Sharp Cut Steven H. Gale, 2014-07-11 Best known as one of the most important playwrights of the twentieth century, Harold Pinter has also written many highly regarded screenplays, including Academy Award-nominated screenplays for *The French Lieutenant's Woman* and *Betrayal*, collaborations with English director Joseph Losey, and an unproduced script for the remake of Stanley Kubrick's 1962 adaptation of *Lolita*. In this definitive study of Pinter's screenplays, Steven H. Gale compares the scripts with their sources and the resulting films, analyzes their stages of development, and shows how Pinter creates unique works of art by extracting the essence from his source and rendering it in cinematic terms. Gale introduces each film, traces the events that led to the script's writing, examines critical reaction to the film, and provides an extensive bibliography, appendices, and an index.

Ritual, Media, and Conflict Ronald L. Grimes, Ute Husken, Udo Simon, Eric Venbrux, 2011-03-23 Rituals can provoke or escalate conflict, but they can also mediate it and although conflict is a normal aspect of human life, mass media technologies are changing the dynamics of conflict and shaping strategies for deploying rituals. This collection of essays emerged from a two-year project based on collaboration between the Faculty of Religious Studies at Radboud University Nijmegen in the Netherlands and the Ritual Dynamics Collaborative Research Center at the University of Heidelberg in Germany. An interdisciplinary team of twenty-four scholars locates, describes, and explores cases in which media-driven rituals or ritually saturated media instigate, disseminate, or escalate conflict. Each multi-authored chapter is built around global and local

examples of ritualized, mediatized conflict. The book's central question is: When ritual and media interact (either by the mediatizing of ritual or by the ritualizing of media), how do the patterns of conflict change?

Kasher in the Rye Moshe Kasher, 2012-03-28 "The finest, most moving and powerful memoir I have ever read."—MAYIM BIALIK Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *Kasher in the Rye* is not an eye opener to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control—his mother walked him around on a leash, which he chewed through and ran away. Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Journal of the Fortean Research Center Paperbound Ray Boeche, 2012-07-01 The Fortean Research Center was founded in Lincoln, Nebraska in 1982. During the two decades of its existence, this volunteer group of researchers and investigators delved deep into the unexplained. Exploring events in Nebraska - and far beyond - that included ghosts, UFOs, Bigfoot encounters, animal mutilations, government cover-ups, alleged alien abductions, psychic phenomena, cult activity, and even a sighting of a blob-like mystery creature the Fortean Research Center became recognized among members of the Fortean, paranormal, and UFO research communities around the world, as a

reliable and trusted source of information. Here is the entire collection of the Journal of the Fortean Research Center, 23 issues in all. These publications are a reflection of their time, and demonstrate in many cases the beginning steps into subjects familiar to the public today: alleged UFO crashes and landings at government installations, alien abductions, cryptozoology and more.

The Handbook of Pragmatics Laurence Horn, Gergory Ward, 2008-04-15 The Handbook of Pragmatics is a collection of newly commissioned articles that provide an authoritative and accessible introduction to the field, including an overview of the foundations of pragmatic theory and a detailed examination of the rich and varied theoretical and empirical subdomains of pragmatics. Contains 32 newly commissioned articles that outline the central themes and challenges for current research in the field of linguistic pragmatics. Provides authoritative and accessible introduction to the field and a detailed examination of the varied theoretical and empirical subdomains of pragmatics. Includes extensive bibliography that serves as a research tool for those working in pragmatics and allied fields in linguistics, philosophy, and cognitive science. Valuable resource for both students and professional researchers investigating the properties of meaning, reference, and context in natural language.

The Origins of Judaism Robert Goldenberg, 2014-05-14 No further information has been provided for this title.

Thoughts and Utterances Robyn Carston, 2008-04-15 Thoughts and Utterances is the first sustained investigation of two distinctions which are fundamental to all theories of utterance understanding: the semantics/pragmatics distinction and the distinction between what is explicitly communicated and what is implicitly communicated. Features the first sustained investigation of both the semantics/pragmatics distinction and the distinction between what is explicitly and

implicitly communicated in speech.

The Metaphorical Brain Seana Coulson, Vicky T. Lai, 2016-03-09 Metaphor has been an issue of intense research and debate for decades (see, for example [1]). Researchers in various disciplines, including linguistics, psychology, computer science, education, and philosophy have developed a variety of theories, and much progress has been made [2]. For one, metaphor is no longer considered a rhetorical flourish that is found mainly in literary texts. Rather, linguists have shown that metaphor is a pervasive phenomenon in everyday language, a major force in the development of new word meanings, and the source of at least some grammatical function words [3]. Indeed, one of the most influential theories of metaphor involves the suggestion that the commonality of metaphoric language results because cross-domain mappings are a major determinant in the organization of semantic memory, as cognitive and neural resources for dealing with concrete domains are recruited for the conceptualization of more abstract ones [4]. Researchers in cognitive neuroscience have explored whether particular kinds of brain damage are associated with metaphor production and comprehension deficits, and whether similar brain regions are recruited when healthy adults understand the literal and metaphorical meanings of the same words (see [5] for a review) . Whereas early research on this topic focused on the issue of the role of hemispheric asymmetry in the comprehension and production of metaphors [6], in recent years cognitive neuroscientists have argued that metaphor is not a monolithic category, and that metaphor processing varies as a function of numerous factors, including the novelty or conventionality of a particular metaphoric expression, its part of speech, and the extent of contextual support for the metaphoric meaning (see, e.g., [7], [8], [9]). Moreover, recent developments in cognitive neuroscience point to a sensorimotor basis for many concrete concepts, and raise the issue of

whether these mechanisms are ever recruited to process more abstract domains [10]. This Frontiers Research Topic brings together contributions from researchers in cognitive neuroscience whose work involves the study of metaphor in language and thought in order to promote the development of the neuroscientific investigation of metaphor. Adopting an interdisciplinary perspective, it synthesizes current findings on the cognitive neuroscience of metaphor, provides a forum for voicing novel perspectives, and promotes avenues for new research on the metaphorical brain. It encompasses a diverse set of approaches including the latest academic research offering new frameworks for understanding brand management, the researcher's perspective on current tools in practice by brand managers, new research and conceptual frameworks for understanding and managing customer experiences and recent empirical research and scale development in both brand and experience management. the book focuses on practical, managerial, and organizational best practices.

Right Hand, Left Hand I. C. McManus, 2002 McManus considers evidence from anthropology, particle physics, the history of medicine, and the notebooks of Leonardo to answer questions like: Why are most people right-handed? Why does European writing go from left to right, while Arabic and Hebrew go from right to left? And how do we know that Jack the Ripper was left-handed?

Goliath Max Blumenthal, 2013-10-01 2014 Lannan Foundation Cultural Freedom Notable Book Award In Goliath, New York Times bestselling author Max Blumenthal takes us on a journey through the badlands and high roads of Israel-Palestine, painting a startling portrait of Israeli society under the siege of increasingly authoritarian politics as the occupation of the Palestinians deepens. Beginning with the national elections carried out during Israel's war on Gaza in 2008-09, which brought into power the country's most right-wing government to date, Blumenthal tells the story of Israel in the wake of the collapse of the Oslo peace process. As Blumenthal reveals, Israel has become a country where right-wing leaders like Avigdor Lieberman and Bibi Netanyahu are sacrificing democracy on the altar of their power politics; where the loyal opposition largely and passively stands aside and watches the organized assault on civil liberties; where state-funded

Orthodox rabbis publish books that provide instructions on how and when to kill Gentiles; where half of Jewish youth declare their refusal to sit in a classroom with an Arab; and where mob violence targets Palestinians and African asylum seekers scapegoated by leading government officials as demographic threats. Immersing himself like few other journalists inside the world of hardline political leaders and movements, Blumenthal interviews the demagogues and divas in their homes, in the Knesset, and in the watering holes where their young acolytes hang out, and speaks with those political leaders behind the organized assault on civil liberties. As his journey deepens, he painstakingly reports on the occupied Palestinians challenging schemes of demographic separation through unarmed protest. He talks at length to the leaders and youth of Palestinian society inside Israel now targeted by security service dragnets and legislation suppressing their speech, and provides in-depth reporting on the small band of Jewish Israeli dissidents who have shaken off a conformist mindset that permeates the media, schools, and the military. Through his far-ranging travels, Blumenthal illuminates the present by uncovering the ghosts of the past -- the histories of Palestinian neighborhoods and villages now gone and forgotten; how that history has set the stage for the current crisis of Israeli society; and how the Holocaust has been turned into justification for occupation. A brave and unflinching account of the real facts on the ground, *Goliath* is an unprecedented and compelling work of journalism.

Old Testament Pseudepigrapha Richard Bauckham, James R. Davila, Alex Panayotov, 2013-11-21
This work stands among the most important publications in biblical studies over the past twenty-five years. Richard Bauckham, James Davila, and Alexander Panayotov's new two-volume collection of Old Testament pseudepigrapha contains many previously unpublished and newly translated texts, complementing James Charlesworth's Old Testament Pseudepigrapha and other earlier collections.

Including virtually all known surviving pseudepigrapha written before the rise of Islam, this volume, among other things, presents the sacred legends and spiritual reflections of numerous long-dead authors whose works were lost, neglected, or suppressed for many centuries. Excellent English translations along with authoritative yet accessible introductions bring those ancient documents to life for readers today.

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2002 Takeyoshi Dohi, Ron Kikins, 2003-06-30 The fifth international Conference in Medical Image Computing and Computer Assisted Intervention (MICCAI 2002) was held in Tokyo from September 25th to 28th, 2002. This was the first time that the conference was held in Asia since its foundation in 1998. The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field. Specifically, MICCAI offers a forum for the discussion of the state of art in computer-assisted interventions, medical robotics, and image processing among experts from multi-disciplinary professions, including but not limited to clinical doctors, computer scientists, and mechanical and biomedical engineers. The expectations of society are very high; the advancement of medicine will depend on computer and device technology in coming decades, as they did in the last decades. We received 321 manuscripts, of which 41 were chosen for oral presentation and 143 for poster presentation. Each paper has been included in these proceedings in eight-page full paper format, without any differentiation between oral and poster papers. Adherence to this full paper format, along with the increased number of manuscripts, surpassing all our expectations, has led us to issue two proceedings volumes for the first time in MICCAI's history. Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints. However, we decided to increase the volume to offer authors

maximum opportunity to argue the state of art in their work and to initiate constructive discussions among the MICCAI audience.

Art and Architecture of the World's Religions [2 volumes] Leslie D. Ross,2009-06-04 Two abundantly illustrated volumes offer a vibrant discussion of how the divine is and has been represented in art and architecture the world over. Beginning with the ancient worlds of Mesopotamia, Egypt, Greece, and Rome and moving forward through time, Art and Architecture of the World's Religions explores the major faiths from countries and continents around the globe, helping readers better understand the creations their beliefs have inspired. After tracing the history and development of a religion, the book provides a general overview of its principal beliefs and key practices. It then offers specific examples of how works of art/architecture reflect that religion's

values. The focus of each chapter is on the temples, churches, and religious buildings, statues, paintings, and other works of art and architecture created by believers. Each representative work of art or architecture is examined in terms of its history, materials, symbols, colors, and patterns, as its significance is explained to the reader. With extensive illustrations, these volumes are the definitive reference work on art and architecture of the world's religions.
