 **Strengthening Forensic Science in the United States** National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for Congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

 **Paper Made!** Kayte Terry,2012-05-09 Announcing the biggest, best, most innovative book ever on paper craft. Even better, this is not about how to use costly, artsy paper, but how to turn stuff around the house—magazines and shopping bags, candy wrappers and paint sample cards, wrapping paper, old maps, and paper towel tubes—into stunning jewelry, gifts, home decor, party favors, and much more. Chances are you’ve seen the author’s cutting-edge work in the windows of Anthropologie, where she is the chain’s merchandising manager. An inveterate crafter who creates projects and styles photo shoots for magazines like Parents and Vogue Knitting, Kayte Terry takes the most versatile of materials and the most basic of crafts (remember snipping Valentines out of construction paper?), and creates something completely trans- formative. Turn a sheaf of any white or graph paper into an amazing Scrap Happy Globe lantern for the dining room. Fashion colored tissue paper into songbird votives, leftover raffle tickets into a prizewinning bowl, that out-dated pile of holiday catalogs into a picture frame. There’s a necklace made of playing cards, a gum wrapper bracelet, and barrettes made by quilling—a paper technique that goes back to the Renaissance. Every project is photographed in full color, and includes step-by-step illustrations and instructions. Truly a book that shows how to think outside the (cardboard) box.
