attacking knowledge as 'fake news' to the latest advances in artificial intelligence, human thought is under unprecedented attack today. If computers can do what humans can do and they can do it much faster, what's so special about human thought? In this new book, bestselling philosopher Markus Gabriel steps back from the polemics to re-examine the very nature of human thought. He conceives of human thinking as a 'sixth sense', a kind of sense organ that is closely tied our biological reality as human beings. Our thinking is not a form of data processing but rather the linking together of images and imaginary ideas which we process in different sensory modalities. Our time frame expands far beyond the present moment, as our ideas and beliefs stretch far beyond the here and now. We are living beings and the whole of evolution is built into our life story. In contrast to some of the exaggerated claims made by proponents of AI, Gabriel argues that our thinking is a complex structure and organic process that is not easily replicated and very far from being superseded by computers. With his usual wit and intellectual verve, Gabriel combines philosophical insight with pop culture to set out a bold defence of the human and a plea

for an enlightened humanism for the 21st century. This timely book will be of great value to anyone interested in the nature of human thought and the relations between human beings and machines in an age of rapid technological change.

Children's Thinking David F. Bjorklund,Kayla B. Causey,2017-01-24 The Sixth Edition of the topically organized Children's Thinking presents a current, comprehensive, and dynamic examination of cognitive development. The book covers individual children and their developmental journeys while also following the general paths of overall cognitive development in children. This unique and effective approach gives readers a holistic view of children's cognitive development, acknowledging that while no two children are exactly alike, they tend to follow similar developmental patterns. Supported by the latest research studies and data, the Sixth Edition provides valuable insights for readers to better understand and work with children.

Choose Your Own Adulthood Hal Runkel,2017-03-28 Congratulations, reader! You've successfully navigated through the trials of childhood and adolescence. Now, as you voyage through high school to college and beyond, you're set to begin your next big adventure: adulthood. A few big decisions await you, from majors and minors to jobs and careers (and maybe even marriage!). However, in between the big ones, you'll make a million other smaller, subtler choices that will underpin everything from your friendships to your bank account. These are the daily choices that will truly define you . . . so how will you choose? Choose Your Own Adulthood helps you approach these choices from a more thoughtful, curious, and ultimately self-aware perspective. You'll learn why responding is so much better than reacting, how loyalty is really overrated, which risks are worth taking and which are best avoided, and so much more. Exciting things await you on your journey toward adulthood: which path you take is for you to decide. Choose wisely!

The Van Hiele Model of Thinking in Geometry Among Adolescents David J. Fuys,Dorothy Geddes,Rosamond Welchman Tischler,1988

Twenty-one Mental Models That Can Change Policing Renée J. Mitchell,2021-09-15 This book goes beyond other police leadership books to teach practitioners how to think about policing in a structured way that synthesizes criminological theory, statistics, research design, applied research, and what works and what doesn't in policing into Mental Models. A Mental Model is a representation of how something works. Using a Mental Model framework to simplify complex concepts, readers will take away an in-depth understanding of how cognitive biases affect our ability to understand and interpret data, what empirical research says about effective police interventions, how statistical data should be structured for management meetings, and how to evaluate interventions for efficiency and effectiveness. While evidence-based practice is critical to advancing the police profession, it is limited in scope, and is only part of what is necessary to support sustainable change in policing. Policing requires a scientifically based framework to understand and interpret data in a way that minimizes cognitive bias to allow for better responses to complex problems. Data and research have advanced so rapidly in the last several decades that it is difficult for even the most ambitious of police leaders to keep pace. The Twenty-one Mental Models were synthesized to create a framework for any police, public, or community leader to better

understand how cognitive bias contributes to misunderstanding data and gives the reader the tools to overcome those biases to better serve their communities. The book is intended for a wide range of audiences, including law enforcement and community leaders; scholars and policy experts who specialize in policing; students of criminal justice, organizations, and management; reporters and journalists; individuals who aspire to police careers; and citizen consumers of information about policing. Anyone who is going to make decisions about their communities based on data has a responsibility to be numerate and this book Twenty-one Mental Models That Can Change Policing: A Framework For Using Data and Research For Overcoming Cognitive Bias, will help you become just that.

Cognitive Computing – ICCC 2018 Jing Xiao,Zhi-Hong Mao,Toyotaro Suzumura,Liang-Jie Zhang,2018-06-19 This book constitutes the proceedings of the International Conference on Cognitive Computing, ICCC 2018, held as part of SCF 2018, in Seattle, WA, USA, in June 2018. CCCC Bibliography of Composition and Rhetoric 1989 Erika Lindemann,1991-05 Published for the Conference on College Composition and Communication, this volume offers teachers and researchers an annual classified listing of scholarship on written English and its teaching at the college level. The 1989 volume lists and annotates 1,857 articles, books, dissertations, and papers. A group of 127 contributing bibliographers prepared the citations and annotations for all entries. The volume includes an index of authors and editors, and cross-references entries according to subject matter. Entries appear under five major categories:

bibliographies and checklists; theory and research; teacher education, administration, and social roles; curriculum; and testing, measurement, and evaluation. Although The CCCC Bibliography excludes master's theses, textbooks, computer software, and book reviews, it includes review essays, articles appearing in some 150 journals, scholarly books and essay collections, citations to dissertations abstracted in Dissertation Abstracts International, and selected documents and conference materials available through ERIC. Other bibliographies in the field of composition studies. The CCCC Bibliography of Composition and Rhetoric is more comprehensive than other bibliographies in the field of composition studies. It also draws upon a large group of experts in the field to aid teachers and researchers in sorting through a vast body of interdisciplinary material, making their work easier and more effective.
